Randiana, or Excitable Tales is an anonymously written erotic novel originally published by William Lazenby in 1884. The book depicts a variety of sexual activities, including incest, defloration and lesbianism.

What if you could reboot your health, tap into your creative self, reclaim your wild nature, lead from your heart—and still feel well rested? As modern women, we’re taught that we can do it all, have it all, and be it all. While this freedom is beautiful, it’s also exhausting. Being a “worn-out woman” is now so common that we think feeling tired all the time is normal. According to Karen Brody, feeling this exhausted is not normal—and it’s holding us back. In Daring to Rest, Brody comes to the rescue with a 40-day program to help you reclaim rest and access your most powerful, authentic self through yoga nidra, a meditative practice that guides you into one of the deepest states of relaxation imaginable. It’s time to lie down and begin the journey to waking up. Though it comes from the yogic tradition, yoga nidra doesn’t look like a typical yoga class—the entire practice is done lying down. As you listen to a guided meditation, you’re gently taken into complete inner stillness, effortlessly releasing into a healing state that works on both cellular and subtle body levels. With Daring to Rest, Brody presents a comprehensive yoga nidra program that unfolds in three phases: rest for physical exhaustion, release for mental and emotional exhaustion, and rise for tuning in to the “life purpose exhaustion” that can come when we’re not in our full power. Each phase includes a downloadable yoga nidra guided meditation and supportive practices. “By directly accessing your subconscious mind, yoga nidra helps shift the long-held patterns that prevent you from stepping fully into your purpose and power,” writes Brody. “Now is the time to break the cycle of fatigue and return to your truest self—the woman you are when you’re not so constantly exhausted.”

In the midst of Trump’s attacks on the media, comes this look at the rigorous, independent reporting of the year’s most underreported news stories. While the country’s president displays a brazen disregard for the First Amendment and routinely demonizes the press as “the enemy of the people,” Censored 2020 looks beyond Donald Trump’s dizzying contempt for the truth to clarify the corporate media’s complicity in misinforming the American public—while also providing a clear vision of a better future, based on rigorous, trustworthy independent reporting that presents a fuller picture of truth. With a discerning eye, Censored 2020 focuses the public’s attention on the most important but underreported news stories of 2018-2019. These stories expose the corporate news media’s systemic blind spots while highlighting the crucial role played by independent journalists in providing the kind of news necessary for informed, engaged citizens. The book also examines this year’s lowlights in “junk food news” and “news abuse”—further revealing how corporate news often functions as propaganda—as well as highlights of exemplary organizations that champion “Media Democracy in Action.” Additional chapters address the importance of constructive journalism, the untold story of Kashmir, news coverage of LGBTQ issues in the Trump era, “fake news” as a Trojan horse for censorship, and online memes as a form of political communication.

The lord of snark, Lawrence Dorfman, is back! With this treasury of backhanded compliments, sarcastic insults, and catty comebacks, Dorfman gives us transformative wisdom that’s sure to change your life—or at least induce a light chuckle. One question plagues us all: How do we survive all the Sturm und Drang of everyday life? The answer is but one word: snark. “She wears her clothes as if they were thrown on by a pitchfork.” —Jonathan Swift “Why don’t you get a haircut? You look like a chrysanthemum.” —P. G. Wodehouse “He’s a mental midget with the IQ of a fence post.” —Tom Waits “They hardly make ‘em like him anymore—but just to be on the safe side, he should be castrated anyway.” —Hunter S. Thompson “He has a Teflon brain. . . nothing sticks”—Ily Tomlin “He has no more backbone than a chocolate éclair.” —Theodore Roosevelt Snark will keep the wolves at bay (or at least out on the porch). Snark, much like a double scotch, will help you deal with relatives, shopping, and rudeness; it is an outlet for the unleashed vitriolic bile that’s saved itself up over the months. Like a shield, it will protect you while you go about your life. Snark is your answer!

"Sbeouquin o i dilettranti del miracolo" e il romanzo cubista di Carl Einstein, una delle piu stupefacenti manifestazioni delle avanguardie artistiche del Novecento.

"As novelist and poet Andrei Codrescu points out in the essay that accompanies this selection of photographs from the Getty Museum's collection, Evans' photographs are the work of an artist whose temperament was distinctly at odds with Beals's impassioned rhetoric.

Evans' photographs of Cuba were made by a young, still maturing artist who – as Codrescu argues – was just beginning to combine his early, formalist aesthetic with the social concerns that would figure prominently in his later work."--Jacket.

A girl tumbles into a downward spiral when a romantic encounter turns violent in this heartwrenching novel from the author of Cracked. Dell is used to disappointment. Ever since her dad left, it's been one let down after another. But no one—not even her best friend—understands all the pain she's going through. So Dell hides behind self-deprecating jokes and forced smiles. Then the one person she trusts betrays her. Dell is beyond devastated. Without anyone to turn to for comfort, her depression and self-loathing spin out of control. But just how far will she go to make all the heartbreak and the name-calling stop?

This book is the fifth in the Cambridge Socio-Legal Group series and it concerns the evolving notions and practices of kinship in contemporary Britain and the interrelationship of kinship, law and social policy. Assembling contributions from scholars in a range of disciplines, it examines social, legal, cultural and psychological questions related to kinship. Rising rates of divorce and of alternative modes of partnership have raised questions about the care and well-being of children, while increasing longevity and mobility, together with lower birth rates and changes in our economic circumstances, have led to a reconsideration of duties and responsibilities towards the care of elderly people. In addition, globalisation trends and international flows of migrants and refugees have confronted us with alternative constructions of kinship and with the challenges of maintaining kinship ties transnationally. Finally, new developments in genetics research and the growing use of assisted reproductive technologies may raise questions about our notions of kinship and of kin rights and responsibilities. The book explores these changes from various perspectives and draws on theoretical and empirical data to describe practices of kinship in contemporary Britain.

An expert communicator, Jack McAfghan writes the memoirs of his four-legged life as a mixed-breed Afghan Hound. From obedience and agility training to hospice work, Jack and his master learn their lessons side by side, inevitably applying what they have learned as their own lives unfold. It is a love story that can be used as an informal study guide for those who are in the process of training a dog, learning to lose, or grieving over the loss of a friend.Jack presents with a wise, open and informed mind. He speaks firsthand about the psychological aspects of canine behavior as he opens the reader's mind to the possibilities that exist in life and after death. He reminds us that the way we think can change the course of our lives.This story will touch everyone who has ever loved. It matters not if they have four legs or two. Jack leads us to a higher love as he expands our tolerance and compassion for all of humanity. He extends himself to every creature of the earth, every human on the planet, every spirit in the universe and most of all, to the bona fide Master over all.

Follow two abolitionists who fought one of the most shockingly persistent evils of the world: human trafficking and sexual exploitation of slaves. Told in alternating chapters from perspectives spanning more than a century apart, read the riveting 19th century first-hand account of Harriet Jacobs and the modern-day eyewitness account of Timothy Ballard. Harriet Jacobs was an African-American, born into slavery in North Carolina in 1813. She thwarted the sexual advances of her master for years until she escaped and hid in the attic crawl space of her grandmother's house for seven years before escaping north to freedom. She published an autobiography of her life, Incidents in the Life of a Slave Girl, which was one of the first open discussions about sexual abuse endured by slave women. She was an active abolitionist, associated with Frederick Douglass, and, during the Civil War, used her celebrity to raise money for black refugees. After the war, she worked to improve the conditions of newly-freed slaves. As a former Special Agent for the Department of Homeland Security who has seen the horrors and carnage of war, Timothy Ballard founded a modern-day "underground railroad" which has rescued hundreds of children from being fully enslaved, abused, or trafficked in third-world countries. His story includes the rescue and his eventual adoption of two young siblings--Mia and Marky, who were born in Haiti. Section 2 features the lives of five abolitionists, a mix of heroes from past to present, who call us to action and teach us life lessons based on their own experiences: Harriet Tubman--The "Conductor"; Abraham Lincoln--the "Great Emancipator"; Little Mia--the sister who saved her little brother; Guesno Mardy--the Haitian father who lost his son to slave traders; and Harriet Jacobs--a teacher for us all.

To predict our future, we must look to the extremes. So argues the economist Richard Davies, who takes readers to the margins of the modern economy and beyond. These extreme economies illustrate the forces that test human resilience, drive societies to failure, and promise to shape our collective future. Reviving a foundational idea from the medical sciences, Extreme Economies turns the logic of modern economics on its head by arguing that these outlier societies can teach us more about our own than we might imagine. By adapting to circumstances unimaginable to most of us, the people in these societies are pioneering the economic infrastructure of the future.

New York Times bestselling author, Fode Network star, and The Pioneer Woman herself, Ree Drummond brings us the first book in a brand-new picture book series! In Ree's own words: "I was all grown up when I moved out to the country. When I first arrived, I felt so out of place! But eventually, I looked around and discovered all the wonderful things about country life. So I decided to write a story about my experiences, as seen through the eyes of a little girl named Ree. Little Ree moves to the country and feels as scared and unsure as I was. But then she finds that if she sets her mind to it, being a country girl is a pretty cool thing. Come along on her adventures!" Little Ree trades in her city days for a country way of life when she moves with her family to her grandparents' ranch. She's excited to ride horses, swim in the pond, and help Grandma cook for everyone. But on her first day, she finds that living on a ranch can be tough. She has to get up at the crack of dawn, learn to herd cows, and make sure her horse, Pepper, doesn't eat everything in sight. And that's all before breakfast! Will she ever get used to this new place? Luckily, the end of the day brings a big family barbecue...and the happy discovery that being a country girl isn't about the right pair of boots, it's all about the right attitude. With warmth, humor, and stories inspired by life on the ranch, Ree Drummond's new picture book introduces us to a spunky new picture book star and treats us to a special pancake recipe at the end!

This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been cus tomarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the in terms in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and O (oh). Thus, DOL was almost always printed with "oh" rather than "zero" and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

In the future world of Scorch, America is run by a "corporacracy." Three conglomerates have taken control not by force but by manipulating common beliefs and values through the media, and particularly by playing on Americans' fears of Big Brother. Consumerism and privatization have run amok in this landscape of flashing screens and subtle brainwashing, a world where even city streets and public schools are run by big business. This is a darkly comic first novel of a dystopian future, with echoes of 1984 and Brave New World. Brighter Child(R) Spanish for Grade 2 helps students master beginning foreign language skills. Janey is like a whirlwind of selflessness. A beautiful spirit in a beautiful country doing a beautiful thing. I encourage my children to be more Janey'. With more positive spirits like Janey, the world would be a better place." - Ben Fogle in 2014 and ' in her mid-twenties, Janey Lowes had been a vet for just two years when she left her home in County Durham and went travelling. Visiting Sri Lanka, she was horrified to see the state of so many of the island's dogs. In particular the three million strays. Over 5,000 miles from home, Janey decided there and then that she was going to move to the island indefinitely and do everything within her power to help them. She raised £10,000 to get started, setting up a charity called WeCare Worldwide, and began work. Frightened, determined and excited all at the same time, she found a local who was willing to work with her and began scouring the streets for dogs in need. Some she patched up as best she could at the roadside, others she brought back and treated in a make-shift surgery she had cobbled together in her new home. With very little equipment, she and her small team came up with new and ingenious ways to treat the animals. In this highly inspiring and heartfelt book full of challenges and adventure, Janey introduces us to her world and the tireless work she carries out. As she says, "I feel as though all these dogs are my dogs and I have a responsibility to them." In it, we meet many of the colourful characters who have come to offer help, along with innumerable street dogs who have suffered all sorts of trauma and injury, only to be scooped up by Janey and her team and saved.

Mike and his friend Jenny learn how to ride a bike. They also learn how to share.

Brian and his friends are not part of the cool crowd. They're the misfits and the troublemakers—the ones who jump their high school's fence to skip class regularly. So when a deadly virus breaks out, they're the only ones with a chance of surviving. The virus turns Brian's classmates and teachers into bloodthirsty attackers who don't die easily. The whole school goes on lockdown, but Brian and his best friend, Chad, are safe (and stuck) in the theater department—far from Brian's sister, Kenzie, and his ex-girlfriend with a panic attack problem, Laura. Brian and Chad, along with some of the theater kids Brian had never given the time of day before, decide to find the girls and bring them to the safety of the theater. But it won't be easy, and it will test everything they thought they knew about themselves and their classmates. Praise for SICK "The gore and action will leave enthralled readers thrilled and then sated with each kill on either side." —Booklist "Between the pacing and the heroes' salty, blue language (full of lovingly creative, genital-inspired insults), reluctant readers who love zombies will devour it, right up to the abrupt end." —Kirkus Reviews "Sick is well written, with great detail, even if it is a little gory." —VOYA

There has been much opinion and little fact written on the subject of lock picking. It is the purpose of this book to clarify the facts about this delicate process, and at the same time to train you in proper procedure. Reading this book is certainly enough to get you started picking simple locks, but remember: a great deal of time and patience are needed to become a truly proficient locksmith. In this volume, you will learn the fundamental theories of lock picking in addition to proper terminology, the importance of tool design (i.e. how to select and use the right tool for a given job), the effects of tolerances, and finally the techniques most commonly used by locksmiths to successfully pick the vast majority of standard pin and wafer tumbler locks. Lock picking is a useful, engaging, and satisfying skill; with this book and a little determination, you'll be off to a great start.
