

Crew Leader Handbook

The Code of Federal Regulations is the codification of the general and permanent rules published in the Federal Register by the executive departments and agencies of the Federal Government.

Crew is two things. It is a schoolwide culture that supports social and emotional wellness, character development, and academic and life success for students and staff. It is also a unique and transformational meeting structure for secondary school advisories, elementary school morning and closing circles, and for staff collaboration. We Are Crew provides guidance for bringing Crew to your school or district and highlights numerous examples from successful schools that have used Crew to foster student and staff success for more than 25 years. We Are Crew is paired with an online toolkit of resources and a suite of open-source videos.

A Teamwork Approach to School Culture

The Federal Emergency Management Agency (FEMA) is responsible for coordinating the delivery of federal support to state, local, tribal, and territorial governments under Presidential emergency or major disaster declarations or to other federal agencies under the concept of federal-to-federal support. It is important to recognize that FEMA does not assume responsibility for local incident command activities but, instead, provides a structure for the command, control, and coordination of federal resources to states, local incident commands, and other end users. The FEMA Incident Management Handbook (IMH) is a tool to assist FEMA emergency management personnel in conducting their assigned missions in the field. The IMH provides information on FEMA's incident-level operating concepts, organizational structures, functions, position descriptions, and key assets and teams. The IMH is intended for use by FEMA personnel deployed at the incident level. However, the IMH also provides whole community stakeholders operating in a FEMA facility information about key incident-level FEMA functions. The concepts in the IMH are applicable to FEMA operations during Stafford Act-based Presidential declarations and non-Stafford Act incidents involving federal-to-federal support. The Lessons from Antigua can be a set of guidelines. They can encourage mutual respect, responsible action, and brotherly love among workers. They are taken from more than forty years of experience in the trades and my involvement in the United States Navy Seabees. The Lessons hold topics that can be talked about in a team setting. They include, but are not limited to, faith, fighting, freedom, and resolution. These topics are covered separately, at times together, and at times they overlap because life is like thatione part will overlap another. The purpose of Lessons from

Antigua is to raise awareness on how different thought patterns and approaches to managing men will be met with a defined outcome. It is not my intention to put down methods or management. They got us where we are today, and there are strong points in any or all methods. There are, however, areas in any style that can be improved, and that is where awareness is born. Neither is this an idealist approach to work, because some men need to be led with a stick or fear of punishment and some respond better to a carrot or a reward. A rare few just need a problem to solve to be motivated. The emotionally intelligent part is determining when carrots are needed and when to put the stick away, or how to use more carrots and less stick.
