Constraint-Induced Movement therapy (CI therapy) is a behavioral approach to neurorehabilitation based on a program of neuroscience experiments conducted with monkeys. Evidence has accumulated to support the efficacy of CI therapy for rehabilitating hemiparetic arm use in individuals with chronic stroke. This book addresses the related topics.

Haynes manuals are written specifically for the do-it-yourselfer, yet are complete enough to be used by professional mechanics. Since 1960 Haynes has produced manuals written from hands-on experience based on a vehicle teardown with hundreds of photos and illustrations, making Haynes the world leader in automotive repair information.

Each Haynes manual provides specific and detailed instructions for performing everything from basic maintenance and troubleshooting to a complete overhaul of the machine, in this case the Honda CBR1000RR Fireblade, model years 2004 through 2007. Do-it-yourselfers will find this service and repair manual more comprehensive than the factory manual, making it an indispensable part of their tool box. A typical Haynes manual covers: general information; troubleshooting; lubrication and routine maintenance; engine top end; engine lower end; primary drive, clutch and external shift mechanism; transmission and internal shift mechanism; engine management system; electrical system; wheels, tires and drivebelt; front suspension and steering; rear suspension; brakes; body, and color wiring diagrams. An index makes the manual easy to navigate.

Associated Motor Cycles (AMC) produced some of the most iconic British bikes of the 1940s and 1950s. Badged as either AJS or Matchless, the range covered everything from plodding ride-to-work four-stroke singles, weekend racers, two-stroke motocrossers and full-blown Grand Prix contenders. Illustrated with over 200 photographs, this comprehensive account looks at the history and development of the single and twin-cylinder ranges; the racing bikes; technical details of all major models, and owning and riding AJS and Matchless bikes today. An invaluable resource for the AMC enthusiast and motorcycle historians, superbly illustrated with over 200 colour and black & white photographs.

Motocross began in England in the 1920s and took firm root in post-war Europe. After arriving in North America in the late 1960s, the sport was embraced by enthusiasts and developed into an American phenomenon. By the early 1980s riders from the USA were dominating the sport's natural-terrain circuits, and the uniquely-American spinoff discipline of Supercross was packing NFL stadiums nationwide. In 2005, the Motorcycle Hall of Fame Museum created an exhibit, Motocross America, which celebrates the history of American motocross.

Motocross America is a lavishly illustrated book that features the bikes and memorabilia from the museum display and text by Bill Amick. The Motocross America exhibit is open to the public at the Motorcycle Hall of Fame Museum in Pickerington, Ohio, through 2006.

Smith and Vollmer-Snarr's Organic Chemistry with Biological Topics continues to breathe new life into the organic chemistry world. This new fifth edition retains its popular delivery of organic chemistry content in a student-friendly format. Janice Smith and Heidi Vollmer-Snarr draw on their extensive teaching background to deliver organic chemistry in a way in which students learn: with limited use of text paragraphs, and through concisely written bulleted lists and highly detailed, well-labeled "teaching" illustrations. The fifth edition features a

modernized look with updated chemical structures throughout. Because of the close relationship between chemistry and many biological phenomena, Organic Chemistry with Biological Topics presents an approach to traditional organic chemistry that incorporates the discussion of biological applications that are understood using the fundamentals of organic chemistry. See the New to Organic Chemistry with Biological Topics section for detailed content changes. Don't make your text decision without seeing Organic Chemistry, 5th edition by Janice Gorzynski Smith and Heidi Vollmer-Snarr!
