File Type PDF

separates those who master these challenges and those who get derailed? The answer is agility—emotional agility. Emotional agility is a revolutionary, science-based approach that allows us to

navigate life's
twists and turns
with self-
acceptance, clear-
sightedness, and
an open mind.

Renowned
psychologist
Susan David
developed this
concept after
studying
emotions,

happiness, and achievement for more than twenty years. She found that no matter how intelligent or creative people are, or what type of personality they have, it is how they navigate their inner world—their thoughts, feelings,

File Type PDF

Courses Listed

Sap Training

and self-talk—that ultimately determines how successful they will become. The way we respond to these internal experiences drives our actions, careers, relationships, happiness, health—everything

File Type PDF

that matters in our lives. As humans, we are all prone to common hooks—things like self-doubt, shame, sadness, fear, or anger—that can too easily steer us in the wrong direction.

Emotionally agile people are not

File Type PDF
Courses Listed
Sap Training

immune to stresses and setbacks. The key difference is that they know how to adapt, aligning their actions with their values and making small but powerful changes that lead to a lifetime of growth. Emotional agility is

File Type PDF

Courses Listed

Sap Training

not about ignoring difficult emotions and thoughts; it's about holding them loosely, facing them courageously and compassionately, and then moving past them to bring the best of yourself forward.
