

Crowdfunding For Social Good Financing Your Mark On The World

THE GROUNDBREAKING NEW METHOD FOR RAISING VENTURE CAPITAL THROUGH SOCIAL NETWORKS “The declaration of independence for our industry!” —MAT DELLORSO, WealthForge Inc. “The Crowdfunding Revolution should be on the mandatory reading list for everybody active in the industry or for everyone who’s planning to be.” —CROWDFUND NEWS “Kevin Lawton and Dan Marom have done a great job. . . . A must-read for everybody entering the field of crowdfunding!” —GJSBERT KOREN, Smarter Money “We recommend this book highly to anyone who is fascinated by this new methodology for funding projects and endeavors. . . . A wonderful read.” —BRIAN MEECE, RocketHub “Read this book if you want to catch the next wave!” —FRED BRYANT, WealthForge Inc. “A must-read for anyone interested in the early stage funding process.” —MANDAR KULKARNI, pluggd.in “The Crowdfunding Revolution offers fundraising inspiration for small business owners and aspiring entrepreneurs.” —BUSINESS2COMMUNITY “The Crowdfunding Revolution offers fundraising inspiration for small business owners and aspiring entrepreneurs.” —SMALL BUSINESS TRENDS YOUR POOL OF INVESTORS JUST INCREASED BY 2 BILLION . . . Since the day the first human being approached a prospective investor, the province of capital allocation has been controlled by a small and entrenched minority. All this has changed. Now, the power of the Internet—particularly social media—enables anyone to connect with more investors in less time than it used to take to connect with one. The investing pool is open, everyone is in—and The Crowdfunding Revolution shows how to get to the forefront of the new world of venture financing. This groundbreaking guide explains how the explosive growth of connectivity is obviating human-to-human networks and centralized planning of capital allocation—and describes how crowdfunding can be used to tap into a “collective intelligence” for far superior results. Providing a wealth of information that will make your crowdfunding efforts more efficient and productive, the book is organized into three thematic sections: THE ROAD HERE: A thorough overview of what crowdfunding is—and how and why this radical new approach is replacing traditional means of venture financing THE CROWDFUNDING CAMPAIGN: Proven methods for marketing to the crowd, setting clear objectives, building a crowdfunding team, and communicating in a way that inspires action THE ROAD AHEAD: The crowdfunding ecosystem, intellectual property issues, mining collective IQ, new investment models, and regulations More than 2 billion people globally are now active online—and that number is guaranteed to grow at an extraordinary rate. The Crowdfunding Revolution explains all the ins and outs of raising investment capital by using social media and new technologies to draw small sums of money from an almost countless number of sources. Organic. Transparent. Decentralized. This is crowdfunding. This is the future. Read The Crowdfunding Revolution and become the first expert in your crowd on this radical new approach poised to supplant age-old venture financing methods.

Paired with Crowdfunding for Social Good this workbook will help you plan your next crowdfunding campaign, to raise more money for doing good! You will learn: -Three different types of crowdfunding -How to plan and prepare to raise more money -To assess your cause’s potential for funding -Step by step plans for your campaign -Social media strategy -How to raise 30 percent of your goal on the first day -How to make a compelling video -To write compelling fundraising emails -How to have a party that launches the campaign’s success -To use investment crowdfunding This workbook paired with Crowdfunding for Social Good will help you raise money via crowdfunding. Remember, even though crowdfunding is not a complete development plan, no development plan is complete without it. Champion of Social Good Author, Devin Thorpe was a finance guy until he realized life wasn’t all about the money. As a new-media journalist and founder of the Your Mark on the World Center, Devin has been recognized internationally as a crowdfunding thought leader. As a Forbes contributor, with 400 bylines and over one million unique visitors, he has become a recognized name in the social impact arena. His YouTube show, Your Mark on the World, featuring over 800 celebrities, CEOs, billionaires, entrepreneurs and others who are out to change the world, features frequent crowdfunding guests. Praise for Devin’s training. “Personally, I appreciated your expertise, humor, down-to-earth approach, focus on helping participants understand the basic concepts, and giving attendees the tools to be successful with their own crowdfunding efforts.” Chris Bray, CEO of Utah Nonprofits Association “Devin’s speech, followed by his panel discussion on Crowdfunding for Social Good was one of the absolute highlights of the Crowd Invest Summit West 2016 and was praised by attendees and sponsors alike. Devin knows how to work a room and deliver high-quality content.” Josef Holm “Great to be here!! You were awesome as usual!” Joy Case “@devindthorpe THANK YOU! You are a big part of #CIS16 success & LOVED your presentation! I WILL CHANGE THE WORLD!” Alon Goren

Your Mark On The World combines inspiring stories of ordinary people doing remarkable things to make the world a better place with practical advice to empower anyone to give more to a cause (charity, non-profit or social venture) without giving up a career or family. The inspiring stories include: Botevy’s life and death struggle through Pol Pot’s killing fields that led her ultimately to create an orphanage in Phnom Penh. Rick’s personal crusade to cure cystic fibrosis to ensure that his two afflicted grandchildren will attend his funeral and not the other way around. The eight-member Smith family’s world service tour. David’s decision to walk away from a successful career as an international executive to volunteer to care for victims of leprosy in rural India. These stories are combined with practical financial advice to empower you to give more to a cause without giving up your family or your career. The book answers your questions: How do I get out of debt and stay out of debt? Which charity or cause do I choose to make my donation? How do I decide where to volunteer? How can our family plan a volunteer vacation? How much should I contribute to my 401k? Can I use Mint to manage my budget? How to retire early enough to devote healthy years to volunteering? This must-read book provides an overview of philanthropy in America and around the world, providing you with a clear picture of charity and its fruits.

Crypto-Finance, Law and Regulation investigates whether crypto-finance will cause a paradigm shift in regulation from a centralised model to a model based on distributed consensus. This book explores the emergence of a decentralised and disintermediated crypto-market and investigates the way in which it can transform the financial markets. It examines three components of the financial market – technology, finance, and the law – and shows how their interrelationship dictates the structure of a crypto-market. It focuses on regulators’ enforcement policies and their jurisdiction over crypto-finance operators and participants. The book also discusses the latest developments in crypto-finance, and the advantages and disadvantages of crypto-currency as an alternative payment product. It also investigates how such a decentralised crypto-finance system can provide access to finance, promote a shared economy, and allow access to justice. By exploring the law, regulation and governance of crypto-finance from a national, regional and global viewpoint, the book provides a fascinating and comprehensive overview of this important topic and will appeal to students, scholars and practitioners interested in regulation, finance and the law.

Routledge Handbook of Social and Sustainable Finance

The Crowdfunding Revolution: How to Raise Venture Capital Using Social Media

Entrepreneurial Finance, Innovation and Development

Growing numbers of employees, consumers, and investors want companies to be truly good; these stakeholders will accept lower economic returns in order to support companies that prioritize sustainability, fair wages, and fair trade. Unlike charities or non-profit organizations, such companies - or social enterprises - are not only permitted but also expected to produce an economic return for investors. Yet, unlike traditional business ventures, social enterprises have no obligation to maximize profits, even on a long-term basis. In this comprehensive volume, Benjamin Means and Joseph W. Yockey bring together leading legal scholars and practitioners to offer an authoritative guide to social enterprise law and policy. The Cambridge Handbook of Social Enterprise Law takes stock of the field and charts a course for its future development. It should be read by entrepreneurs, investors, practitioners, academics, students and anyone else interested in how companies are evolving to address new demands for capitalism with a conscience.

'Social Finance' brings together rapid advances in what used to be called socially responsible investment. For example, finance for green businesses, and to support economic development both in deprived areas and developing countries.

This exciting new addition to Palgrave Studies in Islamic Banking, Finance, and Economics argues that social capital can facilitate rule-compliance and co-operation in the sharing of risk in financial and economic activities.

Many institutions facing dwindling state and government funding often rely on the patronage of others in order to establish monetary security. These donations assist in the overall success and development of the institution, as well as the students who attend. Facilitating Higher Education Growth through Fundraising and Philanthropy explores current and emergent approaches in the financial development and sustainability of higher education institutions through altruistic actions and financial assistance. Featuring global perspectives on the economics of philanthropy in educational settings and subsequent growth and development within these environments, this book is an exhaustive reference source for professors, researchers, educational administrators, and politicians interested in the effects of altruism on colleges and universities.

A groundbreaking book on the growing trend of crowdfunding Crowdfunding has gained considerable traction over the last few years. By combining the Internet/social media with equity-based financing, it is poised to usher in a new asset class that will change how early stage and small business financing transactions are consummated. Author Steven Dresner, Founder and CEO of Dealflow.com, understands the nuances of how crowdfunding can help companies gain much needed access to capital, and now he shares those insights with you. Engaging and informative, this book will serve the needs of a global audience comprising entrepreneurs, financiers, and other professionals. It skillfully addresses the market dynamics that are catapulting crowdfunding into the mainstream and explores essential issues ranging from planning an online campaign, post-transaction management, and business planning to securities law and tax issues.

Puts the business of crowdfunding in perspective with a look at the current marketplace, overview of important data, and legitimate concerns Examines effective techniques for communicating with the crowd Details equity-based financing and other sources such as debt instruments Contains contributions from a wide array of individuals involved in the worlds of finance, law and accounting, social media, marketing, as well as DealFlow Media’s own staff Crowdfunding affords-start ups and other smaller businesses better access to capital via the Internet/social media. It also allows an investor of any size to back a business of their choosing. This new book will show you what this process entails and how it can benefit everyone involved.

There are many studies confirming the relationship between financial systems and economic development, but there are few which examine the degree to which financial systems a) impact the quality of information, b) influence sound corporate governance, c) ensure effective mechanisms of risk management, d) mobilize savings and f) facilitate trade. In the context of sustainability, there should also be a line of inquiry into how a particular financial system influences the assurance and implementation of sustainable development principles and goals. This book delivers a methodological approach to designing and assessing sustainable financial systems. It provides an original contribution by prioritizing ESG factors in the decision-making process of financial institutions and identifying their impact on sustainable financial systems. The author argues that to achieve financial stability, it is necessary to have in place mechanisms designed to prevent financial problems from becoming systemic and/or threatening the stability of the financial and economic system, while maintaining (or not undermining) the economy’s ability to sustain growth and perform its other functions. The book primarily takes a simulation and experimental approach. It is the first book to take such a comprehensive look at sustainable financial systems as opposed to sustainable finance in general. It will appeal to academics, students and researchers in the fields of economics, finance and banking, business, management and political and social sciences.

As a result of the recent financial crisis, new ways of doing finance have developed, creating alternatives to the regular financial system. This book explores non-conventional banking and financing mechanisms in detail, with case studies and examples in which these alternative methods have succeeded.

This book sheds light on current issues in sustainable finance through an in-depth analysis and discussion of relevant sustainable products and sustainable initiatives of several financial institutions. This edited collection critically presents and discusses several relevant theoretical issues, case studies of innovative financial products and sustainable institutions, as well as empirically investigates issues related to both financial and social performance. The book focuses on several innovative products across the sustainable finance ecosystem, including social impact bonds, crowdfunding and green bonds. Similarly, the book spotlights the sustainable investment strategies of institutions ranging from family foundations to asset managers.

The Practice and Mindset

Managing the Creation of Social Value

Financing Your Mark on the World

The integration of technology into entrepreneurial initiatives has led to the use of online communities to raise funds for projects and ventures. Through the use of social media platforms and the social web, crowdfunding has provided an innovative, large-scale fundraising solution for both personal and professional initiatives. Strategic Approaches to Successful Crowdfunding brings together a collection of research-based chapters relating to the use of the social web to raise funds and provide financial support for start-up companies, individual pursuits, and philanthropic endeavors. Focusing on a diverse set of topics relating to e-commerce, capital investment, peer-to-peer lending, digital philanthropy, and virtual communities, this timely publication is an essential reference source for academicians, researchers, professionals, and graduate students interested in understanding the dynamics, best practices, and managerial solutions for drawing funds and financial support from online communities.

Crowdfunding: Fundamental Cases, Facts, and Insights presents fundamental knowledge about a maturing economic field. Assembling and arranging datasets, case analyses, and other foundational materials on subjects associated with crowdfunding, it systematically, comprehensively, and authoritatively provides access to a consistent body of crowdfunding research. With the crowdfunding industry now consolidated, this core reference can serve as the basis for research projects and applied work. **Acclaim for Crowdfunding** "This book provides insightful cases and statistics from around the world on how rewards and equity crowdfunding markets work. It also includes useful information on marketplace lending. It is a great resource for entrepreneurs and investors, as well as for policymakers, academics, and students." – Craig Asano, Founder and CEO, National Crowdfunding and Fintech Association "Crowdfunding offers detailed analyses of rewards and equity crowdfunding markets using statistical methods and case studies. I recommend it for academics, practitioners, and policymakers who seek a rigorous look at crowdfunding markets around the world." – Jay Ritter, Joseph B. Cordell Eminent Scholar Chair, Warrington College of Business, University of Florida Presents a complete scope of crowdfunding areas in the international landscape Combines economics with international business, management, law and finance Enables practitioners and researchers to compare regulatory frameworks, best practices and market opportunities Includes a freely available website of supplementary pedagogical material **This Palgrave Pivot aims to build a bridge between corporate social responsibility (CSR) and sustainable finance in financial markets. It investigates classic CSR topics in the light of a modern conception of sustainability. The first part emphasizes four relevant topics in the CSR panorama of financial institutions: banks remuneration practices; human capital disclosure; the impact of environmental performance on banks, and finally, the institutional investors’ attitude towards socially responsible investments (SRIs). The second part explores CSR practices within the financial markets and discusses risk-return profiles of SRI and non-SRI indexes in different time frames. It investigates whether thematic social responsible funds obtain different risk-return than traditional funds, and finally, assesses whether equity crowdfunding could foster social innovation. This book is aimed at scholars and students who are interested in social impact investing and practitioners involved in the social impact market.**

Smaller companies are abundant in the business realm and outnumber large companies by a wide margin. To maintain a competitive edge against other businesses, companies must ensure the most effective strategies and procedures are in place. This is particularly critical in smaller business environments that have fewer resources. Start-Ups and SMEs: Concepts, Methodologies, Tools, and Applications is a vital reference source that examines the strategies and concepts that will assist small and medium-sized enterprises to achieve competitiveness. It also explores the latest advances and developments for creating a system of shared values and beliefs in small business environments. Highlighting a range of topics such as entrepreneurship, innovative behavior, and organizational sustainability, this multi-volume book is ideally designed for entrepreneurs, business managers, executives, managing directors, academicians, business professionals, researchers, and graduate-level students.

Crowdfunding for Social GoodFinancing Your Mark on the WorldCreateSpace

An increase in the restrictions on the availability of funding for new and growing businesses in the aftermath of the global financial crisis has been accompanied by the emergence and growth of crowdfunding as an alternative method of raising capital. Crowdfunding contributes towards the disintermediation of the finance market as funders and promoters are brought together directly, democratising both fundraising by businesses and investment by individuals. This book extends entrepreneurial finance research to the study of crowdfunding. Contributions review the history, status and future of crowdfunding, analyse the patterns of fundraising, assess the potential of crowdfunding for the financing of social ventures in particular, and discuss the regulatory implications of recent developments. What is clear from this collection is that the crowdfunding space is still evolving, institutional forms are still developing as models are refined, new institutional collaborations (e.g. between equity platforms and business angel networks) are emerging, and new challenges, particularly regulatory challenges, are being encountered. While crowdfunding is not a universal solution for SME finance in a post-crisis financial landscape, it remains too early to determine whether crowdfunding represents a large-scale transformation of the early stage risk capital market or a minor addition to it. This book was originally published as a special issue of Venture Capital. **Routledge Handbook of Social and Sustainable Finance** brings together an international cast of leading authorities to map out and display the disparate voices, traditions and professional communities engaged in social finance activity. With a clear societal or environmental mission, foundations, individual and group investors, as well as public bodies around the world have become increasingly eager to finance and support innovative forms of doing business. Together, founders and established businesses alike are embracing new sustainable business models with a distinct stakeholder approach to tackle social or environmental problems in what they see as a failed economic system in crisis. As a result, the topic of social and sustainable finance is at the forefront of financial economic thought. This Handbook is divided up into three parts. The first, "The Landscape of Social and Sustainable Finance and Investments", comprises of chapters from a multitude of perspectives in an effort to grasp the entirety of the landscape. The second, "Challenges, Suggestions, Critiques and Debates", focuses on areas ranging from sociological underpinnings to critical takes on markets, and the identification of specialized business models. Amongst ethical considerations, topics include the scaling of impact, an analysis of sustainability as risk prevention and comparative analyses of various methods of justification and measurement. In the third and final section, "Markets and

Institutions", contributions range from various perspectives on sustainable banking to environmental marketplaces, and finally on to practical cases and country specific observations. This volume is essential reading for both academics and students in economics and finance. It is also of interest to those who study environmental economics, microeconomics and banking.

This volume presents selected articles from the 21st Eurasia Business and Economics Society (EBES) Conference, which was held in Budapest (Hungary) in 2017. The theoretical and empirical papers in this volume cover various areas of business, economics, and finance from a diverse range of regions. In particular, this volume focuses on the latest trends in consumer behavior, new questions in the development of organizational strategy, and the interaction of financial economics with industrial economics and policy.

Finance and Sustainable Development

Handbook of Research on Global Aspects of Sustainable Finance in Times of Crises

Advances in Crowdfunding

Start-Ups and SMEs: Concepts, Methodologies, Tools, and Applications

The severe consequences of the global financial crisis 2008-2009 and numerous accounting frauds and financial scandals over the last fifteen years have led to calls for more ethical and responsible actions in all economic activities including consumption, investing, governance and regulation. Despite the fact that ethics in business and corporate social responsibility rules have been adopted in various countries, more efforts have to be devoted to motivate and empower more actors to integrate ethical behavior and rules in making business and managerial decisions. The Research Handbook of Finance and Sustainability will provide the readers but particularly investors, managers, and policymakers with comprehensive coverage of the issues at the crossroads of finance, ethics and sustainable development as well as proposed solutions, while focusing on three different levels: corporations, investment funds, and financial markets.

Deep and intertwined in our humanity, is a need to support and feel involvement in the kinds of projects and companies which we care about. Until the recent crowdfunding phenomena emerged, our more centralized and intermediated capital formation and funding mechanisms scarcely recognized the social power of crowds which form affinities around any kind of mission. Crowdfunding is a natural systemic response to fill this gap, and an expression of our collective human will. It is perhaps, one of the most powerful developments in our modern-day socio-economics, and promises both to transform the capital formation landscape and to offer an avenue for a creative and intellectual re-birth. Whether funding sports-car racers, startup companies, indie movies, fashion, scientific research, or community projects -- crowdfunding is already well under way, changing not only the way that we fund efforts, but the way we interact and support them. It is in the most simplistic terms, social networking meets venture financing. And a number of people in venture financing are now getting involved it. There are now nearly 7 billion of us, with over 2 billion having Internet access. Never before has there been such potential to bridge the collective creative and productive capacity with capital and other resources which are required to translate that capacity into social and economic activities. Even as exciting, is that crowdfunding links funding with the social dynamics and affinity groups which naturally surround efforts that resonate with our many motivations. That alone, is enough to cause a monumental shift in the way business and organizations operate. This is a deep and broad look at the history of finance that got us here, the present day zeitgeist of crowdfunding and its associated social networking & group dynamics, and a visionary look into the future and greater empowerment of crowdfunding. Join us on this intellectual discovery. Be part of the Crowdfunding Revolution!

Entrepreneurship is now unanimously considered a major engine for socio-economic development, mainly because it creates jobs and innovation. Governments around the world pay special attention to removing entrepreneurial barriers in order to support development via different policies, especially entrepreneurial finance. Developing, emerging and transition economies (DETEs) significantly differ from industrialized countries because of their specific conditions: institutions, infrastructure facilities, and bureaucratic procedures within the administrative system. Thus, firms and their entrepreneurs in and from DETEs may behave differently, particularly in terms of their financial strategies. Therefore, contextualizing is critical to better understand the relationship between entrepreneurial finance, innovation, and development in DETEs. This book provides a systematic and profound understanding of how finance, entrepreneurship, innovation, and their interactions contribute to economic development in DETEs, which cover a large number of countries in Asia, Central and Eastern Europe, Latin America, and Africa. The book mainly includes empirical studies and is divided into four parts. Part A includes four chapters which adopt a multinational approach to examine different sources and types of finance for entrepreneurship and small business in different groups of countries classified as DETEs. Part B also includes four chapters and focuses on entrepreneurial finance in specific countries belonging to the DETEs. Part C goes beyond the business scope of entrepreneurial finance and includes three chapters concerned with the relationship between finance, women's entrepreneurship, and poverty. Part D includes three chapters focusing on the comparison within developing countries as well as between developing and developed countries. This essential and comprehensive resource will find an audience amongst academics, students, educators, and practitioners, as well as policymakers and regulators.

Social Finance is a rapidly advancing area of practice, policy and research, with alot of unanswered questions. What does it amount to? What is it to be 'social' in finance? How do you value assets that offer a social as well as a financial return? This book provides a collection of authoritative essays on these and related topics. The essays embrace the different manifestations of social finance, collate existing research, set out the controversies, offer theoretical insights, and advances, and draw together the ideas of the leading thinkers in the field. Contributors to this volume are leading exponents and practitioners of social finance and leading academics from the main relevant disciplines and fields of study. This book is the first serious and comprehensive treatment of social finance and as such, will be of interest to academics with research and teaching interests in finance, social enterprise/entrepreneurship, public policy, business economics and international development to name a few. If you want to understand and join in the academic and policy debates, or if you are working in one part of this field and want to understand how the landscape is being rapidly re-shaped, then this is an essential guidebook.

The Essentials of Social Finance

This open access book presents a comprehensive and up-to-date collection of knowledge on the state of crowdfunding research and practice. It considers crowdfunding models and their different manifestations across a variety of geographies and sectors, and explores the perspectives of fundraisers, backers, platforms, and regulators. Gathering insights from a wide range of influential researchers in the field, the book balances concepts, theory, and case studies. Going beyond previous research on crowdfunding, the contributors also investigate issues of community, sustainability, education, and ethics. A vital resource for anyone researching crowdfunding, this book offers readers a deep understanding of the characteristics, business models, user-relations, and behavioural patterns of crowdfunding.

This book provides a preliminary attempt to understand the impact investors' preferences and characteristics. It offers an empirical insight of the main features characterizing social risk of Social Impact Bonds (SIBs) and explores the correlation existing between social risk and financial return. It assesses case studies of social impact investment architectures and their legal and operational limits. It also analyzes new trends in social impact measurement, focusing on the Spanish and Swedish experiences. The book concludes with a road map of priorities and policy strategy for social impact investments development.

This volume presents theoretical and empirical research on universities and their entrepreneurial ecosystems to better grasp the connections between universities and their surrounding environments and their engagement with sustainability. The book provides a better understanding of the entrepreneurial characteristics of universities. It examines the ways in which universities' collaboration and participation in an ecosystem support business and industry transformation. It also investigates how universities function within the university/industry/government/third sector relationship nexus. The book enables the systematisation of the literature while simultaneously builds theory, empirically testing existing theories, and contributes towards a future research agenda geared towards sustainability. The book gathers contributions from varied geographical contexts providing an international perspective.

Crowdfunding for Social Good is both practical and inspiring, featuring the stories of real people who have successfully raised big money using crowdfunding and practical advice to help you do the same. Crowdfunding is the newest way for nonprofits and social entrepreneurs to raise money for their causes, projects and companies. By reading this book, you can join the thousands who have successfully raised money to change the world. Learn how to organize your friends, colleagues and volunteers to help you raise big money. Gain insight into creating a video that will help you spread your message via social media. Read how to start before you start so you can have 30% of your goal raised before you even launch your crowdfunding campaign. If the only thing preventing you from changing the world is the money you need to do it, you are out of excuses. You can raise the money you need to leave your mark on the world with Crowdfunding for Social Good.

Procurement Finance

This book presents a business model on how to structure the relationship between financial services and procurement. The need for new models is particularly important to support small and medium enterprises (SMEs) where there is an evident difficulty in accessing credit. Due to this context, innovative solutions must be introduced. The objective of this book is to determine how innovation can support the dynamic and volatile international context and the increasingly relevant function of procurement. It is becoming more and more important to take into account complex international transactions with notably long payment terms. Organizations need to manage the best way to handle the financial relationships and the risks related to credit provision and payments. This book presents an end-to-end support to procurement, including trade finance, supply chain finance, and related payments. In addition, the enterprises need to keep sufficient liquidity levels in the short and medium term. This is a constant challenge today, with the turbulence of financial markets and a continuing climate of economic uncertainty making it harder to obtain external funding. Businesses need to optimize the working capital. This can be done through the innovative concept of procurement finance, which allows SMEs to benefit by the new vision of collaborative procurement. This book provides several practical examples of advanced procurement finance solutions. It demonstrates how the use of process improvement and technology can help in overcoming the current financially difficult situation. In addition, based on the business model presented, the integrated approach to procurement finance allows sustainable solutions which will be of interest to academics, researchers, managers, and practitioners in both buyer and vendor companies, as well as in banks and other financial institutions.

Through a thorough analysis of emerging legal and regulatory issues in Islamic finance law and practice in Malaysia, this exciting new study covers issues such as blockchain technology, anti-money laundering, and FinTech in Islamic finance.

Sustainable finance has been one of the emerging areas of finance in the last decade. With its emphasis on any form of financial services that take environmental, social and governance (ESG) considerations into account in decision-making processes, it can help to improve social well-being, preserve the ecosystems and promote sustainable economic development. Furthermore, it can contribute to economic and financial resilience, along with enabling sustainable recovery against crises arising from physical or financial shocks. The Handbook of Research on Global Aspects of Sustainable Finance in Times of Crises discusses theory and concepts, focuses on practices and strategies, addresses the recent challenges and trends, and presents future prospects regarding sustainable finance. It provides a global look at sustainable finance in a variety of contexts, along with highlighting contemporary issues in light of crises such as the climate emergency and the COVID-19 pandemic. Covering a wide range of topics such as climate finance, green finance, social finance, ESG investing and responsible banking, the book is ideal for corporate managers, portfolio managers, investors, financial analysts, researchers, academicians, students and policymakers.

Social entrepreneurship differs from traditional forms of entrepreneurship in that the primary goal of the social venture is to address social problems and needs that are as yet unmet. The driving force of such ventures is social value creation. This new textbook aims to provide a comprehensive, cutting edge resource for students, introducing them to the unique concerns and challenges that face social ventures through a comparison with the principles of traditional entrepreneurship. The book consists of fourteen chapters covering all aspects of venture creation and management—from writing a business plan, to financing, people management, marketing, and social impact measurement. Social Entrepreneurship uses real-life examples and sources to expose students to contemporary developments in the field, encouraging them to think critically about the issues faced by social ventures across the globe, and experiential exercises and assignments are included to provide students with hands-on experience in creating and managing their own social ventures. Also containing review and application questions, illustrative cases, definitions of key terms, and a comprehensive companion website, Social Entrepreneurship is the essential guide to this rapidly emerging field. Visit the companion website at www.routledge.com/cw/beugre to find: For Instructors PowerPoint slides Instructor's manual Multiple-choice questions For Students Extra illustrative cases Web links Links to video

The Essentials of Social Finance provides an interesting, accessible overview of this fascinating ecosystem, blending insights from finance and social entrepreneurship. It highlights the key challenges facing social finance, while also showcasing its vast opportunities. Topics covered include microfinance, venture philanthropy, social impact bonds, crowdfunding, and impact measurement. Case studies are peppered throughout, and a balance of US, European, Asian, and Islamic perspectives are included. Each chapter contains learning objectives, discussion questions, and a list of key terms. There is also an appendix explaining key financial concepts for readers without a background in the subject, as well as downloadable PowerPoint slides to accompany each chapter. This will be a valuable text for students of finance, investment, social entrepreneurship, social innovation, and related areas. It will also be useful to researchers, professionals, and policy-makers interested in social finance.

In Towards a Post-Covid Global Financial System a team of experts explore how COVID-19 has affected the most vulnerable parts of the global economy; how it has been met by Islamic banking and finance; and how the principles of Islamic social finance could be used to have a fairer, more resilient Islamic finance system for all.

Our world is experiencing increasingly complex social and environmental challenges. The prevailing business models and, to some extent, capitalism per se, are frequently blamed for these problems due to their neglect of social and environmental values in favour of financial returns. Within this context, social finance has attracted the attention of governments, organizations, entrepreneurs, and researchers as a means of mobilizing resources and innovation with the goal of establishing effective long-term solutions. This edited collection summarizes, discusses, and analyzes new innovative trends in social finance. It features contributions that aim to highlight emerging trends (products, tools, and processes) in social finance, present a series of case studies related to the development, deployment, and scaling of social finance innovations, offer an understanding of how non-economic externalities are being incorporated, managed, and assessed in recent innovations, reveal the disruptive potential of social finance innovations by analyzing how they are redefining mainstream finance, analyze the scales of operation and impact of different innovations, and explore the complex relationship between social finance and social innovation. Featuring contributions from both the research and practitioner community as well as policy actors, the book provides more than a snapshot of the current social finance field by specifically highlighting the major challenges and difficulties that require the urgent attention of policymakers and social entrepreneurs. Thomas Walker is a full professor of finance at Concordia University in Montreal, Canada. He previously served as an associate dean, department chair, and director of Concordias David OBrien Centre for Sustainable Enterprise. Prior to his academic career, he worked for firms such as Mercedes Benz, KPMG, and Utility Consultants International. He has published over 70 journal articles and books. Jane McCaughey is an associate professor of diaspora studies at Concordia Universitys School of Irish Studies, holding a PhD in Irish history from the University of London. Her research focuses on the intersections of historical and contemporary migration, gender, and ethnic discrimination. Sherif Goubran is an instructor in the Department of Architecture (School of Sciences and Engineering) at the American University in Cairo. He is currently a PhD candidate in the Individualized Program (INDI) at Concordia University, where he is conducting interdisciplinary research on sustainability in the built environment within the fields of design, building engineering, and real estate finance. Nadra Wagdy is an associate consultant at CID Consulting in Egypt. She is contributing to the development and scaling of an Extended Producer Responsibility program, working with the informal waste sector. She has extensive experience supporting cooperatives and not-for-profit organizations across their development phases: starting from validating their business plan and governance model to scaling-up their operations.
