As a consequence, creating a global competitive advantage has become a key strategic issue for many companies. Crafting a global strategy requires making decisions about which strategy elements can and should be globalized and to what extent.

While scores of strategic management books have been written, many books fail to take into consideration the influences that shape and constrain managers' ability to formulate and execute well-thought out strategies. Demystifying Your Business Strategy acknowledges and harnesses those influences, providing practitioners with a helpful new approach to developing and maintaining a competitive advantage. In this book, David Lei and John W. Slocum offer readers a comprehensive overview of the drivers of evolutionary advantage, recognizing that sources of competitive advantage for any organization will necessarily shift and evolve in response to changes in the industry environment. Demystifying Your Business Strategy also offers practical insights on how to spot "inflection points" of strategic transition and identify signals that indicate when an organization needs to develop a new source of competitive advantage. With in-depth discussion of the four different t

business strategies that many firms pursue and the strategic disciplines that support them, this book can provide significant insight and direction to managers at all levels within an organization.

Presenting the most recent developments in research and strategy, this text applies these theories and illustrates the implementation in business cases.

After a brief overview of different ideas on strategy and strategic thinking, we move on to define and discuss what strategy tools are and elaborate on the promise and perils of using them to implement strategic management. We review the most commonly used, classic tools and techniques, but also less well-known tools of the strategy trade, as proposed by scholars writing in the leading strategy journals. We conclude by offering suggestions on how to improve strategic design and the effectiveness of the resultant strategy through the selective use of the most appropriate tools.
