Twelve Years a Slave (1853) is a memoir and slave narrative by Solomon Northup, as told to and edited by David Wilson. Northup, a black man who was born free in New York, details his kidnapping in Washington, D.C. and subsequent sale into slavery. After having been kept in bondage for 12 years in Louisiana by various masters, Northup was able to write to friends and family in New York, who were in turn able to secure his release. Northup's account provides extensive details on the slave market in Washington, D.C. and New Orleans and describes at length cotton and sugar cultivation on major plantations in Louisiana. Born and raised in the culinary capital of Milan, Italy, it was destiny that Luca inherited his passion for food and culinary

exploration in his homeland. Luca's interest and passion for food commenced with his Mom and Nonna when he was just eight years old, taking his first few steps with them in the direction of becoming a chef. One of today's most successful chefs and food consultants in the world, this is Luca's journey from Milan, Italy to Australia and beyond, and how his food journey has made him one of the most sought after chefs. From what he learned as the basics from his mother and grandmother, to life in a different town growing up in Milan and holidays at Lake Como, to moving to London to establish himself to be one of the most credible chefs on Italian cuisine.

Foy Willing was, and still is, an incredible source of inspiration for those blessed, like he, to pursue an understanding of the language of music. He spent his life learning all of the components of that which is found in a song. He so understood all the intricate pieces. This man always had room and time in his world for those who needed guidance. He was one of the most gifted talents of country and western music, while at the same time contributing a major way to popular music, before the term "crossover" had ever been coined. Introducing the global mind-set changing the way we do business. In this fascinating book, global entrepreneurship expert Daniel

Isenberg presents a completely novel way to approach business building—with the insights and lessons learned from a worldwide cast of entrepreneurial characters. Not bound by a western, Silicon Valley stereotype, this group of courageous and energetic doers has created a global and diverse mix of companies destined to become tomorrow's leading organizations. Worthless, Impossible, and Stupid is about how enterprising individuals from around the world see hidden value in situations where others do not, use that

perception to develop products and services that people initially don't think they want, and ultimately go on to realize extraordinary value for themselves, their customers, and society as a whole. What these business builders have in common is a contrarian mindset that allows them to create opportunities and succeed where others see nothing. Amazingly, this process repeats itself in one form or another countless times a day all over the world. From Albuquerque to Islamabad, you will travel with Isenberg to discover

unusual yet practical insights that you can use in your own business. Meet the founders of Grameenphone in Bangladesh, PACIV in Puerto Rico, Sea to Table in New York, Actavis in Iceland, Studio Moderna in Slovenia, Hartwell Metals in Hong Kong and Southeast Asia, Given Imaging in Israel, WildChina in China, and many others. You'll be moved by the stories of these plucky start-ups—many of them fueled by adversity and, more often than not, by necessity. Great stories, stunning successes, crushing

failures—they're all here. What can we, in the East and West, learn from them? What can you learn—and what will these entrepreneurial stories, so compellingly told, inspire you to do? Let this book open doors for you where you once saw only walls. If you've ever felt the urge to turn a glimmer of an idea into something extraordinary, these stories are for you.

Seventy-five percent of processed foods on supermarket shelves—from soda to soup, crackers to condiments—contain genetically engineered ingredients. The long-term effects of these foods on human health and ecology are still unknown, and public concern has been steadily intensifying. This new book from the Council for Responsible Genetics gathers the best, most thought-provoking essays by the leading scientists, science writers, and

public health advocates. Collectively, they address such questions as: Are GM foods safe and healthy for us? Will GM food really solve world hunger? Who really controls the power structure of food production? Are GM foods ecologically safe and sustainable? Why is it so difficult to get GM foods labeled in the US? What kinds of regulations and policies should be instituted? How is seed biodiversity, of lack thereof, affecting developing countries? Should animals be genetically modified for food? How are other countries handling GM crops? Ultimately, this definitive book encourages us to think about the social, environmental, and moral ramifications of where this particular branch of biotechnology is taking us, and what we should do about it.
