Dark Tourism Burns & Oates

Humanity has been fascinated with recent death, disaster, and atrocity since the earliest days of pilgrimage -- indeed, many consider this morbid curiosity to be the origin of tourism. Modern times have seen a revival of tourism "products" allied to these dark sites. Lennon and Foley have spent many years researching what they call Dark Tourism across the globe. This provocative book seeks to explain this phenomena by focusing in particular on concentration camps in Poland and Germany, and sites in the U.S. ranging from the Pearl Harbor Visitor Center to the Sixth Floor in Dallas and the U.S. Holocaust Memorial Museum in Washington, D.C.

This research-based textbook covers 15 chapters on food, film, shopping, medical, ghost, and suicide tourism, based on research conducted over 15 years on tourists from East Asia and Southeast Asia, the UK, the USA, Australia, Germany, and New Zealand. It introduces students, researchers, educators, tourist bureaus, and tour operators to the demands of affluent tourists from the newly industrialized countries of East Asia and

Southeast Asia.

This three volume reference series provides an authoritative and comprehensive set of volumes collecting together the most influential articles and papers on tourism, heritage and culture. The papers have been selected and introduced by Dallen Timothy, one of the leading international scholars in tourism research. The first volume 'Managing Heritage and Cultural Tourism Resources' deals primarily with issues of conservation, interpretation, impacts of tourism and the management of those impacts. Sold individually and as a set, this series will prove an essential reference work for scholars and students in geography, tourism and heritage studies, cultural studies and beyond.

Modern Transformations in Leisure and Travel

Memorial sites, sites of "dark tourism," are vernacular spaces that are continuously negotiated, constructed, and reconstructed into meaningful places. Using the locale of the 9/11 tragedy, Joy Sather-Wagstaff explores the constructive role played by tourists in understanding social, political, and emotional impacts of a violent event that has ramifications far beyond the local population. Through in-depth interviews, photographs, graffiti, even souvenirs, she compares

*the 9/11 memorial with other hurtful sites—the Oklahoma City National Memorial, Vietnam Veteran’s Memorial, and others—to show how tourists construct and disperse knowledge through performative activities, which make painful places salient and meaningful both individually and collectively. Since the late 1970s human remains in museum collections have been subject to claims and controversies, such as demands for repatriation by indigenous groups who suffered under colonization. These requests have been strongly contested by scientists who research the material and consider it unique evidence. This book charts the influences at play on the contestation over human remains and examines the construction of this problem from a cultural perspective. It shows that claims on dead bodies are not confined to once colonized groups. A group of British Pagans, Honouring the Ancient Dead, formed to make claims on skeletons from the British Isles, and ancient human remains, bog bodies and Egyptian mummies, which have not been requested by any group, have become the focus of campaigns initiated by members of the profession, at times removed from display in the name of respect. By drawing on empirical research including extensive interviews with the claims-making groups, ethnographic work, document, media, and policy analysis, *Contesting Human Remains in Museum Collections* demonstrates that strong internal influences do in fact exist. The only book to examine the construction of contestation over human remains from a sociological perspective, it advances an emerging area of academic research, setting the terms of debate, synthesizing disparate ideas, and*

making sense of a broader cultural focus on dead bodies in the contemporary period.

A stunning, powerful debut novel set against the backdrop of the Cambodian War, perfect for fans of Chris Cleave and Chimamanda Ngozi Adichie For seven-year-old Raami, the shattering end of childhood begins with the footsteps of her father returning home in the early dawn hours bringing details of the civil war that has overwhelmed the streets of Phnom Penh, Cambodia's capital. Soon the family's world of carefully guarded royal privilege is swept up in the chaos of revolution and forced exodus. Over the next four years, as she endures the deaths of family members, starvation, and brutal forced labour, Raami clings to the only remaining vestige of childhood - the mythical legends and poems told to her by her father. In a climate of systematic violence where memory is sickness and justification for execution, Raami fights for her improbable survival. Displaying the author's extraordinary gift for language, In the Shadow of the Banyan is a testament to the transcendent power of narrative and a brilliantly wrought tale of human resilience. 'In the Shadow of the Banyan is one of the most extraordinary and beautiful acts of storytelling I have ever encountered' Chris Cleave, author of The Other Hand 'Ratner is a fearless writer, and the novel explores important themes such as power, the relationship between love and guilt, and class. Most remarkably, it depicts the lives of characters forced to live in extreme circumstances, and investigates how that changes them. To read In the Shadow of the Banyan is to be left with a profound sense of being witness to a tragedy of history' Guardian 'This is an extraordinary debut ... as beautiful as it is

heartbreaking' Mail on Sunday

To consume tourism is to consume experiences. An understanding of the ways in which tourists experience the places and people they visit is therefore fundamental to the study of the consumption of tourism. Consequently, it is not surprising that attention has long been paid in the tourism literature to particular perspectives on the tourist experience, including demand factors, tourist motivation, typologies of tourists and issues related to authenticity, commodification, image and perception. However, as tourism has continued to expand in both scale and scope, and as tourists' needs and expectations have become more diverse and complex in response to transformations in the dynamic socio-cultural world of tourism, so too have tourist experiences. Tourist Experience provides a focused analysis into tourist experiences that reflect their ever-increasing diversity and complexity, and their significance and meaning to tourists themselves. Written by leading international scholars, it offers new insights into emergent behaviours, motivations and sought meanings on the part of tourists based on five contemporary themes determined by current research activity in tourism experience: dark tourism experiences, experiencing poor places, sport tourism experiences, writing the tourist experience and researching tourist experiences: methodological approaches. The book critically explores these experiences from multidisciplinary perspectives and includes case studies from a wide range of geographical regions. By analyzing these contemporary tourist experiences, the book will provide further understanding of the consumption of

Holidays in the Danger Zone exposes the mundane and everyday interactions between two seemingly opposed worlds: warfare and tourism. Debbie Lisle shows how a tourist sensibility shapes the behavior of soldiers in war—especially the experiences of Western military forces in “exotic” settings. This includes not only R&R but also how battlefields become landscapes of leisure and tourism. She further explores how a military sensibility shapes the development of tourism in the postwar context, from “Dark Tourism” (engaging with displays of conflict and atrocity) to exhibitions of conflict in museums and at memorial sites, as well as advertising, film, journals, guidebooks, blogs, and photography. Focused on how war and tourism reinforce prevailing modes of domination, Holidays in the Danger Zone critically examines the long historical arc of the war – tourism nexus—from nineteenth-century imperialism to World War I and World War II, from the Cold War to globalization and the War on Terror.

Niche Tourism examines one of the fastest growing areas within the tourism sector. This book provides an integrated picture of speciality/niche tourism as a whole looking at both the 'macro' and 'micro' niche area. It has a comprehensive theoretical framework, and discusses initiatives, policies and strategies adopted internationally. With an emphasis on linking theory to practice, it is underpinned by up-to-date international case studies from around the world. Divided into 3 parts, it covers a variety of aspects under the headings of special interest tourism, tradition and culture base tourism

and activity-based tourism.

In this book Tiya Miles explores the popular yet troubling phenomenon of "ghost tours," frequently promoted and experienced at plantations, urban manor homes, and cemeteries throughout the South. As a staple of the tours, guides entertain paying customers by routinely relying on stories of enslaved black specters. But who are these ghosts? Examining popular sites and stories from these tours, Miles shows that haunted tales routinely appropriate and skew African American history to produce representations of slavery for commercial gain. "Dark tourism" often highlights the most sensationalist and macabre aspects of slavery, from salacious sexual ties between white masters and black women slaves to the physical abuse and torture of black bodies to the supposedly exotic nature of African spiritual practices. Because the realities of slavery are largely absent from these tours, Miles reveals how they continue to feed problematic "Old South" narratives and erase the hard truths of the Civil War era. In an incisive and engaging work, Miles uses these troubling cases to shine light on how we feel about the Civil War and race, and how the ghosts of the past are still with us.

"Travel is no longer a past-time but a colossal industry, arguably one of the biggest in the world and second only to oil in importance for many poor countries. One out of 12 people in the world are employed by the tourism industry which contributes \$6.5 trillion to the world's economy. To investigate the size and effect of this new industry, Elizabeth Becker traveled the globe. She speaks to the Minister of Tourism of Zambia who thinks licensing foreigners to kill wild animals is a good way to make money and then to a Zambian travel guide who takes her to see the rare endangered sable antelope. She travels to Venice where community groups are fighting to stop the tourism industry from pushing them out of

their homes, to France where officials have made tourism their number one industry to save their cultural heritage; and on cruises speaking to waiters who earn \$60 a month--then on to Miami to interview their CEO. Becker's sharp depiction reveals travel as a product; nations as stewards. Seeing the tourism industry from the inside out, the world offers a dizzying range of travel options but very few quiet getaways"--

The Darker Side of Travel is a contemporary and comprehensive analysis of dark tourism. Drawing on existing literature, numerous examples and introducing new conceptual perspectives, it develops a theoretically informed foundation for examining the demand for and supply of dark tourism experiences. It also explores issues relevant to the development, management and interpretation of visitor sites and attractions associated with death, disaster and suffering.

The Routledge Handbook of Tourism Cities presents an up-to-date, critical and comprehensive overview of established and emerging themes in urban tourism and tourist cities. Offering socio-cultural perspectives and multidisciplinary insights from leading scholars, the book explores contemporary issues, challenges and trends. Organised into four parts, the handbook begins with an introductory section that explores contemporary issues, challenges and trends that tourism cities face today. A range of topics are explored, including sustainable urban tourism, overtourism and

urbanisation, the impact of terrorism, visitor–host interactions, as well as reflections on present and future challenges for tourism cities. In Part II the marketing, branding and markets for tourism cities are considered, exploring topics such as destination marketing and branding, business travellers and exhibition hosting. This section combines academic scholarship with real-life practice and case studies from cities. Part III discusses product and technology developments for tourism cities, examining their supply and impact on different travellers, from open-air markets to creative waterfronts, from social media to smart cities. The final Part offers examples of how urban tourism is developing in different parts of the world and how worldwide tourism cities are adapting to the challenges ahead. It also explores emerging forms of specialist tourism, including geology and ecology-based tourism, socialist heritage and post-communist destination tourism. This handbook fills a notable gap by offering a critical and detailed understanding of the diverse elements of the tourist experience today. It contains useful suggestions for practitioners, as well as examples for theoretical frameworks to students in the fields of urban tourism and tourism cities. The handbook will be of interest to scholars and students working in urban tourism, heritage studies, human geography, urban studies and urban planning, sociology, psychology and business studies. Reaching some of the darkest and most unsettling corners of the world, this is a compendium of travel destinations like no other. Author Peter Hohenhaus has visited and photographed all the places featured in the book, and brings his first-hand knowledge to the reader. Dark tourism has seen a surge in popularity in the last decade and this is the first book to bring together 300

destinations in a readable and fascinating guide. From nuclear bunkers and disaster sites to strange medical museums and eerie catacombs, this book has something for everyone who seeks a travel experience with true meaning.

Most of the narratives packaged for New Orleans's many tourists cultivate a desire for black culture—jazz, cuisine, dance—while simultaneously targeting black people and their communities as sources and sites of political, social, and natural disaster. In this timely book, the Americanist and New Orleans native Lynnell L. Thomas delves into the relationship between tourism, cultural production, and racial politics. She carefully interprets the racial narratives embedded in tourism websites, travel guides, business periodicals, and newspapers; the thoughts of tour guides and owners; and the stories told on bus and walking tours as they were conducted both before and after Katrina. She describes how, with varying degrees of success, African American tour guides, tour owners, and tourism industry officials have used their own black heritage tours and tourism-focused businesses to challenge exclusionary tourist representations. Taking readers from the Lower Ninth Ward to the White House, Thomas highlights the ways that popular culture and public policy converge to create a mythology of racial harmony that masks a long history of racial inequality and structural inequity.

Atlas of Dark Destinations

Travels to the Darkest Sites on Earth

Dark tourism has become widespread and diverse. It has passed into popular culture vernacular, deployed in guide books as a short hand descriptor for sites that are associated with death, suffering and trauma. However, whilst books have been devoted to dark tourism as a general topic no single text has sought to explore dark tourism in spaces where crime - mass murder, genocide, State sanctioned torture and violence - has occurred as an organising theme. *Dark Tourism and Crime* explores the socio-cultural contours of this unique type of tourism and explains why spaces/places where crime has occurred fascinate and attract tourists. The book is marked by an ethics of respect for the suffering a place has experienced and an imperative to learn something tangible about the history and legacy of that suffering. Based on empirical ethnographic research it takes the reader from the remnants of Auschwitz concentration camp to the tranquil Australian island of Tasmania to explore precisely what things a dark tourist might encounter - architecture, art installations, gardens, memorials, physical traces of crime - and how these things invoke and evoke past crimes. This volume furthers understanding of dark tourism and will be of interest to students, researchers and academics of criminology, tourism and cultural studies.

More than 50 years after their breakup, the Beatles are still attracting fans from various generations, all while retaining their original fan base from the 1960s. Why have those first-generation fans continued following the Beatles and are now introducing their grandchildren to the group? Why are current teens affected by the band's music? And perhaps most importantly, how and why do the Beatles continue to resonate with successive generations? Unlike other bands of their era,

the Beatles seem permanently frozen in time, having never descended into "nostalgia act" territory. Instead, even after the announcement of the band's breakup in 1970, the group has maintained its cultural and musical relevance. Their timeless quality appeals to younger generations while maintaining the loyalty of older fans. While the Beatles indeed represent a specific time period, their music and words address issues as meaningful today as they were during the Summer of Love: politics, war, sex, drugs, art, and creative liberation. As the first anthology to assess the nature of fan response and the band's enduring appeal, *Fandom and the Beatles: The Act You've Known for All These Years* defines and explores these unique qualities and the key ways in which this particular pop fusion has inspired such loyalty and multigenerational popularity.

First published in 2002. Routledge is an imprint of Taylor & Francis, an informa company.

This is a fully revised edition of the groundbreaking study on tourism, which was originally published in 1990. The original chapters have been empirically updated and many new research findings incorporated and evaluated. This Second Edition deepens our understanding of how the tourist gaze orders and regulates the relationship with the tourist environment, demarcating the 'other' and identifying the 'out-of-the-ordinary'. It elucidates the relationship between tourism and embodiment and elaborates on the connections between mobility as a mark of modern and postmodern experience and the attraction of tourism as a lifestyle choice. The result is a book that builds on the proven strengths of the first edition and revitalizes the argument to address the needs of researchers and students in the new century. Praise for the First Edition:

'There is much to be applauded here...this is an engaging and thought provoking book which should be read by those interested in advertising and the changing nature of contemporary culture' - Contemporary Sociology
'The book is written in a very accessible style that would serve as a good point of entry for anyone interested in leisure, tourism, and cultural change in contemporary societies. The scope of Urry's book is breathtaking, one is left with a feeling of coming to terms with the complex set of social relations that are tourism, both in their production and consumption' - Planning Practice and Research

'Dark tourism is the act of travel and visitation to sites, attractions and exhibitions which have real or recreated death, suffering or the seemingly macabre as a main theme' Ever since he can remember, Dom Joly has been fascinated by travel to odd places. In part this stems from a childhood spent in war-torn Lebanon, where instead of swapping marbles in the schoolyard, he had a shrapnel collection -- the schoolboy currency of Beirut. Dom's upbringing was interspersed with terrifying days and nights spent hunkered in the family basement under Syrian rocket attack or coming across a pile of severed heads from a sectarian execution in the pine forests near his home. These early experiences left Dom with a profound loathing for the sanitized experiences of the modern day travel industry and a taste for the darkest of places. And in this brilliantly odd

and hilariously told travel memoir, Dom Joly sets out on a quest to visit those destinations from which the average tourist would, and should, run a mile. The more insalubrious the place, the more interesting is the journey and so we follow Dom as he skis in Iran on segregated slopes, picnics in the Syrian Desert with a trigger-happy government minder and fires rocket propelled grenades at live cows in Cambodia (he missed on purpose, he just couldn't do it). Funny and frightening in equal measure, this is a uniquely bizarre and compelling travelogue from one of the most fearless and innovative comedians around.

Holocaust: Religious and Philosophical Implications is an anthology specifically designed for use as a textbook for courses on the Holocaust in universities and adult study groups. It is a compilation of what are now "classic" pieces in the voluminous literature on the Holocaust - pieces by Raul Hilberg, Hannah Arendt, Primo Levi, George Steiner, Richard Rubenstein and Irving Greenberg - all organized around what the editors have found to be the most often asked questions by their students: (1) Is the Holocaust unique? (2) What really happened in the ghettos and death camps? (3) Who knew what was going on? (4) How could people do the things they did? (5) What about God?

Governed by the thesis that the Holocaust left fundamental questions, Holocaust: Religious and Philosophical Implications, in addition to being organized around the five themes identified above, addresses the multiple implications of complexities such as resistance during the Holocaust, and Jewish and Christian identity after Auschwitz.

--

Dark Tourism, including visitation to places such as murder sites, battlefields and cemeteries is a growing phenomenon, as well as an emergent area of scholarly interest. Despite this interest, the intersecting domains of dark tourism and

place identity have been largely overlooked in the academic literature and this book aims to fill this void. The three main themes of Visitor Motivation, Destination Management and Place Interpretation are addressed in this book from both a demand and supply perspective by examining a variety of case studies from around the world. This edited volume takes the dark tourism discussion to another level by reinforcing the critical intersecting domains of dark tourism and place identity and, in particular, highlighting the importance of understanding this connection for visitors and destination managers. Written by leading academics in the area, this stimulating volume of 19 chapters will be valuable reading for postgraduate and advanced undergraduate students in a range of discipline areas; researchers and academics interested in dark tourism; and, other interested stakeholders including those in the tourism industry, government bodies and community groups.

This book brings together, explores and expands socio-spatial affect, emotion and psychoanalytic drives in tourism for the first time. Affect is to be found in visceral intensities and resonances that circulate around and shape encounters between and amongst tourists, local tourism representatives and places. When affect manifests, it can 'take shapes' in the form of emotions such as fun, joy, fear, anger and the like. When it remains a visceral force of latent bodily responses, affect overlaps with drives as expounded in psychoanalysis. The aim of the title, therefore, is to explore how and in what ways affects, emotions and drives are felt and performed in tourism encounters in places of socio-political turmoil such as Jordan, Palestine/Israel, with a detour to Iraq. Affective Tourism is highly innovative as it offers a new way of theorising tourism encounters bringing together, critically examining and expanding three areas of scholarship:

affective and emotional geographies, psychoanalytic geographies and dark tourism. It has relevance for tourism industries in places in the proximity of ongoing conflicts as it provides in-depth analyses of the interconnections between tourism, danger and conflict. Such understandings can lead to more socio-culturally and politically-sustainable approaches to planning, development and management of tourism. This ground breaking book will be of valuable reading for students and researchers from a number of fields such as tourism studies, geography, anthropology, sociology and Middle Eastern studies.

Tourism studies at Masters level are often divided into subsets of tourism such as environmental tourism, rural tourism and sports tourism. This book provides an overview of types of tourism, and common themes studied in courses to allow undergraduate students to become familiar with a wide range of tourism topics at a foundation level, allowing them to make an informed decision about their future studies and career. It will also be a useful text for providing a broad brush introduction to the major topics that

are covered in undergraduate courses. Popular subjects like urban tourism, festival.

The economic and sociocultural significance of tourism today cannot be overstated. With the rapid growth of travel and tourism, more and more research is being undertaken in this field, with particular attention paid to the concept of sustainability. This book broadens the reach of such studies by providing comprehensive and rigorous examinations of many issues and concepts related to sustainable tourism, with particular attention paid to Slovenia. It considers the area broadly, and presents in-depth discussions on many relevant and important tourism issues, covering topics from the sustainable use of cultural heritage in tourism and the development of sustainable jobs and professionalism in the tourism sector to the aspects of systemic management and logistic planning for tourist destinations, as well as the contributions that local governments make towards sustainable development and use of local resources. The

collection provides a unique and balanced view of both theoretical issues and practical cases and is a valuable reading for students, researchers and professionals in the field of tourism and sustainability. Provides a broad analysis of the nature and growth, business opportunities and the management problems they present, the range and types of activities available as well as the current importance and future status of this rapidly evolving industry. Global in scope, it features in-depth case studies written by renowned experts along with extensive statistical and graphic material.

Modern life is often described as an iron cage from which there is no escape. But popular culture venerates leisure and travel as authentic escape routes from routine and monotony.

However what kind of escape is tolerated in modern society? How is it shaped by historical expectations of leisure and travel? And what do we actually experience when we engage in leisure or travel activity? This fascinating and accomplished book tries

to supply answers to these questions. A major scholarly contribution to the sociological analysis of leisure, pleasure and travel, Dr Rojek's study is a radical challenge to the existing paradigmatic orthodoxy. Bryan S. Turner, University of Essex.

Virtual Traumasces and Exploring the
Roots of Dark Tourism

Dark Tourism is the practice of visiting sites associated with death. While participation increases, dark tourism remains a mystery, regarded as the tourist industry's dirty little secret. This book challenges the misconceptions of a ghoulish practice through the eyes of a self-confessed dark tourist, who has spent forty years visiting the world's dark sites. From the cobbled streets of Whitechapel on a Jack The Ripper walking tour to the snowy suicide forest of Aokigahara, Japan, H. E. Sawyer ticks off the darkest sites on earth. He visits locations that have promoted themselves to become major tourist attractions, contrasting with those dark places that seek to remain hidden from view. In the course of his travels

he wrestles with the ultimate question regarding dark tourism; why would anyone want to visit sites touched by death in the first place?

This book illustrates the tremendous outreach of tourism in search of extraordinary, spectacular and bizarre experiences. It covers tourism in out-of-the-ordinary environments (space tourism, Antarctic tourism, and adventure/heritage tourism in remote areas); dark tourism; other unconventional forms of tourism such as deep ecotourism and health tourism in salt mines; and other special-interest forms such as pro-poor tourism, senior tourism, and volunteer tourism. The book has 15 chapters and a subject index.

Mankind has been fascinated with and drawn to the macabre for many years. This is particularly evident in the growing popularity of dark tourism, which centers on locations known for death and suffering. Virtual Traumasclapes and Exploring the Roots of Dark Tourism is a pivotal reference source featuring the latest scholarly research in which the rise of new technology platforms is not only changing tourism worldwide, but also facilitating the access to areas of war, mourning, and disaster. Including coverage on a number of topics such as sexual tourism, disaster recovery, and capitalism, this publication is ideally designed for academicians, researchers, and students seeking current research on concepts and methodologies of the dark tourism industry. Archaeology – the study of human cultures through the analysis and interpretation of artefacts and material

remains – continues to captivate and engage people on a local and global level. Internationally celebrated heritage sites such as the pyramids—both Egyptian and Mayan—Lascaux caves, and the statues of Easter Island provide insights into our ancestors and their actions and motivation. But there is much more to archaeology than famous sites. Ask any archaeologist about their job and they will touch on archaeological theory, chemistry, geology, history, classical studies, museum studies, ethical practice, and survey methods, along with the analysis and interpretation of artefacts and sites. Archaeology is a much broader subject than its public image and branches into many other fields in the social and physical sciences. This multi-volume work provides a comprehensive and systematic coverage of archaeology that is unprecedented, not only in terms of the use of multi-media, but also in terms of content. It encompasses the breadth of the subject along with key aspects that are tapped from other disciplines. It includes all time periods and regions of the world and all stages of human development. Mostly importantly, this encyclopedia includes the knowledge of leading scholars from around the world. The entries in this encyclopedia range from succinct summaries of specific sites and the scientific aspects of archaeological enquiry to detailed discussions of archaeological concepts, theories and methods, and from investigations into the social, ethical and political dimensions of archaeological practice to biographies of leading archaeologists from throughout the world. The

different forms of archaeology are explored, along with the techniques used for each and the challenges, concerns and issues that face archaeologists today. The Encyclopedia of Global Archaeology has two outstanding innovations. The first is that scholars were able to submit entries in their own language. Over 300,000 words have been translated from French, Spanish, Portuguese, German, Italian, Japanese, Turkish and Russian. Many of these entries are by scholars who are publishing in English for the first time. This compendium is both a print reference and an online reference work. The encyclopedia's second major innovation is that it harnesses the capabilities of an online environment, enhancing both the presentation and dissemination of information. Most particularly, the continuous updating allowed by an online environment should ensure that the Encyclopedia of Global Archaeology is a definitive reference work for archaeology and archaeologists.

Investigating the challenges of promoting dark tourism in Rwanda

Desire and Disaster in New Orleans

Dark Tourism, as well as other terms such as Thanatourism and Grief Tourism, has been much discussed in the past two decades. This volume

provides a comprehensive exploration of the subject from the point of view of both practice - how Dark Tourism is performed, what practical and physical considerations exist on site - and interpretation - how Dark Tourism is understood, including issues pertaining to ethics, community involvement and motivation. It showcases a wide range of examples, drawing on the expertise of academics with management and consultancy experience, as well as those from within the social sciences and humanities. Contributors discuss the historical development of Dark Tourism, including its earlier incarnations across Europe, but they also consider its future as a strand within academic discourse, as well as its role within tourism development. Case studies include holocaust sites in Germany, as well as analysis of the legacy of war in places such as the Channel Islands and Malta. Ethical and myriad marketing considerations are also discussed in relation to Ireland, Brazil, Rwanda, Romania, U.K., Nepal and Bosnia-Herzegovina. This book covers issues that are of interest to students and staff across a spectrum of disciplines, from management to the arts and humanities, including conservation and heritage, site management, marketing and community participation. The concept of margins and limits is often referred to within the tourism academic literature and includes subjects as diverse as carrying capacities, peripheral economies, technological advancement, adventure

tourism, dark tourism and socially marginalized communities. After identifying a number of ways in which 'limits' might be defined *Taking Tourism to the Limits* explores concepts and challenges facing contemporary tourism in five main sections, namely in tourism planning and management, nature based tourism, dark tourism, adventure and sport tourism and the accommodation industry. Drawing upon case studies, current research and conceptualizations these different facets of the 'limits' are each introduced by the editors with commentaries that seek to identify themes and current practice and thinking in the respective domains. The picture that emerges is of an industry that reinvents itself in response to changing market parameters even while core issues of stakeholder equities and political processes remain problematic. International in scale, the book links with its companion piece *Indigenous Tourism – the commodification and management of culture* (also published by Elsevier) as an outcome of the very highly successful conference, *Taking Tourism to the Limits* hosted by the University of Waikato' Department of Tourism Management in 2003.

We live in a society that is bombarded by news of accidents, disasters and terrorist attacks. We are obsessed by the presence of death. It is commodified in newspapers, the media, entertainment and in our cultural consumption. This book explores the notion of an emergent class of "death-seekers" who consume

the spectacle of the disaster, exploring spaces of mass death and suffering. Sites that are obliterated by disasters or tragic events are recycled and visually consumed by an international audience, creating a death-seekers economy. The quest for the suffering of others allows for a much deeper reinterpretation of life, and has captivated the attention of many tourists, visiting sites such as concentration camps, disasters zones, abandoned prisons, and areas hit by terrorism. This book explores the notion of the death-seekers economy, drawing on the premise that the society of risk as imagined by postmodern sociology sets the pace to a new society: thana-capitalism. The chapters dissect our fascination with other's suffering, what this means for our own perceptions of the self, and as a tourist activity. It also explores the notion of an economy of impotence, where citizens feel the world is out of control. This compelling book will be interest to students and scholars researching dark tourism, tourist behaviour, disaster studies, cultural studies and sociology.

Papers presented at the Conference

'Death/Dark/Thanatourism' at New York University in April 2010.

Entanglements of War and Tourism

The Dark Tourist

Dark Tourism and Place Identity

Holidays in the Danger Zone

Niche Tourism

Gathers short stories, diaries, sermons, essays, and poems written in response to the Spanish Inquisition, martyrdom, Russian pogroms, and the Holocaust

This handbook is the definitive reference text for the study of "dark tourism", the contemporary commodification of death within international visitor economies. Shining a light on dark tourism and visitor sites of death or disaster allows us to better understand issues of global tourism mobilities, tourist experiences, the co-creation of touristic meaning, and "difficult heritage" processes and practices.

Adopting multidisciplinary perspectives from authors representing every continent, the book combines "real-world" viewpoints from both industry and the media with conceptual underpinning, and offers comprehensive and grounded perspectives of "heritage that hurts". The handbook adopts a progressive and thematic approach, including critical accounts of dark tourism history, dark tourism philosophy and theory, dark tourism in society and culture, dark tourism and heritage landscapes, the "dark tourist" experience, and the business of dark tourism. The Palgrave Handbook of Dark Tourism Studies will appeal to students and scholars with an interest in aspects of memorialisation and morality in sociology, death studies, history, geography, cultural studies, philosophy, psychology, business management, museology and heritage tourism

studies, politics, religious studies, and anthropology. This study tries to assess the challenges of promoting dark tourism in Rwanda. The study was guided by three objectives: To find dark tourism products in Rwanda; to investigate the challenges of promoting dark tourism in Rwanda and to establish measures that could be adopted to promote it. To achieve the set objectives, the study used a sample of 43 respondents randomly selected from staff of Rwanda Development Board (RDB), museum/memorial site managers and tour operators. Data was collected by use of questionnaire instrument and summarized in tables and graphs following the objectives of the study. Furthermore frequencies and percentages were calculated based on the data available. The findings indicates that there are various dark tourism products in Rwanda which included Kigali memorial center, Bisesero, Gatwaro Stadium and Gitesi memorial site. Less effective information dissemination, High cost charged to tourists and Lack of skilled staff are the challenges affecting the promotion of dark tourism. Measures that could be adopted to promote dark tourism in Rwanda are Improving marketing strategies, training of staff and service providers and improving the variety and accessibility of dark tourism attractions. The study concludes by noting that identifying the successful practices in management, branding, marketing, and

pricing strategies of dark tourism attractions around the world can aid in applying these ideas towards improving the dark tourism industry in Rwanda. The study recommends that since we are living in a global world, using the mass media advertisements, specifically TV, Newspapers or other tourism information brochures is significantly important in attracting more dark tourists.
