and employment, immigrant status, citizenship, and other rights. The second goal is to show how the extent of test fairness can be demonstrated and improved using the tools of psychometrics, in particular the models collectively known as Rasch measurement. “This book will have an enormous impact on the field of language assessment. Using Rasch analysis models to explore and identify sources of unfairness, the authors make a compelling case for fairness in the design and implementation of language assessment instruments and for justice in the interpretation and use of test results. A real strength of the book is that it guides readers through analytical techniques in an accessible way.” Dan Douglas, Professor Emeritus, Applied Linguistics Program, Iowa State University.

The updated edition of the bestselling book that has changed millions of lives with its insights into the growth mindset “Through clever research studies and engaging writing, Dweck illuminates how our beliefs about our capabilities exert tremendous influence on how we learn and which paths we take in life.”—Bill Gates, GatesNotes

After decades of research, world-renowned Stanford University psychologist Carol S. Dweck, Ph.D., discovered a simple but groundbreaking idea: the power of mindset. In this brilliant book, she shows how success in school, work, sports, the arts, and almost every area of human endeavor can be dramatically influenced by how we think about our talents and abilities. People with a fixed mindset—those who believe that abilities are fixed—are less likely to flourish than those with a

growth mindset—those who believe that abilities can be developed. Mindset reveals how great parents, teachers, managers, and athletes can put this idea to use to foster outstanding accomplishment. In this edition, Dweck offers new insights into her now famous and broadly embraced concept. She introduces a phenomenon she calls false growth mindset and guides people toward adopting a deeper, truer growth mindset. She also expands the mindset concept beyond the individual, applying it to the cultures of groups and organizations. With the right mindset, you can motivate those you lead, teach, and love—to transform their lives and your own.

From Principles of Learning to Strategies for Instruction Part One The purpose of this book is to help educators and training developers to improve the quality of their instruction. Unlike other available works, the text is not limited to a particular theoretical position. Nor is it like many of the instructional design texts, which ignore the learning literature. Rather, it draws upon any and all of those research-based principles regardless of learning theory, which suggest heuristics to guide instructional strategies. The approach of the authors is unique in that they develop a framework or model taxonomy for tasks, through which the principles of learning can be related to particular learning processes, suggesting distinctive

strategies for specific instructional tasks. The authors present a four-stage model that includes acquisition, automaticity, near term transfer, and far term transfer. Workbook Companion Part Two In this Workbook Companion, the strategies presented in the original book are expanded by supplying practical and specific strategies to implement of a variety of other subject matters. These strategies are based on the needs which the authors currently see and cite in existing educational systems. Each chapter concentrates on providing recommended instructional strategies and practical exercises for a specific target group: high school age adolescents. Contributors supply strategies in the different learning domains including Cognitive, Psychomotor, Affect, and Interpersonal, and each individual is responsible for training teachers, developing and/or evaluating curricula for such training, and educating high school students through the development and implementation of curricula. Developed for both new and experienced teachers developing curricula for high-school adolescents, the goal of the Workbook Companion is to provide those in the field of education with strategies to incorporate each of the four domains into their lesson plans, regardless of subject area. Why is it so hard to make lasting changes in our companies, in our communities, and in our own lives? The primary obstacle is a conflict that's built into our brains, say Chip and Dan Heath, authors of the critically acclaimed bestseller *Made to Stick*. Psychologists have discovered that our minds are ruled by two different systems - the rational mind and the emotional mind—that compete for control. The rational mind wants a great beach body; the emotional mind wants that Oreo cookie. The rational mind wants to change something at work; the emotional mind loves the comfort of the existing routine. This tension can doom a change effort - but if it is overcome, change can come quickly. In *Switch*, the Heaths show how everyday people - employees and managers, parents and nurses - have united both minds and, as a result, achieved dramatic results: • The lowly medical interns who managed to defeat an entrenched, decades-old medical

practice that was endangering patients

- The home-organizing guru who developed a simple technique for overcoming the dread of housekeeping •

The manager who transformed a lackadaisical customer-support team into service zealots by removing a standard tool of customer service In a compelling, story-driven narrative, the Heaths bring together decades of counterintuitive research in psychology, sociology, and other fields to shed new light on how we can effect transformative change. Switch shows that successful changes follow a pattern, a pattern you can use to make the changes that matter to you, whether your interest is in changing the world or changing your waistline.
