In 1953, 27-year-old Henry Gustave Molaison underwent an experimental "psychosurgical" procedure -- a targeted lobotomy -- in an effort to alleviate his debilitating epilepsy. The outcome was unexpected -- when Henry awoke, he could no longer form new memories, and for the rest of his life would be trapped in the moment. But Henry's tragedy would prove a gift to humanity. As renowned neuroscientist Suzanne Corkin explains in Permanent Present Tense, she and her colleagues brought to light the sharp contrast between Henry's crippling memory impairment and his preserved intellect. This new insight that the capacity for remembering is housed in a specific brain area revolutionized the science of memory. The case of Henry -- known only by his initials H. M. until his death in 2008 -- stands as one of the most consequential and widely referenced in the spiraling field of neuroscience. Corkin and her collaborators worked closely with Henry for nearly fifty years, and in Permanent Present Tense she tells the incredible story of the life and legacy of this intelligent, quiet, and remarkably good-humored man. Henry never remembered Corkin from one meeting to the next and had only a dim conception of the importance of the work they were doing together, yet he was consistently happy to see her and always willing to participate in her research. His case afforded untold advances in the study of memory, including the discovery that even profound amnesia spares some kinds of learning, and that different memory processes are localized to separate circuits in the human brain. Henry taught us that learning can occur without conscious awareness, that short-term and long-term memory are distinct capacities, and that the effects of aging-related disease are detectable in an already damaged brain. Undergirded by rich details about the functions of the human brain, Permanent Present Tense pulls back the curtain on the man whose misfortune propelled a half-century of exciting research. With great clarity, sensitivity, and grace, Corkin brings readers to the cutting edge of neuroscience in this deeply felt elegy for her patient and friend.

Miyamoto Musashi (1584–1645) is the most famous Samurai who ever lived. His magnum opus, the Go-Rin-Sho or Book of Five Rings is a classic that is still read by tens of thousands of people each year—Japanese and foreigners alike. Alex Bennett's groundbreaking new translation of The Book of Five Rings reveals the true meaning of this text for the first time. Like Sun Tzu's The Art of War, Musashi's book offers unique insights, not just for warriors, but for anyone wanting to apply the Zen Buddhist principle of awareness to achieve success in their endeavors. This book sheds new light on Japanese history and on the philosophical meaning of Bushido—the ancient "code of the Japanese warrior." Unlike other translations that are based on incomplete and inaccurate versions of Musashi's work, Bennett's is the first to be based on a careful reconstruction of the long-lost original manuscript. Capturing the subtle nuances of the original Japanese classic, the result is a far more accurate and meaningful English version of The Book of Five Rings text. Richly annotated and with an extensive introduction to Musashi's life, this version includes a collection of his other writings—translated into English for the first time. A respected scholar, as well as a skilled martial artist, Bennett's understanding of Musashi's life and work is unparalleled. This book will be widely read by students of Japanese culture, history, military strategy, and martial arts. It sets a new standard against which all other translations will be measured.

When God thought peaceful, He thought of Union Crossing, a mining community nestled in the foothills of central Pennsylvania. The township was made up of God-fearing people, comprised mostly of mining families deeply rooted in the Catholic faith. Really nothing much in the way of crime ever happened in the area; the last major event was about five years ago, when Mrs. Roberts caught Mr. Roberts in a compromising position with Mrs. Cravens. Mrs. Roberts was acquitted! Now things were different, a man of the cloth had been murdered. It was becoming apparent to Chief Clarence Ralston and Detective Jeb Spaldmg that a killer had decided to cleanse the Catholic Church without Gods help. On his own, the killer would strike terror into the hearts of the entire brotherhood; his modus operandi was simple...choose this day that clergy who had brought reproach upon the church. Then, with a hunters instinct, patience, cunning, and precision make the kill. The killers choice of weapon would be the crossbow! It was up to the killer to set the metes and bounds for the hunt. The territory would be huge, ranging from Pennsylvania to the Vatican. When Ralston and Spalding started their investigation, The

Hunter was ahead on two counts; he knew the church and how to use the crossbow with deadly accuracy!

Zeus has punished his son Apollo--god of the sun, music, archery, poetry, and more--by casting him down to earth in the form of a gawky, acne-covered sixteen-year-old mortal named Lester. The only way Apollo can reclaim his rightful place on Mount Olympus is by restoring several Oracles that have gone dark. What is affecting the Oracles, and how can Apollo/Lester do anything about them without his powers? After experiencing a series of dangerous--and frankly, humiliating--trials at Camp Half-Blood, Lester must now leave the relative safety of the demigod training ground and embark on a hair-raising journey across North America. Somewhere in the American Midwest, he and his companions must find the most dangerous Oracle from ancient times: a haunted cave that may hold answers for Apollo in his quest to become a god again--if it doesn't kill him or drive him insane first. Standing in Apollo's way is the second member of the evil Triumvirate, a Roman emperor whose love of bloodshed and spectacle makes even Nero look tame. To survive the encounter, Apollo will need the help of son of Hephaestus Leo Valdez, the now-mortal sorceress Calypso, the bronze dragon Festus, and other unexpected allies--some familiar, some new--from the world of demigods. Come along for what promises to be a harrowing, hilarious, and haiku-filled ride. . . . Includes the first chapter of The Trials of Apollo Book 3: THE BURNING MAZE, plus the first chapters of two Rick Riordan Presents novels: THE STORM RUNNER by J. C. Cervantes, based on Mayan mythology, and DRAGON PEARL by Yoon Ha Lee, a space opera with elements of Korean mythology. As sports have become more competitive over recent years researchers and trainers have been searching for new and innovative ways of improving performance. Ironically, an area as mundane as what an athlete eats can have profound effects on fitness, health and ultimately, performance in competition. Sports have also gained widespread acceptance in the therapeutic management of athletes with disorders associated with nutritional status. In addition, exercise has been one of the tools used for studying the control of metabolism, creating a wealth of scientific information that needs to be placed in the context of sports medicine and science. Nutrition in Sport provides an exhaustive review of the biochemistry and physiology of eating. The text is divided into three sections and commences with a discussion of the essential elements of diet, including sections on carbohydrates, proteins, fats, vitamins and trace elements, and drugs associated with nutrition. It also discusses athletes requiring special consideration, including vegetarians and diabetics. The second section considers the practical aspects of sports nutrition and discusses weight control (essential for sports with weight categories and athletes with eating disorders), the travelling athlete (where travel either disrupts established feeding patterns or introduces new hazards), environmental aspects of nutrition (including altitude and heat), and the role of sports nutritional products.

Chinese Archery is a broad view of traditional archery in China as seen through the eyes of historians, philosophers, poets, artists, novelists and strategists from 1500 BC until the present century. The book is written around parallel text translations of classical chinese sources some famous and some little known in which Chinese writers give vivid and detailed explanations of the techniques of bow-building, archery and crossbow technique over the centuries. The author is both a sinologist and practising archer; his translations make the original Chinese texts accessible to the non-specialist. Written for readers who may never have picked up a book about China, but still containing a wealth of detail for Chinese scholars, the book brings the fascinating history of Chinese archery back to life through the voices of its most renowned practitioners.

The true account of the Nicholsons, the father and son who sold national secrets to Russia. “One of the strangest spy stories in American history” (Robert Lindsey, author of The Falcon and the Snowman). Investigative reporter and Pulitzer Prize–finalist Bryan Denson tells the riveting story of the father and son co-conspirators who betrayed the United States. Jim Nicholson was one of the CIA’s top veteran case officers. By day, he taught spycraft at the CIA’s clandestine training center, The Farm. By night, he was a minivan-driving single father racing home to have dinner with his kids. But Nicholson led a double life. For more than two years, he had met covertly with agents of Russia’s foreign intelligence service and turned over troves of classified documents. In 1997, Nicholson became the highest-ranking CIA officer ever convicted of espionage. But his duplicity didn’t stop there. While behind the bars of a federal prison, the former mole systematically groomed the one person he trusted most to serve as his stand-in: his youngest son, Nathan. When asked to smuggle messages out of prison to Russian contacts, Nathan saw an opportunity to be heroic and to make his father proud. “Filled with fascinating details of the cloak-and-dagger techniques of KGB and CIA operatives, double agents, and spy catchers . . . A poignant and painful tale of family love, loyalty, manipulation and betrayal.” —The Oregonian

The Manual of Tests and Criteria contains criteria, test methods and procedures to be used for classification of dangerous goods according to the provisions of Parts 2 and 3 of the United Nations Recommendations on the Transport of Dangerous Goods, Model Regulations, as well as of chemicals presenting physical hazards according to the Globally Harmonized System of Classification and Labelling of Chemicals (GHS). As a consequence, it supplements also national or international regulations which are derived from the United Nations Recommendations on the Transport of Dangerous Goods or the GHS. At its ninth session (7 December 2018), the Committee adopted a set of amendments to the sixth revised edition of the Manual as amended by Amendment 1. This seventh revised edition takes account of these amendments. In addition, noting that the work to facilitate the use of the Manual in the context of the GHS had been completed, the Committee considered that the reference to the "Recommendations on the Transport of Dangerous Goods" in the title of the Manual was no longer appropriate, and decided that from now on, the Manual should be entitled "Manual of Tests and Criteria".

History books sometime forget that the bloody and painful history of America begins here in Florida long before Jamestown and Plymouth were even thoughts. Florida is the location of the first American Thanksgiving, that was celebrated in 1564 with the landing of the French Protestant pilgrims as well as the first Christmas observance by Hernando de Soto and his army during their 1539 winter encampment. During this most early time in American history, the explorers were besieged with tropical diseases, poisonous snakes, alligators, pirates, starvation and even cannibalism. It is hard to find a more exciting story than that even in an adventure novel.
