The field of financial econometrics has exploded over the last decade This book represents an integration of theory, methods, and examples using the S-PLUS statistical modeling language and the S+FinMetrics module to facilitate the practice of financial econometrics. This is the first book to show the power of S-PLUS for the analysis of time series data. It is written for researchers and practitioners in the finance industry, academic researchers in economics and finance, and advanced MBA and graduate students in economics and finance. Readers are assumed to have a basic knowledge of S-PLUS and a solid grounding in basic statistics and time series concepts. This Second Edition is updated to cover S+FinMetrics 2.0 and includes new chapters on copulas, nonlinear regime switching models, continuous-time financial models, generalized method of moments, semi-nonparametric conditional density models, and the efficient method of moments. Eric Zivot is an associate professor and Gary Waterman Distinguished Scholar in the Economics Department, and adjunct associate professor of finance in the Business School at the University of Washington. He regularly teaches courses on econometric theory, financial econometrics and time series econometrics, and is the recipient of the Henry T. Buechel Award for Outstanding Teaching. He is an associate editor of Studies in Nonlinear Dynamics and Econometrics. He has published papers in the leading econometrics journals, including Econometrica, Econometric Theory, the Journal of Business and Economic Statistics, Journal of Econometrics, and the Review of Economics and Statistics. Jiahui Wang is an employee of Ronin Capital LLC. He received a Ph.D. in Economics from the University of Washington in 1997. He has published in leading econometrics journals such as Econometrica and Journal of Business and Economic Statistics, and is the Principal Investigator of National Science Foundation SBIR grants. In 2002 Dr. Wang was selected as one of the "2000 Outstanding Scholars of the 21st Century" by International Biographical Centre.

You've experienced the shiny, point-and-click surface of your Linux computer—now dive below and explore its depths with the power of the command line. The Linux Command Line takes you from your very first terminal keystrokes to writing full programs in Bash, the most popular Linux shell. Along the way you'll learn the timeless skills handed down by generations of gray-bearded, mouse-shunning gurus: file navigation, environment configuration, command chaining, pattern matching with regular expressions, and more. In addition to that practical knowledge, author William Shotts reveals the philosophy behind these tools and the rich heritage that your desktop Linux machine has inherited from Unix supercomputers of yore. As you make your way through the book's short, easily-digestible chapters, you'll learn how to:

- * Create and delete files, directories, and symlinks
- * Administer your system, including networking, package installation, and process management
- * Use standard input and output, redirection, and pipelines
- * Edit files with Vi, the world ' s most popular text editor
- * Write shell scripts to automate common or boring tasks
- * Slice and dice text files with cut, paste, grep, patch, and sed

Once you overcome your initial "shell shock," you'll find that the command line is a natural and expressive way to communicate with your computer. Just don't be surprised if your mouse starts to gather dust. A featured resource in the Linux Foundation's "Evolution of a SysAdmin"

The book that keeps you from chucking your computer out your Window Windows 11 arrives with the promise of being the fastest, most secure, and most flexible of the operating system yet. That doesn't mean it's always easy to make your computer work faster, more securely, and more flexible. This book offers help for those moments when you ask yourself "what the heck is my computer doing?" You'll find guidance on how to get around the newly updated Windows 11 interface, how to use new Windows tools like Teams and widgets, and even how to bring Android apps on board your device to simplify your processes. Once you know your way around, you'll spend less time answering Windows questions and more time getting things done.

An award-winning scientist offers his unorthodox approach to childrearing: “ Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions ” (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you ’ re like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley ’ s sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You ’ ll be laughing and learning at the same time.

Trying to get your message heard? Build an iconic brand? Welcome to the battlefield. The story wars are all around us. They are the struggle to be heard in a world of media noise and clamor. Today, most brand messages and mass appeals for causes are drowned out before they even reach us. But a few consistently break through the din, using the only tool that has ever moved minds and changed behavior—great stories. With insights from mythology, advertising history, evolutionary biology, and psychology, viral storyteller and advertising expert Jonah Sachs takes readers into a fascinating world of seemingly insurmountable challenges and enormous opportunity. You'll discover how:

- Social media tools are driving a return to the oral tradition, in which stories that matter rise above the fray*
- Marketers have become today's mythmakers, providing society with explanation, meaning, and ritual*
- Memorable stories based on timeless themes build legions of eager evangelists*
- Marketers and audiences can work together to create deeper meaning and stronger partnerships in building a better world*
- Brands like Old Spice, The Story of Stuff, Nike, the Tea Party, and Occupy Wall Street created and sustained massive viral buzz*

Winning the Story Wars is a call to arms for business communicators to cast aside broken traditions and join a revolution to build the iconic brands of the future. It puts marketers in the role of heroes with a chance to transform not just their craft but the enterprises they represent. After all, success in the story

wars doesn't come just from telling great stories, but from learning to live them.

A Doody's Core Title 2012 This new illustrated guide to assistive technologies and devices chronicles the use of AT/AD - technology used by individuals with disabilities to perform functions that might otherwise be difficult or impossible. This book empowers people to use assistive technologies to overcome some of their physical or mental limitations and have a more equal playing field. It includes real-life examples about how people with disabilities are using assistive technology (AT) to assist them in daily tasks, and discusses emotional issues related to AT/AD.

Yeni iletişim teknolojileri ile iletişim sürecinde söz konusu olan zaman ve mekân sınırlaması ortadan kalkmış ve geleneksel iletişim araçları ile gerçekleşen iletişimde sadece mesajın alıcısı olarak pasif konumda bulunan hedef kitleler, yeni iletişim ortamları ile iletişim faaliyetlerinde aktif hale gelmiş bulunmaktadır. Bu bağlamda ilişki kavramının ve çift yönlü iletişimin öne çıktığı ve önemli olduğu günümüz koşullarında çift yönlülüğü sağlayan geribildirim kullanımı da büyük önem taşımaktadır. Ancak, günümüzde sosyal medyanın, dijital içeriğin ve mobil cihazların çoğalması, sürekli iletişim bekleyen hedef kitle, paydaş ve kamular oluşturduğu için bu talebi karşılamak için kurumlar, gittikçe daha da kısalan zaman çerçevelerinde, hedef kitleleri, paydaşları ve kamuları ile iletişimi sağlamak durumunda kalmaktadır. Aynı zamanda çoğu kurum hızla değişen, rekabetçi, düzensiz ve kaotik ortamlarda faaliyet gösterdiği için aktif bir şekilde etkili geribildirim almayı da zaman kaybı olarak algılamaktadır. Bundan dolayı, küreselleşme ile birlikte zaman ve mekân sınırının ortadan kalktığı ve rekabet yarışının iyice hız kazandığı günümüz koşullarında, geribildirim alıcısını çok fazla boğmaması, alıcının bir kerede, geri besleme yükünü alma kapasitesini anlaması ve hızlı olması gerekmektedir. Ayrıca kurumlar, geribildirim alsalar dahi faaliyet gösterdikleri sistem içinde ekonomik, teknolojik, demografik, sosyal ve politik faktörlerden kaynaklanan sürekli değişen dış baskılar, kurumların iç sistemleri ve kontrol sistemleri üzerinde etkili olarak öngörülemeyen durumlara sebebiyet vermektedir. Bu öngörülemeyen durumlar ise kurumların faaliyetlerini etkileyebilmektedir.
