This volume offers an overview of the context of internationalisation in which plurilingualism becomes a strategic axis for universities and in which university language centres serve as the key instrument to implement this process. It focuses on three key areas in which language centres are working together with governments across Europe, namely: language policy and internationalisation; specific training for the university community; and language testing and accreditation. The contributors to this book are all policy makers, instructors or evaluators from university language centres involved in the internationalisation of their institutions through languages. They teach and evaluate not only 'regular' students, but students with very specific needs, such as lecturers delivering content courses in English, students in mobility programmes or administrative staff in contact with international students. The book also includes the presentation of the first national higher education language policy in Europe, developed by the Language Policy Commission of the Board of Rectors of Spanish Universities and endorsed by all public and private universities in Spain.

Second language assessment is ubiquitous. It has found its way from education into questions about access to professions and migration. This volume focuses on the main debates and research advances in second language assessment in the last fifty years or so, showing the influence of linguistics, politics, philosophy, psychology, sociology, and psychometrics. There are four parts which, when taken together, address the principles and practices of second language assessment while considering its impact on society. Read separately, each part addresses a different aspect of the field. Part I deals with the conceptual foundations of second language assessment with chapters on the purposes of assessment, and standards and frameworks, as well as matters of scoring, quality assurance, and test validation. Part II addresses the theory and practice of assessing different second language skills including aspects like intercultural competence and fluency. Part III examines the challenges and opportunities of second language assessment in a range of contexts. In addition to chapters on second language assessment on a national scale, there are chapters on learning-oriented assessment, as well as the uses of second language assessment in the workplace and for migration. Part IV examines a selection of important issues in the field that deserve attention. These include the alignment of language examinations to external frameworks, the increasing use of technology to both deliver and score second language tests, the responsibilities associated with assessing test takers with special needs, the concept of 'voice' in second language assessment, and assessment literacy for teachers and other test and score users.

This book focuses on the assessment of English language writing in China mainland, the territories of Hong Kong and Macau, and Taiwan. The first part of the book describes how writing in English has been assessed in Chinese contexts in the past 25 years, and how it continues to be assessed at present.

The second part of the book presents reports of work such as formative classroom-based assessment, feedback-based or feedback-led approaches, learning-oriented assessment, portfolios, as well as the important issue of teacher professional development in writing assessment. This two-part division relates to and reflects what has been happening in writing assessment internationally, in the UK from the 1940s, and in the US in the past 25 years. The use of English for international business communication, for international political negotiations and its rapidly increasing use as a medium of instruction in some subject areas has led to a rapid increase in the numbers of Chinese L1 speakers who are learning and being assessed in English. This is often done with an emphasis on reading and writing. The vast majority of assessments of English language writing are done through large-scale direct testing that uses simple prompts/tasks and short writing samples. This book explores best practices in assessing the writing in English of native speakers of Chinese. Assessing the English Language Writing of Chinese Learners of English edited by long-time experts Liz Hamp-Lyons and Yan Jin clearly demonstrates the authors' collective years of writing and teaching about writing assessment. The book's 13 chapters, written by recognized experts in assessment of Chinese speakers learning English, represent a wide array of important topics written in reader friendly language and offering evidence for pedagogical practices as well as high-stakes testing of writing. Teachers, researchers, administrators of writing programs in China, and test developers who seek counsel about this population need look no further than to add Assessing the English Language Writing of Chinese Learners of English to their reading list.

Challenges in Language Testing Around the World

Research and Practice in Assessing Second Language Listening

Master an exceptional level of English with confidence.

Objective Proficiency Self-study Student's Book

This volume examines the nature of second language listening proficiency and how it can be assessed. The book highlights the need for test developers to provide a clear explication of the ability constructs which underpin the tests they offer in the public domain. This is increasingly necessary if claims about the validity of test score interpretation and use are to be supported both logically and with empirical evidence. It operationalises a comprehensive test validation framework which adopts a socio-cognitive perspective. The framework embraces six core components, examining and then analysing Cambridge ESOL listening tasks from the following perspectives: Test Taker; Cognitive Validity; Context Validity; Scoring Validity; Criterion-related Validity; and Consequential Validity.

The book contains contributions from practitioners and theoreticians who explore the pronunciation of English from various perspectives: phonetic, phonological, psycholinguistic and sociolinguistic. In accordance with the unifying theme of the volume, individual contributions investigate the characteristics of a foreign accent, its production and perception, study the development of methods and techniques in pronunciation teaching, evaluate their use in classroom materials and in the classroom itself, and investigate the conditions for second language learning and teaching from the perspective of learners and teachers. The book offers a unique combination of a scholarly research with practical applications, inspired over the years by the work of Professor Włodzimierz Sobkowiak, who has researched pronunciation teaching and pioneered technology-oriented, corpus-based approaches to the study of English pronunciation in Poland.

The author's experience and detailed knowledge of the exam ensure that the test papers closely replicate the new exam in level and format. Authentic sample answers with assessment for Paper 2 Writing tasks. Colour photos for Paper 4 Speaking. Photocopiable answer sheets. The practice tests are ideal for classroom use or as an invaluable self-study resource.

Objective Proficiency contains twenty short units providing a wide range of challenging topics and offering lively yet systematic preparation for the Proficiency exam. Ten lessons focus on the Paper 3 summary task, building up appropriate skills gradually. Authentic language examples taken from the Cambridge International Corpus illustrate a wide range of real English usage. The course is written by experienced examiners who have an in-depth knowledge of the Proficiency exam, and contains material informed by the Cambridge Learner Corpus which shows typical mistakes and areas of difficulty for candidates at Proficiency level.

This book combines insights from language assessment literacy and critical language testing through critical analyses and research about challenges in language assessment around the world. It investigates problematic practices in language testing which are relevant to language test users such as language program directors, testing centers, and language teachers, as well as teachers-in-training in Graduate Diploma and Master of Arts in Applied Linguistics programs. These issues involve aspects of language testing such as test development, test administration, scoring, and interpretation/use of test results. Chapters in this volume discuss insights about language testing policy, testing world languages, developing program-level language tests and tests of specific language skills, and language assessment literacy. In addition, this book identifies two needs in language testing for further examination: the need for collaboration between language test developers, language test users, and language users, and the need to base language tests on real-world language use.

This volume brings together 15 peer-reviewed papers which discuss numerous current topics in language and literature. It synthesizes various contemporary practical topics in post-secondary education written by active researchers and practitioners in their respective areas. By using research methods such as mixed methods, case studies, discourse analysis, grounded theory and the repertory grid, the contributors offer insights into the ways in which higher education continuously changes and evolves to face constant challenges resulting from new instructional practices. Taking this into consideration, this book will help educators, researchers and students to keep up with these changes, and to stay aware of contemporary issues relating to post-secondary education.

Against the background of NATO's Istanbul conference of 1971 (Cronbach and Drenth, 1972), the Kingston conference shows that great progress has been made by the community of cross-cultural psychologists. The progress is as much in the psychology of the investigators as in the investigations being reported. In 1971 the investigators were mostly strangers to each other. Behind their reports lay radically different field experiences, disparate research traditions, and mutually contradictory social ideals. Istanbul was not a Tower of Babel, but participants did speak past each other. Now a community exists, thanks to the meetings of NATO and the International Association for Cross-Cultural Psychology, to flourishing journals, and the Triandis et al. (1980) Handbook. The members tend to know each other, can anticipate how their formulations will fall on the ears of others, and accept superficially divergent approaches as making up a collective enterprise. Ten years ago there was open conflict between those who confronted exotic peoples with traditional tests and applied traditional interpretations to the responses, and the relativists who insisted that tasks, test taking, and interpretation cannot be "standardized" in the ways that matter. Today's investigators are conscious of the need to revalidate tasks carried into alien settings; they often prefer to redesign the mode of presentation and to attune the subject to test taking. They face the difficulties squarely and recognize that even the best means of coping are only partially successful. This handbook examines policy and practice from around the world with respect to broadly conceived notions of inclusion and diversity within education. It sets out to provide a critical and comprehensive overview of current thinking and debate around aspects such as inclusive education rights, philosophy, context, policy, systems, and practices for a global audience. This makes it an ideal text for researchers and those involved in policy-making, as well as those teaching in classrooms today. Chapters are separated across three key parts: Part I: Conceptualizations and Possibilities of Inclusion and Diversity in Education Part II: Inclusion and Diversity in Educational Practices, Policies, and Systems Part III: Inclusion and Diversity in Global and Local Educational Contexts Principles, Methods and Practices

This volume establishes how English language constructs were measured in Cambridge English examinations over the period 1913 to 2012. An addition to the Studies in Language Testing series, this volume provides an overview of English language testing over the last century, with coverage of key theoretical and practical aspects of the assessment of reading, listening, writing and speaking skills. It includes examples of the Cambridge English exams, old and new, and is the first volume to describe in a systematic way the different theoretical influences which have shaped the development of the constructs underlying Cambridge English exams in the last 100 years.

The Routledge Introductions to Applied Linguistics series takes an innovative 'practice to theory' approach, with a 'back-to-front' structure. This leads the reader from real-world problems and issues, through a discussion of intervention and how to engage with these concerns, before finally relating these practical issues to theoretical foundations. Exploring Language Assessment and Testing offers a straightforward and accessible introduction that starts from real-world experiences and uses practical examples to introduce the reader to the academic field of language assessment and testing. Extensively updated, with additional features such as reader tasks (with extensive commentaries from the author), a glossary of key terms and an annotated further reading section, this second edition provides coverage of recent theoretical and technological developments and explores specific purposes for assessment. Including concrete models and examples to guide readers into the relevant literature, this book also offers practical guidance for educators and researchers on designing, developing and using assessments. Providing an inclusive and impartial survey of both classroom-based assessment by teachers and larger-scale testing, this is an indispensable

introduction for postgraduate and advanced undergraduate students studying Language Education, Applied Linguistics and Language Assessment.

An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of Battle Hymn of the Tiger Mother). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

Washback refers to the influence of language testing on teaching and learning. This volume, at the important intersection of language testing and teaching practices, presents theoretical, methodological, and practical guidance for current and future washback studies. In the field of language testing, researchers' major interest has traditionally been focused on issues and solving problems inherent in tests in order to increase their reliability and validity. However, the washback effect goes well beyond the test itself to include factors, such as curriculum, teacher and learner behaviors inside and outside the classroom, their perceptions of the test, and how test scores are used. Only recently have researchers started to empirically investigate the phenomenon of washback. This volume of such research serves two essential purposes by: *providing an overview of the complexity of washback and the various contextual factors entangled within testing, teaching, and learning; and *presenting empirical studies from around the world that offer insights into the effects of washback in specific educational contexts and models of research on which future studies can be based. The extensive use of test scores for various educational and social purposes in society nowadays makes the washback effect a high-interest phenomenon in the day-to-day educational activities of teachers, researchers, program coordinators/directors, policymakers, and others in the field of education. Washback in Language Testing: Research Contexts and Methods is a valuable resource for those who are interested in the application of findings to actual teaching and learning situations or conduct washback research in their own contexts, including educational and psychological testing experts, as well as alternative assessment people in all fields, and for policy- and decision-makers in educational and testing organizations.
