Examples & Explanations: Property, Sixth Edition, is a study aid that offers clear textual introductions to legal terms and concepts in property law, followed by examples and explanations that test and apply the reader's understanding of the material covered. Both authors have years of experience presenting material in a clear and compelling way. With its rich pedagogy that features boldfaced legal terms and visual aids, Examples & Explanations: Property, Sixth Edition, fills a niche that is distinct from other books. Using a six-part topical organization, accomplished authors Barlow Burke and Joseph Snoe ensure that the rules and doctrines making up the first-year course on the law of property are well covered. New to the Sixth Edition: Revised and rearranged coverage and examples to focus on major points and concepts and to clarify more obscure issues Simplified examples and questions to highlight the main issue A more structured development of Chain of Title problems inherent in recording systems An added discussion of Construction Industry of Sonoma County v. City of Petaluma in the exclusionary zoning section Incorporation of the Department of Justice's regulations and examples interpreting the Religious Land Use and Institutional Persons Act Expanded guidance on the Wireless Communication Facilities Act Reorganization of the chapter on Takings to emphasize how exceptions build on the Penn Central Transportation Co. v. New York City ad hoc factors Discussion on Muir v. Wisconsin in the Takings analysis (states' ability to conceptually merge parcels to defeat a Takings claim) Follow-ups on the effect (or lack thereof) of Stop the Beach Renourishment, Inc. v. Florida Dept. of Environmental Protection Brief discussion of Marvin M. Brandt Revocable Trust v. United States in easement chapter (whether a railroad abandoning a strip of land held an easement or a fee simple determinable) Clarification and expansion of the discussion of landlord-tenant issues

Students today expect learning to be both efficient and interesting. They use online materials and study aids to supplement class-assigned materials and to "hack" the law. This textbook cuts out the middle person by integrating challenging principal cases that are aggressively edited into an engaging overview of the black letter law. The explanatory sections describe the law through lively language and colorful examples that students can readily grasp and remember. Providing students with a clear doctrinal overview permits the selection of cases that drill down deeper into fundamental or cutting-edge issues. Many of the principal cases put the old wine of the criminal law into new bottles that students will find meaningful and interesting. In addition to homicide, rape, assault, traditional property crimes and drug offenses, the cases selected include environmental and white collar crime, obstruction of justice, criminal copyright infringement, hate crimes, sex trafficking, online threats, revenge porn and computer crimes. Short discussion questions follow each case that stimulate understanding of the holding and the deeper issues at stake. Additional materials raise important critical perspectives dealing with issues of race, class and gender. Practice problems and links to online video clips allow students to apply what they are learning, and the appendix contains numerous materials for engaging lawyering exercises.

In 1796, as revolutionary fervor waned and the Age of Reason took hold, an eighty-five-year-old Massachusetts doctor was convicted of bestiality and sentenced to hang. Three years later and seventy miles away, an eighty-three-year-old Connecticut farmer was convicted of the same crime and sentenced to the same punishment. Prior to these criminal trials, neither Massachusetts nor Connecticut had executed anyone for bestiality in over a century. Though there are no overt connections between the two episodes, the similarities of their particulars are strange and striking. Historians Doron S. Ben-Atar and Richard D. Brown delve into the specifics to determine what larger social, political, or religious forces could have compelled New England courts to condemn two octogenarians for sexual misbehavior typically associated with much younger men. The stories of John Farrell and Gideon Washburn are less about the two old men than New England officials who, riding the rough waves of modernity, returned to the severity of their ancestors. The political upheaval of the Revolution and the new republic created new kinds of cultural experience—both exciting and frightening—at a moment when New England farmers and village elites were contesting long-standing assumptions about divine creation and the social order. Ben-Atar and Brown offer a rare and vivid perspective on anxieties about sexual and social deviance in the early republic.

Criminal Law in Focus (CLIF) provides an updated approach to the first-year criminal law casebook, with coverage and pedagogy that reflects modern criminal law practice. Alongside the traditional justificatory theories of punishment, the book considers punishment as a tool for social control, the rise of mass incarceration, and racial disparities in criminal enforcement. Using compelling cases that clearly articulate legal doctrine, this book covers core traditional offenses (like homicide and rape), as well as those that figure prominently in modern practice, but which have historically been absent from or deemphasized in the criminal law curriculum (like drug possession and property crimes). The Real Life Applications feature following each case poses a series of questions to spotlight important topics that might otherwise be overlooked, such as prosecutorial discretion and plea bargaining. Straightforward exposition helps students navigate their way around the differences and tensions between jurisdictional approaches to defining crimes and defenses. Features: CLIF goes beyond the traditional coverage of most casebooks, (which focus primarily on homicide offenses, rape, and (to a lesser extent) theft crimes). With expanded coverage of property offenses, an entire chapter on drug offenses, and coverage of contemporary issues (such as child pornography offenses and the public authority defense), CLIF reflects a wider, more inclusive perspective on criminal law today. Most criminal law casebooks place extended coverage of the elements of crime (mens rea, actus reus, and causation) at the front of the book, before covering individual criminal offenses—which requires students to grapple with these concepts in the abstract. By contrast, CLIF provides a brief, early introduction to the elements of crime (which can be covered in one class); it then pivots to an integrated discussion of specific criminal offenses and covers principles related to mens rea, actus reus, and causation in the context of those offenses. Chapter 10 also covers the interpretation of criminal statutes. At 550 pages, CLIF is much shorter than most criminal law casebooks, even though it includes topics (e.g., drug crimes) that aren't covered in most criminal law casebooks. Professors and students will benefit from: Coverage of offenses that are either absent from, or deemphasized in, most other casebooks, CLIF helps professors to design a course that improves both bar-exam readiness and practice readiness. The inclusion of issues related to mass incarceration in the first chapter modernizes the traditional "purposes of punishment" material. CLIF retains coverage of justificatory theories of punishment, including the famous case of Dudley and Stephens; these theories aim to provide a morally defensible account of punishment and they are important. But they do not fully explain the reality of punishment in the United States today. By covering issues related to the rise of mass incarceration alongside the traditional theories of punishment, CLIF allows for a fuller discussion of the theory and reality of punishment. The book's innovative approach to covering the elements of crimes has a number of benefits. It is much more efficient, from a teaching perspective; it will afford professors time to cover other topics that they can't usually fit into the course (e.g., drug crimes and a more in-depth treatment of property offenses). Professors might spend 4 or 5 (or more) class sessions on the elements of crime before they can begin to cover individual offenses. This is not necessary: Most of these concepts are more effectively covered in the context of specific crimes (e.g., intent and mistakes of fact can both be introduced in the context of larceny; willful blindness can be addressed in the context of drug crimes). Then, after students have learned about these concepts in the context of individual offenses, the concepts can be tied together in 1 or 2 class sessions using the materials in Chapter 10. Covering difficult mens rea and actus reus concepts in depth before covering individual crimes (as most books do) often leaves students confused. They don't have enough context to appreciate how the difficult mens rea problems fit into criminal law doctrine, for example. The structure in CLIF teaches students the basics first. Once they have that foundation, they are better able to grapple with the more complex mens rea questions in Chapter 10. The traditional approach can be frustrating for faculty, as well. It is a bit like trying to teach someone about the broad structure of mathematics before they have learned basic arithmetic. The approach in CLIF more accurately reflects criminal law practice. In a real-world case, the prosecutor and defense do not argue about mens rea or actus reus in the abstract. Instead, the parties are focused on the elements of the specific crime(s) at issue. When difficult mens rea or actus reus questions arise in practice, it is in the context of the elements of a particular crime.
