Seven months ago, Captain Jean-Luc Picard and the USS Enterprise rescued a Federation cargo ship and a Romulan Warbird, both drained of power by an unknown source and mysteriously trapped together in the Neutral Zone. Five months ago, the captain of the USS Exeter launched a log buoy from her helpless ship, reporting it adrift and without energy for reasons she is unable to explain. Now, a power plant on Mars has gone down, leaving tens of millions in the dark. Reports of remote outposts losing power, ships stranded in space, and unexplained dead zones throughout the United Federation of Planets are beginning to cause a general panic. But Starfleet sends Picard and the Enterprise to Romulan space with orders to enter as covertly as possible and rendezvous with a high-ranking Romulan named T Sarrt. An infamous war criminal and a cold-blooded killer, T Sarrt's expertise runs from biological warfare to high-tech weaponry. Now he claims he is planning to defect - but even though the rendezvous was arranged with Vulcan Ambassador Spock's authentication codes, no contact with the Ambassador himself can be established. Sabotaging the project of his one-time protege, T Sarrt arranges the destruction of a Romulan warbird - the distraction for his pickup - with disturbing ease. But T Sarrt insists he is trying to save the universe, not destroy it - and the Federation may have no choice but to take him at his word.

In a distant region of the galaxy, Picard and his treacherous Romulan allies discover the source of the subspace crisis, a huge alien mechanism suspended between a black hole and a nearby inhabited planet, and Picard finds himself confronted with a difficult choice sacrificing a world and saving the rest of the universe from the device's cataclysmic impact. "Ecology, Cosmos, and Consciousness is a pioneering work that attempts to shift current paradigms. Its editor and lead author, Mark A. Schroll, incisively identifies the problems humanity faces as a result of philosophies, sciences, and religious movements that ignore the importance of an earth-based focus of humanistic and transpersonal oriented approach to cultural theory that is both provocative and well-argued, both visionary and practical, both scholarly and whimsical."

A novel based upon the explosive Star Trek TV series! The U.S.S. Discovery's specialy is using its spore-based hub drive to jump great distances faster than any warp-faring vessel in Starfleet. To do this, Lieutenant Paul Stamets navigates the ship through the recently revealed mycelial network, a subspace domain Discovery can briefly transit but in which it cannot remain. After responding to a startling distress call originating from within the network, the Discovery crew find themselves trapped in an inescapable realm where they will surely perish unless their missing mycelial fuel is found or restored. Is the seemingly human man found alone and alive inside the network the Starfleet officer he claims to be, or an impostor created by alien intruders who hope to extract themselves from the mycelial plane at the expense of all lives aboard Discovery?

National Book Award Finalist: “This man’s ideas may be the most influential, not to say controversial, of the second half of the twentieth century.”—Columbus Dispatch At the heart of this classic, seminal book is Julian Jaynes’s still-controversial thesis that human consciousness did not begin far back in animal evolution but instead is a learned process that came about only three thousand years ago and is still developing. The implications of this revolutionary scientific paradigm extend into virtually every aspect of our psychology, our history and culture, our religion—and indeed our future. “Don’t be put off by the academic title of Julian Jaynes’s The Origin of Consciousness in the Breakdown of the Bicameral Mind. Its prose is always lucid and often lyrical...he unfolds his case with the utmost intellectual rigor.”—The New York Times “When Julian Jaynes . . . speculates that until late in the twentieth millennium BC men had no consciousness but were automatically obeying the voices of the gods, we are astounded but compelled to follow this remarkable thesis.”—John Updike, The New Yorker “He is as startling as Freud was in The Interpretation of Dreams, and Jaynes is equally as adept at forcing a new view of known human behavior.”—American Journal of Psychiatry

To the mentality that assumes, more or less consciously, that we must of necessity find a solution to every problem, belongs the argument based on the disastrous consequences of a thing. Take any book of apologetics-that is to say, of theological advocacy-and you will see how many times you will meet with this phrase-"the disastrous consequences of this doctrine." Now the disastrous consequences of a doctrine prove at most that the doctrine is disastrous, but not that it is false, for there is no proof that the true is necessarily that which suits us best. -from "The Rationalist Dissolution" This is the masterpiece of Miguel de Unamuno, a member of the group of Spanish intellectuals and philosophers known as the "Generation of '98," and a writer whose work dramatically influenced a wide range of 20th-century literature. His down-to-earth demeanor and no-nonsense outlook makes this 1921 book a favorite of intellectuals to this day, a practical, sensible discussion of the war between faith and reason that consumed the twentieth century and continues to rage in the twenty-first century. de

Unamuno's philosophy is not the stuff of a rarefied realm but an integral part of fleshly, sensual life, metaphysics that speaks to daily living and the real world.

More than four hundred men and women serve aboard the USS Enterprise. While we are very familiar with Kirk and Spock, what do we know of those who live, and sometimes die, under their command? These are the best of the Federation, men and women of exceptional courage and skill. But not all of them can be trusted. Lieutenant Jon Anderson is the newest security officer aboard the Enterprise, joining the crew at a time of mounting tension between the Federation and the Klingon Empire. Previous battles have been inconclusive, but Starfleet Command fears that the Klingons are gearing up for a major offensive, and the Enterprise would be on the front line of an all-out interstellar war. Lt Anderson, however, has a secret: he is a Klingon infiltrator, assigned to sabotage Starfleet from within. His first mission: kill Captain James T Kirk.

A Trek From Science Fiction To Science Fact

The U.S.S. Enterprise, investigating why science outpost Zeta Gibraltar is not responding to Federation messages, discovers signs of a violent firefight, but there are no bodies and all of the station personnel are missing.

Over five decades, Star Trek's celebration of mankind's technical achievements and positive view of the future have earned it an enduring place in our global culture. Its scientific vision has also had a profound effect on the past thirty years of technological breakthroughs. Join William Shatner, the original captain of the Starship Enterprise, as he reveals how Star Trek has influenced and inspired some of our greatest scientific minds -- the people behind the future we will all share. In interviews with dozens of scientists we learn about the inventions that will revolutionise our lives and the discoveries that will make it truly possible to explore the last great frontier -- space. As one Nobel Laureate commented on being shown a wood and plastic model of the engine core from a Star Trek: The Next Generation starship: "I'm working on that." From the technicalities of warp speed to real-life replicators to the likelihood of our being able to beam across continents, this always-informative book takes us on a fascinating and eye-opening voyage to the realms of the possible and probable.

Teaching in Times of Crisis explores how comparative methods, which are instrumental in reading and teaching works of literature from around the world, also provide us with tools to dissect and engage the moments of crises that permeate our contemporary political realities. The book is written in the form of a series of classroom reflections—or memos—capturing the political environment preceding and proceeding the 2016 US presidential election. It examines the ways in which the ethics involved in reading comparatively can be employed by teachers and students alike to map and foster "lifelines for cultural sustainability" (to borrow the term from Djelal Kadir ' s Memos from the Besieged City) that are essential for creating and maintaining a healthy multicultural society. Nyawalo achieves this through comparative readings of postcolonial films, LGBTQ texts, French slam poetry, as well as episodes from Star Trek: The Next Generation, among other materials. The classroom reflections captured in each memo are shaped by the Appalachian setting in which the discussions and lessons took place. Inspired by this setting, the author develops pedagogic ethics of comparison—a method of reading comparatively—which privileges the local educational spaces in which students find themselves by mapping the contested cultural politics of Appalachian realities onto a world literature curriculum.

A thrilling Star Trek novel starring Kirk, Spock, and the crew of the Enterprise. While exploring the unmapped frontier, the U.S.S. Enterprise responds to a distress call from an unknown ship. Berlis, colony leader of a telepathic race calling themselves the Isitri, claims not to know why those from his homeworld want him dead.

Now Kirk must either find a way to wrench billions from the grip of one man, or be responsible for the destruction of two planets.
