**Excellent business communication skills are especially important for information management professionals, particularly records managers, who have to communicate a complex idea: how an effective program can help the organization be better prepared for litigation, and do it in a way that is persuasive in order to win records program support and budget. Six Key Communication Skills for Records and Information Managers explores those skills that enable records and information to have a better chance of advancing their programs and their careers. Following an introduction from the author, this book will focus on six key communication skills: be brief, be clear, be receptive, be strategic, be credible and be persuasive. Honing these skills will enable readers to more effectively obtain support for strategic programs, communicate more effectively with senior management, IT personnel and staff, and master key forms of business communication including written, verbal and formal presentations. The final chapter will highlight one of the most practical applications of applying the skills for records and information managers: the business case. Based on real events, the business cases spotlighted involve executives who persuaded organizations to adopt new programs. These case histories bring to life many of the six keys to effective communication. addresses communication**

**This commentary builds on the work of previous scholarship and addresses contemporary issues. It gives serious attention to questions of textual criticism, philology, history, and Near Eastern backgrounds and is sensitive to the literary conventions characteristic of the prophetic literature of the Old Testament. The book is an earnest attempt to hear the message of the ancient prophets, a message that remains relevant today. The Old Testament Library provides fresh and authoritative treatments of important aspects of Old Testament study through commentaries and general surveys. The contributors are scholars of international standing.**

**When someone offered Michael DiPaolo \$5,000 to help make a Digital Video horror film, he jumped at the chance to test a theory: an ultra-low budget feature, shot in less than a week, with a paid cast and crew, could be successful if meticulously planned. Using one computer and one camcorder, he produced and edited Daddy, which had its theatrical premier in New York City in 2004. This book breaks down the production through a detailed daily diary, emphasizing that the**

most important aspects of successful producing are careful planning and camaraderie in the group. The work covers many points important for the low-budget filmmaker, including selecting a story; budgeting; scheduling; picking cast and crew; scouting locations; finding wardrobe, food, and transportation; and what to do if you run out of time or money. Postproduction is also covered (editing, computer work, and sound design), as is the result of all this hard work: screenings, festivals, and distributors. One chapter covers the primacy of cinematic point-of-view, and another profiles some role models for the aspiring low-budget filmmaker: Edgar Ulmer, Val Lewton, Roger Corman, John Cassavetes, Ed Wood, Jr., and Jean-Luc Godard. Later chapters explain strategy and tactics of guerrilla filmmaking and show the budding filmmaker how to recognize both his limitations and his strengths.

*A practical, one-stop reference on the theory and applications of statistical data editing and imputation techniques Collected survey data are vulnerable to error. In particular, the data collection stage is a potential source of errors and missing values. As a result, the important role of statistical data editing, and the amount of resources involved, has motivated considerable research efforts to enhance the efficiency and effectiveness of this process. Handbook of Statistical Data Editing and Imputation equips readers with the essential statistical procedures for detecting and correcting inconsistencies and filling in missing values with estimates. The authors supply an easily accessible treatment of the existing methodology in this field, featuring an overview of common errors encountered in practice and techniques for resolving these issues. The book begins with an overview of methods and strategies for statistical data editing and imputation. Subsequent chapters provide detailed treatment of the central theoretical methods and modern applications, with topics of coverage including: Localization of errors in continuous data, with an outline of selective editing strategies, automatic editing for systematic and random errors, and other relevant state-of-the-art methods Extensions of automatic editing to categorical data and integer data*

This pioneering book introduces students to the practice and art of creative writing and creative reading. It offers a fresh, distinctive and beautifully written synthesis of the discipline. David Morley discusses where creative writing comes from, the various forms and camouflages it has taken, and why we teach and learn the arts of fiction, poetry and creative nonfiction. He looks at creative writing in performance; as public art, as visual art, as e-literature and as an act of community. As a leading poet, critic and award-winning teacher of the subject, Morley finds new engagements for creative writing in the creative academy and within science. Accessible, entertaining and groundbreaking, *The Cambridge Introduction to Creative Writing* is not only a useful textbook for students and teachers of writing, but also an inspiring read in its own right. Aspiring authors and teachers of writing will find much to discover and enjoy.

THINK LIKE AN EDITOR is designed for the new breed of editors who are

evolving at the same time news and information sharing is changing. The book encourages students to apply themselves confidently, to think analytically, to examine information with scrutiny, and to see the big picture. Organized by the 50 strategies of editing and working, each strategy section is two to six pages long, which makes content easy to find for both students and professors. The text combines an examination of content depth with insight into the process behind editorial decision-making. Full of tips, lists, and memory aids, THINK LIKE AN EDITOR works similarly to a brief handbook of editing. The second edition features new strategies to help students think creatively in a world of social media, handle multiple platforms, and keep readers engaged. Both basic skills and advanced concepts of editing are covered. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Copyright for Schools makes legal concepts related to U.S. copyright law

understandable to educators. A staple on reference shelves, it has now been updated with new court rulings and technology applications. This updated edition of *Copyright for Schools* explains U.S. copyright law as it applies to education settings clearly and concisely for teachers and school librarians. Topics new to this edition include copyright implications related to the use of such streaming services as Netflix™ and Pandora™, links to online tools that teachers can use to assist them in making their own daily decisions regarding the use of copyrighted materials, and implications relating to the use of anonymous internet publishing tools such as Snapchat™ and use of Cloud-based sharing. Other new topics include issues related to disability, how to appropriately respond to cease and desist letters and other legal inquiries, implications of the Music Modernization Act, and expanded discussion of open resources such as Creative Commons licenses. This edition also adds a concordance in a "Scope and Sequence" table format, so all

information related to U.S. copyright knowledge is accessible no matter where it resides within the text, and provides links to online tools and resources that can be used to guide users of copyrighted materials in making decisions about how to use them.
