Alhaji Sir Ahmadu Bello, the Premier of the Northern Region of Nigeria, was thought by many to be the most powerful figure in Nigeria. The descendant of the great reformer, Shehu Usman dan Fodio, the Sardauna grew up in the atmosphere of the Muslim and aristocratic tradition of the Fulani conquerors of Northern Nigeria. He reached maturity in a Nigeria that was rapidly advancing towards independent nationhood, with political institutions deriving largely from the traditions of the Christian West. As leader of the Northern Peoples Congress, the majority political party in Northern Nigeria, the Sardauna became the first Premier of that region in 1954.

A veteran Wall Street Journal editor and authority on branding, marketing and reputation provides the 18 crucial rules for companies to follow in developing and protecting their reputation, which can be their most valuable asset or their worst nightmare. A must read book for senior executives, consultants, advertising, public relations, and marketing professionals. From Enron and WorldCom to the Catholic Church and Major League Baseball, reputation crises have never been more widespread. Now Ronald J. Alsop, a veteran Wall Street Journal authority on branding and reputation management, explains the dangers and gives organizations the eighteen crucial laws to follow in developing and protecting their reputations. Consider this example of a simple decision made by a low-ranking employee: When rescue workers at the site of the World Trade Center disaster sought bottled water from a nearby Starbucks outlet, they complained that an employee charged them for it. In a matter of hours, the Internet had picked up the story and Starbucks' carefully cultivated worldwide reputation was quickly besmirched. This is just one instance among many of how the business world, ever more global and competitive, has become increasingly difficult to navigate. Studies have demonstrated the powerful impact of reputation on profits and stock prices, and yet less than half of all companies have a formal system for measuring reputation. Clearly, companies in every industry—from Dow Chemical to Disney to DaimlerChrysler—have much more to learn. It is still the rare company that realizes the full value of its reputation: how corporate reputation can enhance business in good times, become a protective halo in turbulent times, and be destroyed in an instant by people at the lowest or highest levels of the corporate ladder. Mr. Alsop provides eighteen thoroughly documented lessons based on years of experience covering every aspect of corporate reputation, with a clear distillation of the complex principles at the heart of a reputation. He explains: How to protect your reputation when the inevitable crisis hits How to cope with the many hazards in cyberspace How to create a reputation for vision and industry leadership How to establish a culture of ethical behavior How to measure and monitor your ever-changing public image How to make employees your reputation champions How to decide when it's time to change your name The result is a book that is important not only for business executives, consultants, and advertising, public relations, and marketing professionals but also for anyone eager to learn more about the companies they work for, buy from, and invest in.

"Architect Tom Kundig is known worldwide for the originality of his work. This paperback edition of Tom Kundig: Houses, first published in 2006, collects five of his most prominent early residential projects, which remain touchstones for him today. In a new preface written for this edition, Kundig reflects on the influence that these designs continue to have on his current thinking. Each house, presented from conceptual sketches through meticulously realized details, is the product of a sustained and active collaborative process among designer, builder, and client. The work of the Seattle-based architect has been called both raw and refined--disparate characteristics that produce extraordinarily inventive designs inspired by both the industrial structures ubiquitous to his upbringing in the Pacific Northwest and the vibrant craft cultures that are fostered there." --

Since the end of colonization Africa has struggled with socio-economic and political problems. These challenges have attracted wealthy donors from Western nations and organizations that have assumed the roles of helper and deliverer. While some donors have good intentions, others seek to impose their ideology of sexual liberation. These are the ideological neocolonial masters of the twenty-first century who aggressively push their agenda of radical feminism, population control, sexualisation of children, and homosexuality. The author, a native of Nigeria, shows how these donors are masterful at exploiting some of the heaviest burdens and afflictions of Africa such as maternal mortality,unplanned pregnancies, HIV/AIDS pandemic, child marriage,and persistent poverty. This exploitation has put many African nations in the vulnerable position of receiving funding tied firmly to ideological solutions that are opposed tothe cultural views and values of their people. Thus many African nations are put back into the protectorate positions of dependency as new cultural standards conceived in the West are made into core policies in African capitals. This book reveals the recolonization of Africa that is rarely talked about. Drawing from a broad array of well-sourced materials and documents, it tells the story of foreign aid with strings attached, the story of Africa targeted and recolonized by wealthy, powerful donors.

As debates about migrants and refugees reverberate around the world, this book offers an important first-hand account of how migration is being approached at the highest levels of international governance. Whereas refugees have long been protected by international law, migrants have been treated differently, with no international consensus definition and no one international migration system. This all changed in September 2016, when the 193 members of the United Nations unanimously adopted the New York Declaration on Refugees and Migrants, laying the groundwork for the creation of governance frameworks for migrants and refugees worldwide. This book provides a fly on the wall analysis of the opportunities and challenges of the two new Global Compacts on Refugees and Migration as governments, international NGOs, multilateral institutions and other actors develop and negotiate them. Looking beyond the compacts, the book considers migration governance over time, and asks the bigger questions of what the international community can do on the one hand to affirm and strengthen safe, orderly and regular migration to help drive economic growth and prosperity, whilst on the other hand responding to the problems caused by increasing numbers of refugees and irregular migrants. This highly engaging and informative account will be of interest to policy-makers, academics and students concerned with global migration and refugee governance.

This volume is part of a series on the history of the North Pacific. It contains primary source material (official reports, private letters) and extracts from rare books, translated from various languages.

This book offers an interdisciplinary study of hip-hop music written and performed by rappers who happen to be out black gay men. It

examines the storytelling mechanisms of gay themed lyrics, and how these form protests and become enabling tools for (black) gay men to discuss issues such as living on the down-low and HIV/AIDS. It considers how the biased promotion of feminised gay male artists/characters in mainstream entertainment industry has rendered masculinity an exclusively male heterosexual property, providing a representational framework for men to identify with a form of "homosexual masculinity" – one that is constructed without having to either victimise anything feminine or necessarily convert to femininity. The book makes a strong case that it is possible for individuals (like gay rappers) to perform masculinity against masculinity, and open up a new way of striving for gender equality.

"Protecting the Promise: Indigenous Education between Mothers and Their Children is a collection of educational essays as told by five Native American families in the U.S. Northwest (Washington, Montana, North Dakota). Collectively, these stories speak to the "everyday" aspects of Indigenous educational resurgence rooted in the intergenerational learning that occurs between Native American mothers and their children. It is in the hyper-local--the everyday moments--in Indigenous families' lives where "the most radical and hopeful possibilities for Indigenous resurgence and futures can and do unfold" (Bang, Montaño Nolan & McDaid-Morgan, 2018, p. 2). We define "resurgence" as the ongoing actions (both large and small) that recenter Indigenous realities and knowledges while, simultaneously, denouncing and healing from the damaging effects of settler colonial systems. This book is a testament to the powerful ways everyday interactions between mothers and their children are intricately connected to larger social issues such as protection of land, sovereign tribal nation rights, revitalization, and sustaining of language and cultural practices. Everyday is defined as those daily actions taken up by families and communities, often unacknowledged and unseen by teachers and schools that have the power to generate Indigenous resurgence (Corntassel & Scow, 2017; Hunt & Holmes, 2015)"--

The massive dimensions of Syria's refugee crisis—and the search for solutions The civil war in Syria has forced some 10 million people—more than half the country's population—from their homes and communities, creating one of the largest human displacements since the end of World War II. Daily headlines testify to their plight, both within Syria and in the countries to which they have fled. The Consequences of Chaos looks beyond the ever-increasing numbers of Syria's uprooted to consider the long-term economic, political, and social implications of this massive movement of people. Neighboring countries hosting thousands or even millions of refugees, Western governments called upon to provide financial assistance and even new homes for the refugees, regional and international organizations struggling to cope with the demands for food and shelter—all have found the Syria crisis to be overwhelming in its challenges. And the challenges of finding solutions for those displaced by the conflict are likely to continue for years, perhaps even for decades. The Syrian displacement crisis raises fundamental questions about the relationship between action to resolve conflicts and humanitarian aid to assist the victims and demonstrates the limits of humanitarian response, even on a massive scale, to resolve political crises. The increasingly protracted nature of the crisis also raises the need for the international community to think beyond just relief assistance and adopt developmental policies to help refugees become productive members of their host communities.

This volume builds on previous notions of transmedia practices to develop the concept of transtexts, in order to account for both the industrial and user-generated contributions to the cross-media expansion of a story universe. On the one hand exists industrial transmedia texts, produced by supposedly authoritative authors or entities and directed to active audiences in the aim of fostering engagement. On the other hand are fan-produced transmedia texts, primarily intended for fellow members of the fan communities, with the Internet allowing for connections and collaboration between fans. Through both case studies and more general analyses of audience participation and reception, employing the artistic, marketing, textual, industrial, cultural, social, geographical, technological, historical, financial and legal perspectives, this multidisciplinary collection aims to expand our understanding of both transmedia storytelling and fan-produced transmedia texts.

For almost a hundred years, Hadrian Marlowe has served the Empire in its war against the Cielcin, a vicious alien race bent on humanity's destruction. Rumors of a new king amongst the Cielcin have reached the Imperial throne. This one is not like the others. It does not raid borderworld territories, preferring precise, strategic attacks on the humans' Empire. To make matters worse, a cult of personality has formed around Hadrian, spurred on by legends of his having defied death itself. Men call him Halfmortal. Hadrian's rise to prominence proves dangerous to himself and his team, as pressures within the Imperial government distrust or resent his new influence. Caught in the middle, Hadrian must contend with enemies before him—and behind. And above it all, there is the mystery of the Quiet. Hadrian did defy death. He did return. But the keys to the only place in the universe where Hadrian might find the answers he seeks lie in the hands of the Emperor himself....

For the past decade, humanitarian actors have increasingly sought not only to assist people affected by conflicts and natural disasters, but also to protect them. At the same time, protection of civilians has become central to UN peacekeeping operations, and the UN General Assembly has endorsed the principle

that the international community has the "responsibility to protect" people when their governments cannot or will not do so. Elizabeth Ferris explores the evolution of the international community's understandings of protection, with a particular emphasis on the humanitarian community. "Protection" is a noble word, with positive connotations, but what does it actually mean in practice? Does providing assistance to vulnerable people protect them, for example? Does monitoring the number of rapes protect women? Does increased engagement in protection activities by humanitarian agencies jeopardize the cornerstone humanitarian principles of neutrality and impartiality? In *The Politics of Protection*, Ferris examines inconsistent ways in which protection is defined and applied. For example, why do certain groups receive international protection while other equally needy groups do not? Her case studies, ranging from Iraq to Katrina, illustrate the challenges—and limitations—of protecting vulnerable populations from the ravages of war and natural disasters. Ferris argues that the protection paradigms currently in use are inadequate to meet the challenges of the future, such as climate change, protracted displacement, and the changing nature of warfare.

Here is a display of an example of the consequences lying ahead of respected religious leaders who toy with secret sins. This dramatic piece contains an emphatic expression of the fact that unconfessed sins can not be concealed for ever, like smoke, it still finds a way to ooze out of an unexpected opening. Rev. Hosea, had desecrated the Lord's altar with terrible hidden sins, and in his various attempt to conceal these sins, he got them increasing one upon the other until he got too far and felt it hard to turn back. This dramatic piece had already been made into an inspiring TV Serial and shown on more than 75 TV stations in Nigeria and ran on many satellite channels including the AFRICAN MAGIC Channel of the M-NET, South Africa.
