The Sports Management Toolkit is a practical guide to the most important management tools and techniques available to those working in the sport and leisure industries. Designed to bridge the gap between the classroom and the workplace, it includes ten free-standing chapters, each of which provides a detailed introduction to best practice in one of the core sports management disciplines. Written in a clear and straightforward style, and free of management jargon, the book covers all the key functional areas of contemporary sports management, including: marketing performance management risk management human resource management project management finance. Each chapter includes a detailed, step-by-step description of the key tools and techniques and their application; a 'real world' case study to demonstrate the technique in action, plus an extensive guide to further resources and a series of self-test questions. The final chapter offers an extended, integrated case-study, demonstrating how all the key management techniques are combined within the everyday operation of a successful sport or leisure organization. This book is essential reading for all students of sport and leisure management, and for all managers looking to improve their professional practice.

Capital investment decisions are a constant challenge to all levels of financial managers. Capital Budgeting: Theory and Practice shows you how to confront them using state-of-the-art techniques. Broken down into four comprehensive sections, Capital Budgeting: Theory and Practice explores and illustrates all aspects of the capital budgeting decision process. Pamela Peterson and Frank Fabozzi examine the critical issues and limitations of capital budgeting techniques with an in-depth analysis of: Classifying capital budgeting proposals Determining the relevant cash flows for capital budgeting proposals Assessing the economic value of a capital budgeting proposal using different techniques Incorporating risk into the capital budgeting decision Evaluating whether to lease or borrow-to-buy Capital Budgeting: Theory and Practice provides the knowledge, insight, and advice that will allow you to handle one of the most important aspects of your firm's financial management. Advanced enough for practitioners yet accessible enough for the novice, Capital Budgeting: Theory and Practice is your complete guide to understanding and benefiting from the essential techniques of capital budgeting.

This fictional U.S.-based case requires students to evaluate an asset-replacement decision in relation to whether a company should keep an asset it purchased and put into operation two years ago or whether it should replace that asset with a newer, more efficient model. Increasingly, accountants are being called upon to be "value integrators," that is, to integrate knowledge and skills from across a variety of disciplines. To complete the XYZ case successfully, students will need to draw upon and integrate concepts from accounting (determining relevant cash flows), finance (modeling-related issues associated with the analysis of a capital budgeting decision), and tax (various real-world considerations). In addition, students are asked to complement their financial analysis with strategic and/or qualitative considerations associated with the capital investment proposal under consideration. Extensive use of Microsoft Excel is required to complete the case, including the use of Excel to deal with the issue of uncertainty. A final requirement of the case is to prepare an effective document (or table) that summarizes the various analyses students conduct in conjunction with the present case analysis.

This is a book of hypothetical cases written to give students real examples of key finance concepts. Each case is 3-4 pages in length, and concludes with questions and problems that walk students through calculations and critical analysis of the case to help them make business decisions.

Designed for those who want to gain an understanding of the fundamental concepts and techniques used in financial management. An underlying premise of the book is that the objective of the firm is to maximize value or wealth. Drawing on a wealth of experience in the academic and professional worlds, the authors discuss how firms can accomplish this objective by making appropriate investment and financing decisions. Bridging the gap between financial theory and practice, the authors present fundamental concepts in an intuitive and nontechnical way, and provide numerous practical financial tips to readers. The focus is on current practice, using results from recent surveys to show the most popular techniques and approaches used by financial managers today. A range of instructor's resources are available at the accompanying website. Visit www.blackwellpublishing.com/baker for full details.

The 9/11 Commission Report

Planning the Development of Builders, Leaders and Managers for 21st-Century Business: Curriculum Review at Columbia Business School

Financial Management in the Sport Industry provides readers with an understanding of sport finance and the importance of sound financial management in the sport industry. It begins by covering finance basics and the tools and techniques of financial quantification, using current industry examples to apply the principles of financial management to sport. It then goes beyond the basics to show how financial management works specifically in sport - how decisions are made to ensure wealth maximization. Discussions include debt and equity financing, capital budgeting, facility financing, economic impact, risk and return, time value of money, and more. The final section focuses on sport finance in three sectors of the industry - public sector sports, collegiate athletics, and professional sport-providing in-depth analysis of financial management in each sector. Sidebars, case studies, concept checks, and practice problems throughout provide practical applications of the material and enable thorough study and practice. The business of sport has changed dynamically since the publication of the first edition, and this second edition reflects the impact of these changes on financial management in the sport industry. New to this edition are changes to reflect the global nature of sport (with, for example, discussions of income tax rates in the Premiere League), expanded material on the use of spreadsheets for financial calculations, a primer on accounting principles to help students interpret financial statements, a valuation case study assignment that takes students step by step through a valuation, a new stadium feasibility analysis using the efforts of the Oakland Raiders to obtain a new stadium, a new economic impact example focusing on the NBA All Star game, and much more.

Needles/Powers/Crosson PRINCIPLES OF ACCOUNTING is continuously evolving to meet the needs of today's learner. This edition's new structure is based on research with students about the best way to deliver content in this course! The chapters in Needles/Powers/Crosson have been organized into the Three Section Approach, which helps you more easily digest the content. The first section is Concepts and focuses on the overarching accounting concepts that require consistent reiteration throughout the course. With a clear understanding of the concepts, you are then ready to experience the second section—Accounting Applications. Here you practice the application of accounting procedures with features like Apply It and a new transaction analysis model, which clearly illustrates how transactions are the result of business decisions and recorded in a way to show their effects on the financial statements. Finally, you utilize section three, Business Applications. This section illustrates how the concepts and procedures are used to make business decisions. Real company examples are used throughout the chapter to show students the relevance of the material. This logical progression through the material is further supported in the online environment in CengageNOW with the Tri-Level Problem. This problem mirrors the Three Section Approach and connects the sections to facilitate a more complete understanding. These substantial changes will make you a more efficient learner and are designed to prepare you for a business world increasingly complicated by ethical issues, globalization. This book explains the financial appraisal of capital budgeting projects. The coverage extends from the development of basic concepts, principles and techniques to the application of them in increasingly complex and real-world situations. Identification and estimation (including forecasting) of cash flows, project appraisal formulae, and the application of net present value (NPV), internal rate of return (IRR) and other project evaluation criteria are illustrated with a variety of calculation examples. Risk analysis is extensively covered by the use of risk adjusted discount rate, certainty equivalent, sensitivity, simulation and Monte Carlo analysis. The NPV and IRR models are further applied to forestry, property and international investments. Resource constraints are introduced to the capital budgeting decisions with a variety of worked examples using linear programming technique. All calculations are extensively supported by Excel workbooks on the Web, and each chapter is well reviewed by end of chapter questions.

Corporate finance is concerned with how to make capital investment decisions (capital budgeting); how to finance company activities, including new investments; and how to make dividend payment decisions. This book will lecture on important topics for corporate finance, which will cover methods, theory, and policy decisions. The topics which will be addressed in this book include how streams of cash flows are valued, how financial managers evaluate investment opportunities, how financial statements are used to evaluate a company's financial condition and its market value, how a manager chooses between mutually exclusive opportunities, and how they evaluate different types of investment. This book will also discuss the treatment of risk when evaluating a project and the required returns on a project. Alternative sources of funds used to finance new projects, which include internal and external sources of funds, will be theoretically and empirically demonstrated. Lastly, long-term financial planning will be discussed.

Business and management education has an important impact on business practice throughout the world. To a very large extent, possession of the MBA degree is a passport into the upper reaches of management, and CEOs of many major corporations have earned an MBA. It is a reasonable inference that the education received by these leaders and managers during their MBA experience has an important impact on the way that businesses throughout the world are led and managed and that major corporate decisions are made. The heart of the MBA education is the curriculum, and curriculum design is perhaps the most important strategic function for a business school faculty to undertake. In order to understand the many issues concerning this contemporary curriculum review, this book examines three related contextual domains. First, it details the long-term growth of business and management education. Second, it examines the major theoretical and empirical literatures on organizational evolution and decision making, paying special attention to decision making in institutions of higher education. Finally, the book describes the previous major curriculum review at Columbia Business School in the late 1950s and the subsequent changes that formed the curriculum that was changed in 1992. This book demonstrates what can be achieved by an institution that sets high standards for its business education, and assists faculty and administrators in other schools of business and management as they contemplate revision of their curricula. In addition, it provides a prime example of curriculum design effort in one of the leading institutions worldwide. Finally, it will be of interest to scholars in several different fields, notably, higher education curriculum review, organizational decision making and long-run organizational evolution.

The workbook to accompany Corporate Finance: A Practical Approach, Second Edition

Fundamentals of Corporate Finance, 2nd Edition offers an innovative integration of conceptual understanding and problem-solving ... of intuition and decision-making ... of the authors' industry and classroom/research experience ... with current real-world examples and online practice. Authors Robert Parrino, David Kidwell, and Thomas Bates believe that students who understand the intuition underlying the basic concepts of finance are better able to develop the critical judgments necessary to apply financial tools in real decision-making situations. Their text develops intuitive thinking while simultaneously helping students develop problem solving and computational skills. It then shows students how to apply intuition and analytical skills to decision making while integrating it all with valuation and building shareholder value.

Many universities offer the Master of Public Administration (MPA) or other public affairs degree, which includes at least one course in public budgeting or public financial management. The faculty who teach these courses can however sometimes struggle to cover the breadth of material required and to fully engage students in what can be a technical subject. Teaching Public Budgeting and Finance: A Practical Guide addresses this challenge by sharing hands-on classroom expertise from leading scholars and creative instructors in the field. Drawing on their extensive experiences with teaching, researching, and engaging in service, each contributor reflects on how their area of expertise can be taught most effectively, providing a discussion of student learning outcomes, pedagogical approaches, relevant resources, and appropriate course assignments. While no one book can provide a final say on classroom instruction, this first-of-its-kind primer on teaching public budgeting and financial management courses is a detailed, indispensable guide for all faculty looking to improve the learning experience of students in the classroom. Teaching Public Budgeting and Finance: A Practical Guide is required reading for early career faculty as they prepare to teach the course for what may be the first time, as well as for more senior faculty looking to update their course, complement their own teaching strengths, or teaching the course for the first time in several years.
