them in the past few years, working on his own and practicing on the subway, using simple techniques and free online resources—and here he wants to show others what he's discovered. Starting with pronunciation, you'll learn how to rewire your ears and turn

foreign sounds into familiar sounds.

You'll retrain your tongue to produce those sounds

accurately, using tricks from opera singers and actors.

Next, you'll begin to tackle words, and connect sounds and spellings to imagery rather than

translations, which will enable you to think in a foreign language. And with the help of sophisticated spaced-repetition techniques, you'll be able to memorize hundreds of words a month in minutes every day.
