Research should be enjoyable - whether it is a college student completing a project for a degree or a professor meeting requirements or expectations associated with his or her position. Learning the basics for conducting research is the first step. This text is a reader-friendly primer which has as its strength the facility to positively and gently ease the reader into the task of conducting research. Each chapter begins with a vignette, describing a hypothetical situation in which students might find themselves. By chapter's end, students should be equipped with the knowledge on how to address the confusion or problem presented in the appropriate scenario. Another pedagogical tool is the Methodological Link which refers to excerpts from actual criminal justice and criminological research, the full text which is available in a companion text Readings for Research Methods in Criminology and Criminal Justice. Each chapter also ends with Methodological Queries, questions and exercises requiring students to apply what has been learned. Uses practical examples from criminal justice scenarios to bring complex and involved issues to life Hypothetical scenarios at the beginning of each chapter Shows the relevance of research methodology to the practical problems of everyday criminal justice operations in a reader-friendly manner A criticism of these policies and recommendations for new strategies is presented. The final part of this report provides an analysis of the kinds of problems often encountered in research and development. Three general types of criminal justice research and development are discussed: technology (e.g., hardware) research, research on problems of criminal justice organizations (e.g., arrest, prosecution, sentencing, and parole), and research on new criminal justice problems. For each type of research and development, the relevant issues and recommendations are discussed. Most of these, however, still related to either the support or conduct of research and development. Ideal for undergraduate or graduate-level courses, Research Methods for Criminology and Criminal Justice, Fourth Edition introduces students to the functions of criminal justice research including basic ideas behind scientific theory, research language, and research design.

This book explains and illustrates criminal justice research topics, including ethics in research, research design, causation, operationalization of variables, sampling, methods of data collection (including surveys), reliance on existing data, validity, and reliability. For each approach, the book addresses the procedures and issues involved, the method's strengths and drawbacks, and examples of actual research using that method. Every section begins with a brief summary of the research method. Introductory essays set the stage for students regarding the who, what, when, where, and why of each research example, and relevant discussion questions and exercises direct students to focus on the important concepts. Research Methods for Criminal Justice and Criminology: A Text and Reader Features interesting and relevant articles from leading journals, which have been expertly edited to highlight research design issues. The text offers instructors a well-rounded and convenient collection that eliminates the need to sift through journals to find articles that illustrate important precepts. All articles are recent and address issues relevant to the field today, such as immigration and crime, security post-9/11, racial profiling, and selection bias in media coverage of crime. The book is an ideal companion to any traditional research methods textbook. It encourages classroom discussion and critical thinking and is an essential tool for undergraduate and graduate research methods courses in criminal justice, criminology, and related fields.

Student Research in Criminal Justice

An Introduction

Examines the links between criminological theory and criminal justice policy and practice.

Intended for federal, state, and local policymakers in the area of criminal justice research and development, this report includes guidelines for improvement of the quality, relevance, and utilization of research results. In order to cover these issues, part two of this report focuses respectively on the needs of research and development policymakers who fund criminal justice research and development, researchers who conduct research and development, and practitioners who put research and development results into use. Guidelines and principles are proposed which should assist policymakers at all levels of government. However, some topics tend to be addressed more to the federal level, where major research and development decisions are often made. The first chapter of this part presents a detailed discussion of institutional support for criminal justice research and development. It describes the federal role in supporting this effort, focusing on who the agencies are, the extent of their involvement, and how the principal agencies are organized to manage their research and development programs. Recommendations regarding the research and development management activities of criminal justice funding agencies are included. Several important issues in the conduct of criminal justice research and development are examined in the second chapter. Among the topics discussed are constraints on research, ethical issues, research designs and methodologies, prerequisites for sound planning and project selection, ways of maintaining the confidentiality of data, and ways of making data more easily available for research and statistical purposes. The final chapter of this section discusses research and development utilization practices and the assumptions underlying current policies in this area. A criticism of these policies and recommendations for new strategies is presented. The final part of this report provides an analysis of the kinds of problems often encountered in research and development. Three general types of criminal justice research and development are discussed: technology (e.g., hardware) research, research on problems of criminal justice organizations (e.g., arrest, prosecution, sentencing, and parole), and research on new criminal justice problems. For each type of research and development, the relevant issues and recommendations are discussed. Most of these, however, still related to either the support or conduct of research and development. The report also attempts to provide concrete illustrative examples by raising the relevant issues in the context of crime prevention at commercial and residential sites (technology research), sentencing (research on problems of criminal justice organizations), and problems of the victim (research on new criminal justice problems).

The SAGE Guide to Writing in Criminal Justice Research Methods equips students with transferable writing skills that can be applied across the field of criminal justice—both academically and professionally. Authors Jennifer M. Allen and Steven Houglund interweave professional and applied writing, academic writing, and information literacy, with the result being a stronger, more confident writer, researcher, and student in criminal justice. Focused on teaching students how to write in the academic setting while introducing them to a number of other writing tools specific to research methods, such as writing literature reviews, abstracts, proposals, and more. The perfect companion for any criminal justice research methods course, this brief text focuses on key topics that will benefit students in their classes and in the field.

Research Methods for Criminology and Criminal Justice, Third Edition introduces students to the functions of criminal justice research including scientific theory, research language, and research design. Ideal for the undergraduate or graduate level research methods courses, this Third Edition takes a clear and simple approach to social science research. This text makes learning research methods easy, understandable, and applicable to the criminal justice topics students are most interested in. Key Features: Contains expanded sections on quantitative research vs. qualitative research and mixed methods research, comparing in more detail the link between the two and the need for both Chapters are reorganized for a more reader-friendly format Provides updated case studies and exercises with real-world examples from recently published research Includes expanded discussion on special topics such as ethics, confidentiality, and the need for objectivity Includes end-of-chapter exercises with an applied approach

"This is a great text. It is comprehensive and easy to understand. The illustrations will enable students to learn and remember the information. This is the first research methods text I have read that is actually fun to read." —Tina L. Freiburger, University of Wisconsin-Milwaukee Research Methods in Criminal Justice and Criminology connects key concepts to real field research and practices using contemporary examples and recurring case studies that demonstrate how concepts relate to students' lives. Authors Callie M. Rennison and Timothy C. Hart introduce practical research strategies used in criminal justice to show students how a research question can become a policy that changes or influences criminal justice practices. The book's student-driven approach addresses both the why and the how as it covers the research process and focuses on the practical application of data collection and analysis. By demonstrating the variety of ways research can be used and reinforcing the need to discern quality research, the book prepares students to become critical consumers and ethical producers of research. Criminal Justice and Criminology Research Methods, Third Edition, is an accessible and engaging text that offers balanced coverage of a full range of contemporary research methods. Filled with gritty criminal justice and criminology examples including policing, corrections, evaluation research, forensics, feminist studies, juvenile justice, crime theory, and criminal justice theory, this new edition demonstrates how research is relevant to the field and what tools are needed to actually conduct that research. Kraska, Brent, and Neuman write in a pedagogically friendly style yet without sacrificing rigor, offering balanced coverage of qualitative, quantitative, and mixed methods. With its exploration of the thinking behind science and its cutting-edge content, the text goes beyond the nuts and bolts to teach students how to competently critique as well as create research-based knowledge. This book is suitable for undergraduate and early graduate students in US and global Criminology, Criminal Justice, and Justice Studies programs, as well as for senior scholars concerned with incorporating the latest mixed-methods approaches into their research.

Justice—a word of great simplicity and almost frightening scope. When we were invited to edit a volume on justice in law, we joked about the small topic we had been assigned. Often humor masks fear, and this was certainly one of those times.

Throughout the project, we found daunting the task of covering even a fraction of the topics that usually fall under the umbrella of justice research in law. Ultimately, the organization of the book emerged from the writing of it. Our introductory chapter provides a road map to how the topics weave together, but as is so often the case it was written last, not first. It was only when we had chapters in hand that we began to see how the many strands of justice research might be woven together. Chapters 2-4 on the basic forms of justice—procedural, retributive, and distributive—are the lynchpin of the volume; they provide the building blocks that permit us to think and write about each of the other substantive and applied chapters in terms of how they relate to the fundamental forms of justice. In the large central section of the volume (Chapters 5-9), the contributors address many ways in which the justice dimensions relate to one another. Most important for law is the relationship of perceptions of procedural justice and the two types of substantive justice—retributive and distributive.

How to think about, conduct, and evaluate research is fundamental to the study and understanding of criminology and criminal justice. Students take methods, statistics, theory, and topic-specific classes, but they struggle to integrate what they learn and to see how it fits within the broader field of criminology and criminal justice research. This book directly tackles this problem by helping students to develop a 'researcher sensibility', and demonstrates how the 'nuts and bolts' of criminal justice research - including research design, theory, data, and analysis - are and can be combined. Relying on numerous real-world examples and illustrations, this book reveals how anyone can 'think like a researcher'. It reveals, too, why that ability is critical for being a savvy producer or consumer of criminological and criminal justice research.

Research Methods for Criminal Justice and Criminology

Research Methods in Criminal Justice and Criminology is a core text for criminology and criminal justice research methods courses. It strives to offer a general foundation of knowledge that transcends particular topics or subject areas, allowing students to apply research methods and concepts to a multitude of scenarios. Even though the textbook has been written primarily for criminal justice and criminology majors, there is an underlying recognition that research methods and findings are common among all of the social sciences. This text has been designed to be user-friendly, even when dealing with some fairly complex statistical and theoretical concepts. The most critical points are clearly stated and illustrated with examples chosen to be interesting in their own right.

The study of research methodologies can be daunting to many students due to complex terminology, mathematical formulas, and lack of practical examples. Now in its second edition, Criminal Justice Research Methods: Theory and Practice offers a straightforward, easy-to-understand text that clarifies this complex subject matter, keeping perplexing research language and associated complexities to a minimum and ensuring that students get a practical grasp of this essential topic. The authors discuss scientific inquiry, establishing a framework for thinking about and understanding the nature of research. They examine various types of research methods in the broad categories of quantitative, qualitative, and evaluation designs and provide coverage of analytical and experimental research designs. The book also examines survey methods, survey instruments, and questionnaires, including wording, organization, and pretesting. It describes the fundamental characteristics of the qualitative approach, setting the stage for an in-depth discussion of the participant observation and case study methods of research. Other topics include ethical standards of conduct, topic selection, literature review, and guidelines for writing a research report or grand proposal. The second edition features updated examples, reworked exercises, additional discussion points, and new research-in-action sections. Defining a clear approach to the study of research, the book enables student experiencing their initial exposure to this subject to be fundamentally prepared to be proficient researchers in criminal justice and criminology.

We live in an era of mass mobility where governments remain committed to closing borders, engaging with securitisation discourses and restrictive immigration policies, which in turn nurture xenophobia and racism. It is within this wider context of social and political unrest that the contributors of this collection reflect on their experiences of conducting criminological research. This collection focuses on the challenges of doing research on the intersections between criminal justice and immigration control, choosing and changing methodologies while juggling the disciplinary and interdisciplinary requirements of the work's audience. From research design, to fieldwork to writing-up, this book captures every part of the research process, drawing on a range of topics such as migration control, immigrant detention and border policing. It also reflects on more neglected areas such as the interpersonal and institutional contexts of research and the ontological and epistemological assumptions embedded within data analysis methods. It makes a significant contribution to our understanding of the major developments in current research in this field, how and why they occur and with what consequences. This book seeks to shake off the phantom of undisturbed research settings by bringing to the fore the researchers' involvement in the research process and its products. An interdisciplinary collection, it can be used as a reference not just for those interested in the criminology of mobility but also as a learning tool for anyone conducting research on a highly charged topic in contemporary policy and politics.

Immerse your students in contemporary and classic scholarly research and readings from the major branches of the criminal justice system This text/reader is a comprehensive, cutting-edge overview of the main research methods used in the fields of criminology and criminal justice. Snapshots of Research offers a wide range of modern research examples, as well as several classic articles, including a broad range of readings from the four major branches of the criminal justice system—policing, courts/law, juvenile justice, and corrections—that are relevant to career paths students may be interested in pursuing.

This book contains the necessary information for college students to write successful research papers. Most research textbooks stop short at describing the step-by-step process of building and presenting research papers. This book does not. The textbook's design walks students through the logical process of building research papers and presenting research findings both orally and in writing. Topics include: APA Writing Guide and Paper Requirements The Purpose Statement Citing in APA Style What is a Scholarly Journal? The Literature Review Critical Thinking: Analysis, Synthesis, and Evaluation The Oral Presentation Completing the Paper The textbook serves as a primary textbook for courses involving research methods and paper writing or serves as an effective supplement to courses with major research paper components. The textbook contains several practical exercises and helpful tables as well.

This third edition is designed as an introduction to research methods in criminal justice techniques. The detailed information that is generated by research is a management tool that has become a significant part of criminal justice operations.

The text discusses the purposes, process, and uses of research that focus on identifying what information is already known about a particular topic or question. Ethical issues in criminal justice research are reviewed, as is investigating the validity and reliability of crime data sources. Also offered is an introduction to research design—the plan or blueprint for a complete research project. The principles of sampling are thoroughly discussed as is survey research, a common form of gathering information in the criminal justice setting. A review of the concept of scaling and some common methods of scale construction are introduced. Additional major topics include qualitative interviews and observational studies in qualitative research, as well as a wide variety of research techniques that comprise evaluation research. The definitions and examples provided in the book will help students and practitioners to both comprehend research articles and reports and to conduct their own research. Each of the authors brings specific areas of expertise to the text, and they are familiar with the research process and have worked together on several published studies. The text is designed primarily for persons with little or no research background and provides real-world examples and clear definitions of terms and concepts.

Fundamentals of Research in Criminology and Criminal Justice, Fourth Edition introduces students to the multifaceted subject of research methods and shows them why research is important in the field of criminology and criminal justice. This brief version of Ronet Bachman and Russell K. Schutt's successful textbook (The Practice of Research in Criminology and Criminal Justice) simplifies complex concepts with real-world research examples found in everyday experiences in the criminology and criminal justice professions. The thoroughly updated Fourth Edition of this bestseller reflects the most recent developments in research methods, including the use of big data, increased coverage of crime mapping, evidence-based and web-based research, along with the most current research examples impacting the field. This is an excellent introductory text for undergraduate research courses, and is ideal for students who want to understand how and why criminal justice research is done to become critical consumers of research.

The authors are proud sponsors of the 2020 SAGE Keith Roberts Teaching Innovations Award—enabling graduate students and early career faculty to attend the annual ASA pre-conference teaching and learning workshop. "Very practical approach to teaching research methods and very student friendly. This text "breathes life" into the research process. —Sherill Morris-Francis, Mississippi Valley State University The Practice of Research in Criminology and Criminal Justice, Seventh Edition demonstrates the vital role research plays in criminology and criminal justice by integrating in-depth, real-world case studies with a comprehensive discussion of research methods. By pairing research techniques with practical examples from the field, Ronet D. Bachman and Russell K. Schutt equip students to critically evaluate and confidently conduct research. The Seventh Edition of this best-selling text retains the strengths of previous editions while breaking ground with emergent research methods, enhanced tools for learning in the text and online, and contemporary, fascinating research findings. This edition incorporates new topics like intelligence-led policing, social network analysis (SNA), the evolution of cybercrime, and more. Students engage with the wide realm of research methods available to them, delve deeper into topics relevant to their field of study, and benefit from the wide variety of new exercises to help them practice as they learn. Give your students the SAGE edge! SAGE edge offers a robust online environment featuring an impressive array of free tools and resources for review, study, and further exploration, keeping both instructors and students on the cutting edge of teaching and learning. Statistics for Criminal Justice and Criminology in Practice and Research is an engaging and comprehensive introduction to the study of basic statistics for students pursuing careers as practitioners or researchers in both Criminal Justice and Criminology programs. This student-friendly text shows how to calculate a variety of descriptive and inferential statistics, recognize which statistics are appropriate for particular data analysis situations, and perform hypothesis tests using inferential statistics. But it is much more than a "cook book." It encourages readers to think critically about the strengths and limitations of the statistics they are calculating, as well as how they may be misapplied and misleading. Examples of statistics and statistical analyses are drawn from the worlds of the practitioner as well as the policymaker and researcher. Students will also gain a clear understanding of major ethical issues in conducting statistical analyses and reporting results, as well as insight into the realities of the life of researchers and practitioners as they use statistics and statistical analyses in their day-to-day activities.

This book of original essays presents students with challenging looks at some of the most basic, and sometimes most difficult, decisions faced by criminal justice researchers. Each chapter presents an overview of a foundational question/issue in the conduct of research, and discussions of the options to resolve these controversies.

The Encyclopedia of RESEARCH METHODS IN CRIMINOLOGY & CRIMINAL JUSTICE The most comprehensive reference work on research designs and methods in criminology and criminal justice This Encyclopedia of Research Methods in Criminology and Criminal Justice offers a comprehensive survey of research methodologies and statistical techniques that are popular in criminology and criminal justice systems across the globe. With contributions from leading scholars and practitioners in the field, it offers a clear insight into the techniques that are currently in use to answer the pressing questions in criminology and criminal justice. The Encyclopedia contains essential information from a diverse pool of authors about research designs grounded in both qualitative and quantitative approaches. It includes information on popular datasets and leading resources of government statistics. In addition, the contributors cover a wide range of topics such as: the most current research on the link between guns and crime, rational choice theory, and the use of technology like geospatial mapping as a crime reduction tool. This invaluable reference work: Offers a comprehensive survey of international research designs, methods, and statistical techniques Includes contributions from leading figures in the field Contains data on criminology and criminal justice from Cambridge to Chicago Presents information on capital punishment, domestic violence, crime science, and much more Helps us to better understand, explain, and prevent crime Written for undergraduate students, graduate students, and researchers, The Encyclopedia of Research Methods in Criminology and Criminal Justice is the first reference work of its kind to offer a comprehensive review of this important topic.

Key Ideas in Criminology and Criminal Justice is an innovative, fascinating treatment of some of the seminal theories in criminology and key policies in criminal justice, offering a detailed and nuanced picture of these core ideas. With a fluid, accessible, and lively writing style, this brief text is organized around major theories, ideas, and movements that mark a turning point in the field, and concludes with a discussion of the future of criminology and criminal justice. Readers will learn about the most salient criminological and criminal justice research and understand its influence on theory and policy. They will also understand the surrounding socio-political conditions from which the ideas sprang and the style and manner in which they were disseminated, both of which helped these scholarly contributions become cornerstones in the fields of criminology and criminal justice.

"This book explains and illustrates criminal justice research topics, including ethics in research, research design, causation, operationalization of variables, sampling, methods of data collection (including surveys), reliance on existing data, validity, and reliability. For each approach, the book addresses the procedures and issues involved, the method's strengths and drawbacks, and examples of actual research using that method. Every section begins with a brief summary of the research method. Introductory essays set the stage for students regarding the who, what, when, where, and why of each research example, and relevant discussion questions and exercises direct students to focus on the important concepts. Research Methods for Criminal Justice and Criminology: A Text and Reader features interesting and relevant articles from leading journals, which have been expertly edited to highlight research design issues. The text offers instructors a well-rounded and convenient collection that eliminates the need to sift through journals to find articles that illustrate important precepts. All articles are recent and address issues relevant to the field today, such as immigration and crime, security post-9/11, racial profiling, and selection bias in media coverage of crime. The book is an ideal companion to any traditional research methods textbook. It encourages classroom discussion and critical thinking and is an essential tool for undergraduate and graduate research methods courses in criminal justice, criminology, and related fields"--

A concise, streamlined paperback that reflects the latest developments from the field, BASICS OF RESEARCH METHODS FOR CRIMINAL JUSTICE AND CRIMINOLOGY, Fourth Edition combines accessibility and a conversational writing style with Michael G. Maxfield's expertise in criminology and criminal justice. In fewer than 400 pages, this popular, student-friendly text introduces students to the core of criminal justice research using the most current, real data available. It features coverage of such key topics as ethics, causation, validity, field research, and research design, among others.

The Fourth Edition includes expanded coverage of qualitative research and interviewing, focus groups in criminological research, and snowball sampling, as well as additional examples of student research. Balancing coverage of both qualitative and quantitative methods, the text is packed with real-world examples, practical applications, and Internet research exercises. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

This concise text introduces students to the fundamental methodologies of research in criminology and criminal justice, with an emphasis on the application of research methods directly relevant to the real world of criminal justice. By using storytelling that draws on actual field experiences to engage students' interest, Criminological and Criminal Justice Research Methods, Second Edition takes a unique approach compared to other textbooks on the market. Regardless of students' career goals, this text engages their interest while imparting current information on and approaches to the most important and useful criminological and criminal justice research methods. New to the Second Edition: Explanation of mixed-methods research Presentation of propensity score matching Discussion of the Philadelphia Birth Cohort Studies Introduction of the terms "legacy rape" and "revised rape" Updated discussion of computer-assisted personal (or programmed) interviewing (CAPI) and new discussion of Smart-Phone Based Surveys or Ecological Momentary Assessments (EMAs) Revised discussion of informed consent Updated scholarly references throughout (reflecting the latest studies) Greatly expanded presentation of types of qualitative studies Professors and students will benefit from: Text that engages students and makes material accessible through concise writing and structure A comprehensive, carefully sequenced approach to understanding, evaluating, and conducting criminological and criminal justice research Research methodology and skills that are made available and meaningful to those students intending to conduct their own research as well as to those seeking pragmatic, up-to-date knowledge of the developments in the field Emphasis on ethical methods and use of research An active exploration of the intersection of criminological theory and research methods Coverage of methodological failures as well as successes to stimulate student discussion and understanding of the topic's importance and nuances

This is a collection of articles on the practical uses of research methods in various criminal justice and criminology settings. This book will offer students a look at research methods by presenting cases where they are used in policing, sentencing, probation, crime etc. The chapters are contributed by criminal justice and criminology scholars from previously unpublished articles. Readings for Research Methods in Criminology and Criminal Justice is a collection of original articles. The diversity of the articles makes this book uniquely comprehensive, and appropriate as a standalone text or a companion book to another Research Methods textbook. Topics covered in this book include: Attitudes and perceptions Community policing Crime Cultural diversity training Data analyses Female offenders Offers a fresh insight into research methods by presenting cases in policing, sentencing, probation, and crime Connects theory with actual studies Illustrates a wide variety of research methodologies in an easily comprehensible manner

Most major crime in this country emanates from two major data sources. The FBI's Uniform Crime Reports has collected information on crimes known to the police and arrests from local and state jurisdictions throughout the country. The National Crime Victimization Survey, a general population survey designed to cover the extent, nature, and consequences of criminal victimization, has been conducted annually since the early 1970s. This workshop was designed to consider similarities and differences in the methodological problems encountered by the survey and criminal justice research communities and what might be the best focus for the research community. In addition to comparing and contrasting the methodological issues associated with self-report surveys and official records, the workshop explored methods for obtaining accurate self-reports on sensitive questions about crime events, estimating crime and victimization in rural counties and townships and developing unbiased prevalence and incidence rates for rate events among population subgroups.

This book is concerned to explore the changing role of the Parole Board across the range of its responsibilities, including the prediction of risk and deciding on the release (or continued detention) of the growing number of recalled prisoners and of those subject to indeterminate sentences. In doing so it aims to rectify the lack of attention that has been given by lawyers, academics and practitioners to back door sentencing (where the real length of a sentence is decided by those who take the decision to release) compared to front door sentencing' (decisions taken by judges or magistrates in court). Particular attention is given in this book to the important changes made to the role and working of the Parole Board as a result of the impact of the early release scheme of the Criminal Justice Act 2005, with the Parole Board now deciding in Panels concerned with determinate sentence prisoners, lifers and recalled prisoners. A wide range of significant issues, and case law, has arisen as a result of these changes, which the contributors to this book, leading authorities in the field, aim to explore. This pocket guide provides state-of-the-art techniques for researchers, graduate students, and agency administrators. Readers will encounter a wide range of study types and data sources, along with strengths and weaknesses to consider with each as they conceptualize, implement, and analyze their research.

INTRODUCTION TO CRIMINAL JUSTICE RESEARCH METHODS

Research Methods for Criminal Justice and Criminology 3e is about how to do research and investigate various types of research questions that arise in criminology and criminal justice. A complete discussion of research ethics—including ethical issues relating to the Nuremberg Code, research sponsorship, rights of human subjects and deception — helps readers understand their ethical responsibilities as researchers. This book explores the entire criminal justice and criminology research process from beginning to end including: sampling procedures; data collection techniques; measurement, validity and reliability issues; the role of ethics in the research process; and writing and documenting research papers. Presents a practical guide for conducting research in criminal justice and criminology careers.

"While written primarily for criminal justice and criminology students, the book offers a general foundation of knowledge that transcends particular topics or subject areas, allowing students to apply research methods and concepts to a multitude of scenarios"--

Like its predecessors, this Fifth Edition of The Practice of Research in Criminology and Criminal Justice (by Ronet Bachman and Russell K. Schutt) provides complete coverage of the use and results of the contemporary methods employed in criminology and criminal justice research today. Specifically designed for undergraduate and beginning graduate criminal justice courses and programs, this text teaches research design and techniques within the context of substantive criminology and criminal justice issues of interest to students who will become professionals in the field. Students learn about the wide realm of research methods available to them, delve deeper into topics relevant to their field of study, and benefit from the wide variety of exercises included in the text and on the student study website that help them practice as they learn.

Because of its eclectic nature, criminal justice can be a difficult discipline to research. This readable guide should help students through the maze of data. Choice Lutzker and Ferrall skillfully introduce the student, professor, or researcher to the sources in the field and suggest logical ways of approaching them when doing research. Criminal Justice Research in Libraries

Should prostitution be legalized? Are stalking laws effective? Is medical treatment a useful way to deal with criminal offenders? Are restorative justice processes too lenient toward offenders? These are some of the most hotly debated questions in the field of criminology, often sparking discomfort and anger among those who wish to know more about these issues. Now, Controversial Issues in Criminology attempts to provide factual information and a much-needed forum for discussion, utilizing a unique debate format to discuss controversial issues in the field of criminology. KEY TOPICS: Topics addressed in this book were chosen with a conscious effort to include those that are the most controversial. The contributing authors, each solicited because of their expertise in this area, come from a variety of backgrounds, academic disciplines and perspectives. In addition to such hot topics as prostitution, stalking, and the rehabilitation of criminals, the book also covers issues such as the "supersizing" of murder, government research on terrorism, stricter law enforcement for "techno-crimes," and the role of "community corrections." Law enforcement officers, corrections officers, educators, students of law enforcement, and anyone interested in issues of criminal justice and the correctional process.
