Forget everything you knew about mining bitcoin the traditional way. Forget buying \$10,000 "mining" rigs that guzzle \$1,000's a dollars a month in electricity costs to maybe mine a bitcoin block.If you ever wanted to get into the bitcoin mining game but without the prohibitive startup or technically difficult costs, then you're in luck because I wrote this book specifically for you and anyone who may not know much about bitcoin mining the CHEAP way.Cryptocurrencies are evolving at a speed faster than anyone can write about it. This book you are reading now will teach you HOW to mine specific altcoins that you then trade for bitcoins or litecoins. The best part is I've spent literally years of my own life searching the crypto currency world for the right coins to mine that were stable, profitable, and had value.In short, you will:1. Never have to talk or interact with anyone. This is all automatic with a one time setup on your computer to start mining. No sales work! Hooray!2. No need to invest in any hyip scam of any kind or 3rd party "cloud mining solution" that turns out to be another scam.3. You control 100% fully all the

money and coins in your wallet.4. You gain the power of central banking and literally print money out of thin air. This is the miracle of bitcoin altcoin mining and I TEACH YOU its SECRETS.5. EARN UNHEARD OF 200%-808% annual returns! This is NOT a typo! And the insane part is you can do this for less than \$5 a month in electricity costs; I live in New York City and its expensive but power costs to mine costs this little to me.6. The 6 compound/withdraw strategies that you can use to grow your bitcoin mining operation while withdrawing profits reasonably. Breaking even has never been easier for you!7. Written primarily for poor people in mind, I am an unemployed actor and had to scrounge for money. This will be a god send for anyone needing a long term money making solution that they can start using TODAY to plug their financial woes.8. Gain the knowledge of traditional central banking so you can understand that what you're mining bitcoin-altcoins for is just the foundation of something much greater and freer.9. Persuasion "hacks" that were learned and mastered from psychology masters such as Mike Cernovich (Gorilla Mindset) and Scott Adams of Dilbert fame. Emotional control over yourself will help you and all crypto currency adopters for the coming fight ahead to ban and restrict bitcoin.10. And More!Once you're set up, you won't have to invest any more money (if you don't want to) or effort after the initial set up. You can start as low as \$50 (my minimum recommended). In fact, I encourage to start off slow and small so you can learn how crypto currencies work and when the bitcoin is flowing into your wallets, then you can

"ramp up" if you choose for MORE profits! If you missed the bitcoin train or want to get in on the current bitcoin craze, then this book will literally CHANGE YOUR LIFE as you will look at your computer screen and just have that frozen look of shock as you mine your bitcoins into your bank accounts. That was my first reaction when I did it years ago. Now, I hand its secret power over to you. What are you waiting for? Bills don't stop charging you money. Get started today and start making money with bitcoin mining now! Requirements: 1. A computer or laptop with operating systems Mac OS, Windows 7, Windows 8+ vista (recommended), or Windows 10 (PRIMARY recommendation) 2. Internet connection 3. Seed money of about \$50 or less to buy bitcoin and start mining. You can use less cash but bear in mind results will take longer to be realized.

For the purpose of making easier transactions, the world, throughout history, has assigned pressed coins in old times to trade products and in present, printed currency was invented. However, this has increased the number of countries that are getting trapped into debt or for sure are facing difficulties in meeting the needs of their fiscal targets in modern era's functions of mass Demand and Supply on an international level. The trend towards a financial society that is more centralized has

changed towards seeking decentralized money that could sidestep regulations of a specific nation towards the needs of international market. It is a system of payment that eliminates the requirement of a financial intermediary between two parties wanting to transmit money using the internet. It is a less costly method and at times, it's totally free. The transaction is kept unnamed as well. A man named Satoshi Nakamoto invented a new type of digital currency that could use the method of Peer-to-Peer (P2P) System, in 2008. This network itself is commonly referred as individual's network that is decentralized and these individuals don't need to know each other essentially. This system would allow the network that is decentralized, to work mutually cracking Algorithms by using high-powered rearranged Graphics Cards probably cracking a block that yielded the reward of cryptocurrency. Here Satoshi wanted to be the first one to crack and collect the profits of the famous "Genesis Block" in 2009. After his hard work and huge reward, a number of enthusiasts of computer hardware are attracted to it and are seeking to obtain a piece from this newly discovered digital gold pit for themselves.

**It's something most of us have sensed for years-the rise of a world defined only by “mine” and “now.” A world where business shamelessly seeks the fastest reward, regardless of the long-term social consequences; where political leaders reflexively choose short-term fixes over broad, sustainable social progress; where individuals feel increasingly exploited by a marketplace obsessed with our private cravings yet oblivious to our spiritual well-being or the larger needs of our families and communities. At the heart of The Impulse Society is an urgent, powerful story: how the pursuit of short-term self-gratification, once scorned as a sign of personal weakness, became the default principle not only for individuals, but for all sectors of our society. Drawing on the latest research in economics, psychology, political philosophy, and business management, Paul Roberts shows how a potent combination of rapidly advancing technologies, corrupted ideologies, and bottom-line business ethics has pushed us across a threshold to an unprecedented state: a virtual merging of the**

**market and the self. The result is a socioeconomic system ruled by impulse, by the reflexive, id-like drive for the largest, quickest, most “efficient” reward, without regard for long-term costs to ourselves or to broader society. More than thirty years ago, Christopher Lasch hinted at this bleak world in his landmark book, *The Culture of Narcissism*. In *The Impulse Society*, Roberts shows how that self-destructive pattern has grown so pervasive that anxiety and emptiness are becoming embedded in our national character. Yet it is in this unease that Roberts finds clear signs of change-and broad revolt as millions of Americans try step off the self-defeating treadmill of gratification and restore a sense of balance. Fresh, vital, and free of ideological, right-wing/left-wing formulations, *The Impulse Society* shows the way back to a world of real and lasting good.**

**The Philosophy of Cryptocurrency Mining**

*Cryptocurrency Mining has been here for awhile. When Cryptocurrencies started to gain transaction, more and more people started investing in Bitcoin and Altcoins. And once you get a hand on investing, you started to look for other ways to get more coins. The transition is mostly as investors*

***and then to miner. And for those developers, it is the other way around. So what is the advantage of mining than buying coins? You have super powers. You can literally make your own currency from nothing. It feels like you are doing something, instead of buying. It's fun. You get to play on the cool and fast hardware like ASIC's, GPU's and FPGA's. You are making money. Oh I mean crypto coins. And that means whatever you mine, you can get it higher if you just HODL. Mining can be challenging. You get to build a mining rig that can surpass your friends set up. You will be the coolest of your friends (and you make the most money too). You're using someone else computer hardware without them knowing, and they don't care (or they don't know). You get a new hobby that is exciting! Not just because of you mining (like the old job of mining gold), but also because Cryptocurrency in general is exciting. Prices fluctuates a thousand times in a week. Not having to deal with exchanges. No transaction fees to take care of, and you can even be a seller of coins if you can mine a lot of them. You can help strengthen the network and helps to protect it to 51% attack. By being a mining, you get to have a vote where Bitcoin will lead. You as a miner can record the block and transaction. You get to make a consensus of where Bitcoin and other coins are headed. Isn't this cool? You can choose what to mine. You can have Bitcoin, Ethereum, Auroracoin, Putincoin, Dash, Ripple, Digibyte, Nxt, Monero, Emercoin, Gridcoin, Iota, ZCash, Peercoin, Ybcoin, Dogecoin,***
