System 1 is fast, intuitive, and emotional; System 2 is slower, more deliberative, and more logical. The impact of overconfidence on corporate strategies, the difficulties of predicting what will make us happy in the future, the profound effect of cognitive biases on everything from playing the stock market to planning our next vacation—each of these can be understood only by knowing how the two systems shape our judgments and decisions. Engaging the reader in a lively conversation about how we think, Kahneman reveals where we can and cannot trust our intuitions and how we can tap into the benefits of slow thinking. What would God say about those who blatantly misrepresent His Holy Spirit; who exchange true worship for chaotic fits of mindless ecstasy; who replace the biblical gospel with vain illusions of health and wealth; who claim to prophesy in His name yet speak errors; and who sell false hope to desperate people for millions of dollars? The charismatic movement has always been a breeding-ground for scandal, greed, bad doctrine, and all kinds of spiritual chicanery. As a movement, it is clearly headed the wrong direction. And it is growing at an unprecedented rate. From the Word of Faith to the New Apostolic Reformation, the Charismatic movement is being consumed by the empty promises of the prosperity gospel. Too many charismatic celebrities promote a "Christianity" without Christ, a Holy Spirit without holiness. And their teaching is having a disastrous influence on a grand scale, as large television networks broadcast their heresies to every part of the world. In Strange Fire, bestselling author and pastor John MacArthur chronicles the unsavory history behind the modern Charismatic movement. He lays out a chilling case for rejecting its false prophets, speaking out against their errors, showing true reverence to the Holy Spirit, and above all clinging to the Bible as the inerrant, authoritative Word of God and the one true standard by which all truth claims must be tested.

How Western philosophy lost its innocence: from Enlightenment to fascism The Destruction of Reason is Georg Lukács's trenchant criticism of certain strands of philosophy after Marx and the role they played in the rise of National Socialism: "Germany's path to Hitler in the sphere of philosophy," as he put it. Starting with the revolutions of 1848, his analysis spans post-Hegelian philosophy and sociology. The great pessimist Arthur Schopenhauer, neo-Hegelians such as Leopold von Ranke and Wilhelm Dilthey, and the phenomenologists Edmund Husserl, Karl Jaspers, and Jean-Paul Sartre come in for a share of criticism, but the principal targets are Friedrich Nietzsche and Martin Heidegger. Through these thinkers he shows in an unsparing analysis that, with almost no exceptions, the post-Hegelian tradition prepared the ground for fascist thought. Originally published in 1952, the book has been unjustly overlooked despite its centrality in Lukács's work and its being one of the key texts in Western Marxism. This new edition features a historical introduction by Enzo Traverso, addressing the current rise of the far right across the world today.
