*The unforgettable memoir of a woman at the front lines of the civil rights movement—a harrowing account of black life in the rural South and a powerful affirmation of one person’s ability to affect change. “Anne Moody’s autobiography is an eloquent, moving testimonial to her courage.”—Chicago Tribune Born to a poor couple who were tenant farmers on a plantation in Mississippi, Anne Moody lived through some of the most dangerous days of the pre-civil rights era in the South. The week before she began high school came the news of Emmet Till’s lynching. Before then, she had “known the fear of hunger, hell, and the Devil. But now there was . . . the fear of being killed just because I was black.” In that moment was born the passion for freedom and justice that would change her life. A straight-A student who realized her dream of going to college when she won a basketball scholarship, she finally dared to join the NAACP in her junior year. Through the NAACP and later through CORE and SNCC, she experienced firsthand the demonstrations and sit-ins that were the mainstay of the civil rights movement—and the arrests and jailings, the shotguns, fire hoses, police dogs, billy clubs, and deadly force that were used to destroy it. A deeply personal story but also a portrait of a turning point in our nation’s destiny, this autobiography lets us see history in the making, through the eyes of one of the footsoldiers in the civil rights movement. Praise for Coming of Age in Mississippi “A history of our time, seen from the bottom up, through the eyes of someone who decided for herself that things had to be changed . . . a timely reminder that we cannot now relax.”—Senator Edward Kennedy, The New York Times Book Review “Something is new here . . . rural southern black life begins to speak. It hits the page like a natural force, crude and undeniable and, against all principles of beauty, beautiful.”—The Nation “Engrossing, sensitive, beautiful . . . so candid, so honest, and so touching, as to make it virtually impossible to put down.”—San Francisco Sun-Reporter*

*Introductory texts on psychological testing and evaluation historically are not in short supply. Typically, however, such texts have been relatively superficial in their discussion of clinical material and have focused primarily on the theoretical and psychometric properties of indi vidual tests. More practical, clinically relevant presentations of psychological instruments have been confined to individual volumes with advanced and often very technical information geared to the more sophisticated user. Professors in introductory graduate courses are often forced to adopt several advanced texts to cover the material, at the same time helping students wade through unnecessary technical information in order to provide a basic working knowl edge of each test. Understanding Psychological Assessment is an attempt to address these concerns. It brings together into a single volume a broad sampling of the most respected instruments in the psychologist’s armamentarium along with promising new tests of cognitive, vocational, and personality functioning. Additionally, it presents the most updated versions of these tests, all in a practical, clearly written format that covers the development, psychometrics, adminstra tive considerations, and interpretive hypotheses for each instrument. Clinical case studies allow the reader to apply the interpretive guidelines to real clinical data, thereby reinforcing basic understanding of the instrument and helping to insure that both the student and practi tioner can actually begin to use the test. Understanding Psychological Assessment includes cognitive and personality tests for adults, children, and adolescents, as well as chapters on the theory of psychological measurement and integrated report writing.*

*Archaeological 3D GIS provides archaeologists with a guide to explore and understand the unprecedented opportunities for collecting, visualising, and analysing archaeological datasets in three dimensions. With platforms allowing archaeologists to link, query, and analyse in a virtual, georeferenced space information collected by different specialists, the book highlights how it is possible to re-think aspects of theory and practice which relate to GIS. It explores which questions can be addressed in such a new environment and how they are going to impact the way we interpret the past. By using material from several international case studies such as Pompeii, Catalhöyük, as well as prehistoric and protohistoric sites in Southern Scandinavia, this book discusses the use of the third dimension in support of archaeological practice. This book will be essential for researchers and scholars who focus on archaeology and spatial analysis, and is designed and structured to serve as a textbook for GIS and digital archaeology courses. The Open Access version of this book, available at www.taylorfrancis.com, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license.*

*At a 1913 National Geographic Society gala, Hiram Bingham III, the American explorer celebrated for finding the “lost city” of the Andes two years earlier, suggested that Machu Picchu “is an awful name, but it is well worth remembering.” Millions of travelers have since followed Bingham’s advice. When Bingham first encountered Machu Picchu, the site was an obscure ruin. Now designated a UNESCO World Heritage Site, Machu Picchu is the focus of Peru’s tourism economy, Mark Rice’s history of Machu Picchu in the twentieth century—from its “discovery” to today’s travel boom—reveals how Machu Picchu was transformed into both a global travel destination and a powerful symbol of the Peruvian nation. Rice shows how the growth of tourism at Machu Picchu swayed Peruvian leaders to celebrate Andean culture as compatible with their vision of a modernizing nation. Encompassing debates about nationalism, Indigenous peoples’ experiences, and cultural policy—as well as development and globalization—the book explores the contradictions and ironies of Machu Picchu’s transformation. On a broader level, it calls attention to the importance of tourism in the creation of national identity in Peru and Latin America as a whole.*

*As existing research, conferences and publications on wildland fire are oriented towards the technical aspects of prevention and firefighting, the Centre d’Etudes et de Recherches Internationales et Communautaires (CERIC) and the Union regionale du sud-est pour la sauvegarde de la vie, de la nature et de l’environnement (URVN) decided to investigate the legal aspects of these matters, an equally important, but much less well-researched field, by organising a world conference in 1991 at Aix-en-Provence, France. This volume is the result of that conference. Experts from thirteen countries in Africa, the Americas, Asia and Europe particularly affected by wildland fires were brought together to discuss six controversial questions: - What should be the law concerning occupation and construction rights in forests? - Should swamping out take place and, if so, on what basis and with which objectives? - What are the essentials of organised firefighting? - Should replanting be carried out? - What indemnities should be available to the victims of fire? - What should be the penal sanctions? The Aix-en-Provence Charter adopted at the end of the Conference, and reproduced in this volume, brings together various principles concerning the above points, which could serve as a guide for national wildland fire policies worldwide.*
