The International Space Station (ISS) is a great international, technological, and political achievement. It is the latest step in humankind's quest to explore and live in space. The research done on the ISS may advance our knowledge in various areas of science, enable us to improve life on this planet, and give us the experience and increased understanding that can eventually equip us to journey to other worlds. As a result of the Station's complexity, few understand its configuration, its design and component systems, or the complex operations required in its construction and operation. This book provides high-level insight into the ISS. The ISS is in orbit today, operating with a crew of three. Its assembly will continue through 2010. As the ISS grows, its capabilities will increase, thus requiring a larger crew. Currently, 16 countries are involved in this venture. The sophisticated procedures required in the Station's construction and operation are presented in Amazing 3D Graphics generated by NASA 104 pages of spectacularly detailed color graphics the Space Station as you've never seen it before!

Alli-Kar, a white-hole portal from another universe, rains meteoroids onto the surface of the planet Kelanni. But the so-called "lodestones" behave according to different physical laws, transforming Kelanni's society. With the aid of the fearsome Keltar in their flying cloaks, the Kelanni are being put to forced labor to mine the lodestones. Shann, an orphan with a fiery disposition, witnesses a battle between a Keltar and a stranger bearing a similar flying cloak. She tracks down the stranger, learning of the technology behind the Keltars' power and joining him on a mission to free the slaves and cut off their supply of lodestones. Meanwhile Keris, a Keltar, is sent on a mission to track down the rebels. She is attacked by a flying creature and saved by the enigmatic Chandara. At their Great Tree, she learns that a mysterious "Prophet" is out to destroy the Kelanni people. Their only hope is a powerful instrument hidden in the distant past. Pursued by Keltar, the party will encounter bizarre creatures, ancient technologies and terrifying dangers. Finally, they must seek to cross a massive storm barrier in order to reach the other side of their world, where a world-shaking revelation awaits.

A Trip Through Time and Space

Book 1 in the New York Times bestselling trilogy, perfect for fans of Battlestar Gallactica and Passengers! WHAT DOES IT TAKE TO SURVIVE ABOARD A SPACESHIP FUELED BY LIES? Amy is a cryogenically frozen passenger aboard the spaceship Godspeed. She has left her boyfriend, friends--and planet--behind to join her parents as a member of Project Ark Ship. Amy and her parents believe they will wake on a new planet, Centauri-Earth, three hundred years in the future. But fifty years before Godspeed's scheduled landing, cryo chamber 42 is mysteriously unplugged, and Amy is violently woken from her frozen slumber. Someone tried to murder her. Now, Amy is caught inside an enclosed world where nothing makes sense. Godspeed's 2,312 passengers have forfeited all control to Eldest, a tyrannical and frightening leader. And Elder, Eldest's rebellious teenage heir, is both fascinated with Amy and eager to discover whether he has what it takes to lead. Amy desperately wants to trust Elder. But should she put her faith in a boy who has never seen life outside the ship's cold metal walls? All Amy knows is that she and Elder must race to unlock Godspeed's hidden secrets before whoever woke her tries to kill again.

I was thirteen years old when I originally thought of the story, and have written and rewritten it more times than I can count. But six years ago, I met my wife a Filipina from Manila, and there I discovered the wonderful and gracious people of the Philippines. After realizing I would have children of mixed racial birth, I decided I wanted to give them a hero to look up to from their own culture. I then re-did all nine books; in this time the racial, religious and cultural differences gave the book a more defined nature, one of which I was proud. I had given up long ago on trying to get an agent or a publisher to take interest in my book, but that was never my goal. My goal was to give my children a hero of their own heritage, and to inspire them. Win or lose, they win. The Year is 2079 and the earth has recently been discovered by a ruthless alien race known as the T-Challa. Their plan is to enslave the population and to strip the earth of all its resources to maintain and expand their vast empire. However the earth is not without hope, another alien race called the X'ena's have sent a symbiotic probe to earth to help defend her from the T-Challa. The Probe which takes the name Paladin merges with a human named Caleb Ocoda as well as an ancient battleship from a century ago and transforms both into a force to protect the earth. Caleb then man's his ship with the best the earth has to offer as they go out and defend the earth successfully defeating the small fleet sent by the T-Challa. Unfortunately the ship suffers damage and it affects Caleb wounding him, it is quickly discovered that Caleb is dying and with him the mighty ship named Paladin, the only defense of earth. After searching all possible answers to save himself and protect the earth, Caleb decides to find the X'ena to see if they can cure him before his death, but time is short and the single ship must travel through the heart of the T-Challa Empire to find the X'ena and save Caleb. Will they succeed?

After a devastating bio-attack and the ensuing battle, they've fled Dark Space aboard the Defiant to get away from the crime lord, Alec Brondi, who's just stolen the most powerful vessel left in the Imperial Fleet--the Valiant, a 5-kilometer-long gladiator-class carrier. THEY ARE LOW ON FUEL They need reinforcements to face Brondi, but beyond Dark Space the comm relays are all down, meaning that they must cross Sythian Space to contact the rest of the fleet. Making matters worse, they are low on fuel, so they can't jump straight there. They'll have to travel on the space lanes to save fuel, but the lanes are controlled by Sythians now, and they are fraught with entire fleets of cloaked alien ships. AND THERE IS NO WAY OUT With Brondi behind them, they can't go back, and they can't afford to leave the last human sector in the galaxy to the crime lords, so they must cross through enemy territory in the Defiant, a damaged, badly undermanned cruiser with no cloaking device. An investigator must solve a brutal murder on a claustrophobic space station in this tense science fiction thriller from the author of Salvation Day. Hester Marley used to have a plan for her life. But when a catastrophic attack left her injured, indebted, and stranded far from home, she was forced to take a dead-end security job with a powerful mining company in the asteroid belt. Now she spends her days investigating petty crimes to help her employer maximize its profits. She's surprised to hear from an old friend and fellow victim of the terrorist attack that ruined her life--and that surprise quickly turns to suspicion when he claims to have discovered something shocking about their shared history and the tragedy that neither of them can leave behind. Before Hester can learn more, her friend is violently murdered at a remote asteroid mine. Hester joins the investigation to find the truth, both about her friend's death and the information he believed he had uncovered. But catching a killer is only the beginning of Hester's worries, and she soon realizes that everything she learns about her friend, his fellow miners, and the outpost they call home brings her closer to revealing secrets that very powerful and very dangerous people would rather keep hidden in the depths of space.

Dark Space Universe

Govert Schilling explores the mysteries of space that lie beyond our solar system on this mind-bending trip to nebulae, galaxies, black holes, and the edge of the observable universe. Join Govert Schilling on a journey across the universe that will ignite the imagination. The trip begins inside our own solar system with a brief tour of the sun, the planets and their moons, asteroids, comets, and dwarf planets. We then accelerate into deep space, traveling from our interstellar neighborhood, through our own galaxy, the Milky Way, to the far reaches of the cosmos. With Schilling as our guide, we explore the birth of stars and stellar nurseries, such as the Orion and Carina Nebulae; the death of stars, from red giants to catastrophic supernova explosions; and galaxies and galaxy clusters beyond our own including spiral galaxies, elliptical galaxies, and lenticular galaxies. We learn about supermassive black holes, which astronomers now believe exist at the center of every galaxy including our own, and exoplanets, billions of which are believed to be orbiting stars in the Milky Way and beyond. The book concludes at the edge of the cosmological horizon with a look at dark matter, dark energy, and theories of extraterrestrial life and the Multiverse. Including hundreds of photographs and custom illustrations, as well as a star atlas that shows the full celestial sky, Deep Space is the perfect book for astronomy buffs, students, and anyone fascinated with the mystery and beauty of the cosmos.

Brady Garrett needs to go home. He’s a conscripted recruit on Defender Three, one of a network of stations designed to protect the Earth from alien attack. He’s also angry, homesick, and afraid. If he doesn’t get home he’ll lose his family, but there’s no way back except in a body bag. Cameron Rushton needs a heartbeat. Four years ago Cam was taken by the Faceless--the alien race that almost destroyed Earth. Now he’s back, and when the doctors make a mess of getting him out of stasis, Brady becomes his temporary human pacemaker. Except they’re sharing more than a heartbeat: they’re sharing thoughts, memories, and some very vivid dreams. Not that Brady’s got time to worry about his growing attraction to another guy, especially the one guy in the universe who can read his mind. It doesn’t mean anything. It’s just biochemistry and electrical impulses. It doesn’t change the truth: Brady’s alone in the universe. Now the Faceless are coming and there’s nothing anyone can do. You can’t stop your nightmares. Cam says everyone will live, but Cam’s probably a traitor and a liar like the military thinks. But that’s okay. Guys like Brady don’t expect happy endings.

Spark your child’s imagination through science and learning with this captivating astronomy book for toddlers. When it comes to kids books about black holes nothing else can compare to this clever science parody from the #1 science author for kids, Chris Ferrie! PLUS, use a black light to reveal secret, invisible text and artwork that reverses the story from nothing to the scientific creation of everything! Using the familiar rhythm of "There Was an Old Lady Who Swallowed a Fly," follow along as the black hole swallows up the universe and everything that exists in it, from the biggest to the smallest pieces of matter. The silly, vibrant artwork is sure to make stargazers of all ages smile and start a love of science in your baby. There was a black hole that swallowed the universe. I don’t know why it swallowed the universe—oh well, it couldn’t get worse. There was a black hole that swallowed a galaxy. It left quite a cavity after swallowing that galaxy. It swallowed the galaxies that filled universe. I don’t know why it swallowed the universe—oh well, it couldn’t get worse.

The International Bestseller On April 10, 2019, award-winning astrophysicist Heino Falcke presented the first image ever captured of a black hole at an international press conference—a turning point in astronomy that Science magazine called the scientific breakthrough of the year. That photo was captured with the unthinkable commitment of an intercontinental team of astronomers who transformed the world into a global telescope. While this image achieved Falcke ’s goal in making a black hole “ visible ” for the first time, he recognizes that the photo itself asks more questions for humanity than it answers. Light in the Darkness takes us on Falcke ’s extraordinary journey to the darkest corners of the universe. From the first humans looking up at the night sky to modern astrophysics, from the study of black holes to the still-unsolved mysteries of the universe, Falcke asks, in even the greatest triumphs of science, is there room for doubts, faith, and a God? A plea for curiosity and humility, Light in the Darkness sees one of the great minds shaping the world today as he ponders the big, pressing questions that present themselves when we look up at the stars.

Armchair Fiction presents extra large science fiction double novels with original illustrations. "Dark Destiny" by Dwight V. Swain is the first novel. He was known throughout the system as Sha Haral, a fierce space warrior with a lust for power. He'd blasted his way back and forth across the spaceways many times. However, Haral's fortunes had taken a turn for the worse, and he soon became a downtrodden, bitter would-be conqueror haunting the dives on a backwater planet called Ulna. But his fate took an unexpected turn when a beautiful blonde-haired priestess, fleeing from a space pirate's hordes, fell into his lap. From this priestess Haral learned of an ancient woman-goddess who, according to legend, lay sleeping in a lost city surrounded by a legion of terrifying monsters. This ancient goddess, whose face was half-hidden by a jeweled veil, was known as a woman of ultimate beauty, possessing secrets of great power. And she still lay there, in her crumbling city, waiting for someone to awaken her... The second novel, "The Secret of Planetoid 88," is by Ed Earl Repp. Dane Cabot was just one of many slaves of the dictators--"The Hundred" as they were known--who ruled Earth with an iron hand. After a joy ride to a distant planetoid, Cabot returned to Earth to find himself falsely accused of murder. There was no trial--The Hundred didn't operate that way. He was soon sentenced to die. But when a mysterious stranger interceded, Cabot found himself a stowaway on a space cruiser headed for Io, moon of Jupiter. There Cabot found a tiny colony of rebels with a master plan for the eventual freedom of Earth's enslaved populace. But radiation from Jupiter's Great Red Spot was slowly destroying Io. So Cabot and his fellow rebels found themselves in a desperate race against time. Could they orchestrate their plans before the rising tide of planet-wide disintegration overtook them? Deep in the void of space was a secret, a secret that was the key to freedom--if they could find it in time...

The Invisible War

A teenage boy uncovers a horrific family secret. A widower seeks vengeance on the creatures that killed his wife. A drug addled writer stalks the woman of his dreams, a woman much more sinister than she appears. A federal agent races to find the cursed relic powering this city full of spooks, spirits, and serial killers. The lives of these and others will collide in the dark and dangerous streets of Adderlass. A seed of evil was planted under Adderlass, a city where monsters hide behind masks of humanity and ordinary people shuffle anesthetized and addicted by the sickly supernatural power wafting up from below. The city was built over the crystalline skull of a bloodthirsty beast. Now, the hunt is on for this lost treasure and whoever finds it first will control the fate not only of Adderlass but of the entire world. Sixteen-year-old Simon Cubbins, young and naive, may be the key to unlocking the mystery buried in this twisted labyrinth of hidden agendas. He also unknowingly harbors a secret that could destroy the Cubbins bloodline. As different characters fight for control over Simon, he will have to decide whether or not to carry on his family's legacy.

Presents two novels in one volume, including "Unjoined," in which upheaval threatens stability on Trill, and "Fragments and Omens," in which conflicting visions of Bajor's role in the Federation divide the planet's inhabitants.

"In 1916, Einstein became the first to predict the existence of gravitational waves: sounds without a material medium generated by the unfathomably energy-producing collision of black holes. Now, Janna Levin, herself an astrophysicist, recounts the story of the search, over the last fifty years, for these elusive waves--a quest that has culminated in the creation of the most expensive project ever funded by the National Science Foundation (\$1 billion-plus). She makes clear the how the waves are created in the cosmic collision of black holes, and why the waves can never be detected by telescope. And, most revealingly,

she delves into the lives and fates of the four scientists currently engaged in--and obsessed with--discerning this soundtrack of the universe's history. Levin's account of the surprises, disappointments, achievements, and risks of this unfolding story provides us with a uniquely compelling and intimate portrait of the people and processes of modern science"--

Lodestone Book One

Kripslod (from Realmspeak) (1) An implement that is not only useless for the application, but also dangerous to the user. (2) A bigoted, loud, and whiny complainer who causes great trouble for himself and all those around him. What would you do if you were taken from your home on Earth and brought to live on a planet in the farthest reaches of the Galaxy? Would you join a rebel band fighting to topple an oppressive regime? Would you enlist in an interplanetary space expedition and help search the universe for alien civilizations? Would you battle to save the human race from murderous robots? Not if you're Teodor Korzeniowski. No, he doesn't have time for things like that. He is much too busy trying to get an extra pillow on a Port Leyken Spaceways' interstellar economy flight from Boulanger-Four to I Taisto Station. Welcome to the new worlds of Teodor Korzeniowski—formerly of Utica, NY and now a reluctant Citizen of the Realm. Here he will be knocked-over and stepped on by the biggest and toughest space-faring carnivores in our Galaxy. He'll meet and become the legal mate of a human female medical technician whose ancestors were once curiosities in an interplanetary traveling menagerie. He'll join his mate in attending the graduation of new officers in the Imperial Majesty's dreaded Secret Police. Then endanger them both when he becomes the typical 'ugly American' and gives his opinions about everything and everyone. Including her Imperial Majesty and her need to lose more than a little weight. In this volume, Teodor and his long-suffering mate will be joined by: Guard Admiral Reinier of the Political Police. (He insists that the condiments on the tables in the officer's mess be arranged symmetrically at all times.) Teodor's father-in-law. (He watches etiquette programs on the screens and still has a few choice metaphors for his unemployed son-in-law from Earth.) And the usual assortment of radical terrorists, waiters, psychotic racists, police, muggers, pensioners, medical technicians, politicians, opera singers and pirates. It is never dull when you travel our Galaxy with Teodor Korzeniowski!

Inside The Knowledge - Volume 1 is a short overview of everything related to the cosmo, surrounding us with its deep black tones. Find more about black holes and nebulae, all in one place. Stars, how they function, and how bright they are. The first chapter includes the problem of facing infinity, whether it exists or not. We explore everything in very brief words, yet with a bunch of knowledge, all put together inside a book. Other main subcategories include the shape of the universe, how big it is and how wide, including all the galaxies, and whatever body is found in the solar system or very far away. And to top it all off with fun, the language is very smart and easy to read, with fun easter eggs and very oddly cool facts. The book is originally long 100 pages, so it may vary, but it symbolizes how great it is to read short books. This pumps knowledgeable juice into your brain, a book at a time, instead of a chapter.

A STANDALONE SEQUEL TO THE BEST-SELLING DARK SPACE SERIES THE UNIVERSE IS DARKER THAN WE THOUGHT... Lucien Ortane is a Paragon in the Etherian Empire. His job is to explore the universe and spread Etherian doctrines of peace, justice, and immortality to sentient beings everywhere. Like all Paragons, and most citizens, Lucien believes that Etherus, the benevolent ruler of the Empire, is exactly who he claims to be: the one true God and creator of the universe. But not everyone is a believer. The Academy of Science circulates a petition to send a mission to the cosmic horizon and learn the true nature of the universe. Over a billion people sign it, and Etherus grants their request, but with a dire warning: evil is lurking in the dark. Undaunted by this warning, three hundred million scientists from the Academy prepare to leave the Empire on what will be the longest and most incredible journey in history. A small group of Paragons also join the mission, each of them for their own reasons. Lucien Ortane tells himself that he's going in order to settle other people's doubts, and to keep a bunch of hapless scientists safe. After all, he's a Paragon, one of Etherus's most faithful servants. Yet even the faithful have doubts. Is the universe infinite? Does it have an edge? Is it shaped like a sphere, or connected like a torus? Did it need a creator, or does it cycle endlessly, god unto itself? These are the questions that the Academy is trying to answer, but the answers they get could be their undoing. God or not, Etherus was telling the truth about one thing: evil is lurking in the dark....

Introduces basic concepts about outer space, from the sun and the moon to the planets and space exploration.

Seven billion people on earth; it was only a matter of time before you discovered the truth. Your legends--your myths and religions--have called us by many names. Since the beginning, our kind has walked among you as your protectors. We are the only ones who know who you are and why you are here. He wasn't meant to disappear; you weren't meant to know why. Our objective was clear: hunt them, kill them and leave. Once you know, there will be no going back. They will come for you. Are you ready?

A child's dream takes us on a journey through space. The child looks for a place to land while exploring each planet, but some are too hot, some are too cold, and some are just made of liquid and gas. Only planet Earth is just right. Fun rhyming text introduces children to each planet and basic facts about it. The text is accompanied by stunning images of a rocket traveling through the solar system, interspersed by close up images of each planet in order. While each planet is amazing in its own way, there is only one we can call home. If parents choose, this can be the start to a conversation about how we can take better care of our planet. Trill and Bajor

Book Three of The Sigil Trilogy

Adam Christopher's dazzling first novel, Empire State, was named the Best Book of 2012 by SciFi Now magazine. Now he explores new dimensions of time and space in The Burning Dark. Back in the day, Captain Abraham Idaho Cleveland had led the Fleet into battle against an implacable machine intelligence capable of devouring entire worlds. After saving a planet, and getting a bum robot knee in the process, he finds himself relegated to one of the most remote backwaters in Fleetspace, overseeing the decommissioning of a semi-deserted space station. The station's reclusive commandant is nowhere to be seen. Persistent malfunctions plague the station's systems while interference from a toxic purple star makes even ordinary communications problematic. Alien shadows and whispers seem to haunt the lonely corridors and airlocks, fraying the nerves of everyone aboard. Isolated and friendless, Cleveland reaches out to the universe via an old-fashioned space radio, only to tune in to a strange, enigmatic signal: a woman's voice that echoes across a thousand light-years of space. But is the transmission just a random bit of static from the past--or a warning of an undying menace beyond mortal comprehension?

A poignant tale of love and friendship in a world beyond hope...Outpost Three: a huddle of crumbling buildings choked by a concrete wall. Cracked pavement, rusted metal, splintering boards. Huge robotic Sentries police the streets, but the Ten Laws are broken every time one turns its back.Eden is determined, smart, and a born survivor. Stripped of her memories and dumped on the streets of the Outpost, slavers and starvation are only the beginning of her problems. A devastating conflict is coming that threatens to consume her world and tear her newfound family apart.Life is harsh. It makes no exceptions. Not even for the innocent. "Absolutely heart-stopping! Lt. Commander Heskan and Komandor Lombardi have only one thing in common - the will to survive. Bitter rivals for over a century, the Brevic Republic and the Hollaran Commonwealth are at war. Cultures that shared a common Terran ancestry have been isolated for decades. Now, Heskan's escort ships must protect Lombardi's heavy cruisers as they are forced to run together into unexplored space from a devastating threat. Each commander faces dissension in the ranks, even as they try to unite their fleets and find some way to escape the fate of so many of their fallen comrades. For the duration of the tenuous truce, there is a singular objective... make it home.Yet there can be only one destination at the end of their journey, and only half of the fleet will be safe, if they reach the Republic or Commonwealth at all. If the warring governments cannot be trusted to secure safe passage of the allied crews, how can the two commanders trust each other?This is Book 3 in the This Corner of the Universe series, continuing the story of the original crew of BRS Anelace and her captain.
