The Parliamentary Information and Communication Technology (PICT) was established in January 2006, bringing together ICT staff and other resources from across both Houses of Parliament into a unified organisation. The Committee's report focuses on those services provided for MPs and their staff, with the aim of ensuring that processes are put in place to enable Members' services to be delivered efficiently and to an agreed standard. Issues considered include: how ICT services are currently provided; best practice from comparable systems in universities and private sector franchises; the evolving use by MPs of ICT services; matters of concern to individual MPs including balancing issues of stability and flexibility, constituency provision, customer service and provision of equipment;

by researchers and logistics professionals to effectively manage the continued expansion of logistics transportation systems, which is expected to reach an estimated 25 billion tons in the United States alone by 2045. This book provides an ample understanding of logistics transportation systems, including basic concepts, in-depth modeling analysis, and network analysis for researchers and practitioners. In addition, it covers policy issues related to transportation logistics, such as security, rules and regulations, and emerging issues including reshoring. This book is an ideal guide for academic researchers and both undergraduate and graduate students in transportation modeling, supply chains, planning, and systems. It is also useful to transportation practitioners involved in planning, feasibility studies, consultation and policy for transportation systems, logistics, and
