Debian GNU/Linux, a very popular non-commercial Linux distribution, is known for its reliability and richness. Built and maintained by an impressive network of thousands of developers throughout the world, the Debian project is cemented by its social contract. This foundation text defines the project's objective: fulfilling the needs of users with a 100% free operating system. The success of Debian and of its ecosystem of derivative distributions (with Ubuntu at the forefront) means that an increasing number of administrators are exposed to Debian's technologies. This Debian Administrator's Handbook, which has been entirely updated for Debian 8 "Jessie", builds on the success of its 6 previous editions. Accessible to all, this book teaches the essentials to anyone who wants to become an effective and independent Debian GNU/Linux administrator. It covers all the topics that a competent Linux administrator should master, from installation to updating the system, creating packages and compiling the kernel but also monitoring, backup and migration, without forgetting advanced topics such as setting up SELinux or AppArmor to secure services, automated installations, or virtualization with Xen, KVM or LXC. This book is not only designed for professional system administrators. Anyone who uses Debian or Ubuntu on their own computer is de facto an administrator and will find tremendous value in knowing more about how their system works. Being able to understand and resolve problems will save you invaluable time. Learn more about the book on its official website: debian-handbook.info

In this collection of essays, participants involved with the Arrangement from its earliest days chart its evolution – its inception and progressive expansion, the difficulties encountered and problems solved.

In an age of instant communication through e-mail and cellular telephones, the two act play "Bernard and Bosie: A Most Unlikely Friendship" is a reminder of the intimate and old-fashioned art of letter writing. The play explores the complex relationship between literary giant George Bernard Shaw and the poet Lord Alfred 'Bosie' Douglas (the intimate friend of Oscar Wilde) through their own letters to one another in the 1930s and 1940s. The two men are from the absolute opposite ends of the spectrum, however, they manage to connect and form a friendship, which evolved into a kind of Father/Son relationship through the course of their correspondence. The often telling p character studies follows the changing nature of their relationship through good times and bad, in health and in sickness. It's a story about character and the ways in which personal fate is tied to the earliest years of one's life, and how the past can have a direct impact on the present.

In the explosive finale to the epic romantic saga, Bella has one final choice to make. Should she stay mortal and strengthen her connection to the werewolves, or leave it all behind to become a vampire? When you loved the one who was killing you, it left you no options. How could you run, how could you fight, when doing so would hurt that beloved one? If your life was all you had to give, how could you not give it? If it was someone you truly loved? To be irrevocably in love with a vampire is both fantasy and nightmare woven into a dangerously heightened reality for Bella Swan. Pulled in one direction by her intense passion for Edward Cullen, and in another by her profound connection to werewolf Jacob Black, a tumultuous year of temptation, loss, and strife have led her to the ultimate turning point. Her imminent choice to either join the dark but seductive world of immortals or to pursue a fully human life has become the thread from which the fates of two tribes hangs. This astonishing, breathlessly anticipated conclusion to the Twilight Saga illuminates the secrets and mysteries of this spellbinding romantic epic. It's here! #1 bestselling author Stephenie Meyer makes a triumphant return to the world of Twilight with the highly anticipated companion, Midnight Sun: the iconic love story of Bella and Edward told from the vampire's point of view. "People do not want to just read Meyer's books; they want to climb inside them and live there." -- Time "A literary phenomenon." -- The New York Times

Written over a period of ten years and evincing an extraordinary range of topics and techniques, this fourth volume of Caryl Churchill's collected plays confirms her standing as a playwright who is 'amongst the best half-dozen now writing' (The Times). The first three were all premiered in 1997. After the music-theatre piece, Hotel, came three plays which, as Churchill herself says in her valuable introduction, all came from a similar mindset: they explore ways in which theatre can be undermined from within. This is a Chair is not about what it says it's about; and the double bill that makes up Blue Heart consists of a play that never finishes and a play that's got a virus. Far Away (premiered in 2000) signals a move towards a powerfully unsettling combination of disconnectedness and passionate engagement with big issues: A Number (2002) starts with a man discovering he's been cloned, and Drunk Enough to Say I Love You? (2006) looks at the world's hate-filled love affair with America. The volume also includes Churchill's version of Strindberg's A Dream Play, made for the National Theatre in 2005.

The television series SPACE: 1999 was in its first series shaped by the late sixties and early seventies counterculture movements, making SPACE: 1999 into an example of how certain SF scholars see a natural alignment between science fiction and critical theory. However, due to changes in the political climate, SPACE: 1999 went through an ideological reversal in its second series. As a result, the schizophrenic nature of the series has ever since caused debate. This book is written on an idealistic basis. It is sold at the lowest price the publisher was willing to accept. A free e-book version can be downloaded at www.lulu.com.

What does Gerry Anderson's television series SPACE 1999 have in common with Carl Sagan's award-winning television documentary COSMOS? Not very much, one might expect, but this book documents an Online Alpha discussion where fans of the science fiction series discuss and debate differences and similarities from a wide range of perspectives, some of them arguing that two series may be so closely connected that it might be natural to think of COSMOS as the third year of SPACE 1999. This book is written on an idealistic basis. It is sold at the lowest price the publisher was willing to accept. A free e-book version can be downloaded at www.lulu.com.

Economic growth and the creation of wealth have cut global poverty rates, yet vulnerability, inequality, exclusion and violence have escalated within and across societies throughout the world. Unsustainable patterns of economic production and consumption promote global warming, environmental degradation and an upsurge in natural disasters. Moreover, while we have strengthened international human rights frameworks over the past several decades, implementing and protecting these norms remains a challenge. These changes signal the emergence of a new global context for learning that has vital implications for education. Rethinking the purpose of education and the organization of learning has never been more urgent. This book is inspired by a humanistic vision of education and development, based on respect for life and human dignity, equal rights, social justice, cultural diversity, international solidarity and shared responsibility for a sustainable future. It proposes that we consider education and knowledge as global common goods, in order to reconcile the purpose and organization of education as a collective societal endeavour in a complex world.

Music is rooted in the heart of Western culture. The absence of music from the usual publications of medieval history and history of art of the Middle Ages is understandable, considering the rarity of sources. And yet, throughout the last decades, an intense activity of historico-musicological research has been carried out internationally by a select group of specialized scholars. The ambitious goal of this work is to set medieval music within its historical and cultural context and to provide readers interested in different disciplines with an overall picture of music in the Middle Ages; multi-faceted, enjoyable, yet scientifically rigorous. To achieve this goal, the most prominent scholars of medieval musicology were invited to participate, along with archaeologists, experts of acoustics and architecture, historians and philosophers of medieval thought. The volume offers exceptional iconography and several maps, to accompany the reader in a fascinating journey through a network of places, cultural influences, rituals and themes.

His resume of roles includes Macbeth, Cyrano de Bergerac, Ebenezer Scrooge and Oedipus Rex. His career has encompassed theatre and television in England, Canada and the United States. With a gift for developing offbeat characters, Barry Morse has had a prolific acting career, and the story of his life is a veritable history of 20th century theatre from the days before World War II through the early 21st century. In this memoir Morse traces his life and career, including his years at the Royal Academy of Dramatic Art, his radio jobs with the BBC, his 60-year marriage to actress Sydney Sturgess and their years together in the Court Players, his roles on television shows (The Fugitive, Space: 1999), and his acquaintance with literary lights (George Bernard Shaw) and screen stars (Robert Mitchum and Peter Cushing). Photographs from the Morse family collection are included.

Written in 1869 and revised up to 1880, the "Romeo and Juliet Overture" was Tchaikovsky's first acknowledged masterpiece and today remains among the most popular orchestral compositions ever written. Composed when Tchaikovsky was 29, the "Overture, " according to "Grove's Dictionary, "was "carried out with such ardent conviction that the work seems to glow and throb with youthful passion and tenderness." By comparison, his brilliantly scored "Capriccio Italien" is a spirited evocation of Mediterranean life and scenery, animated and full of vitality. A work, says Grove's, "of unshadowed gaiety and abounding in striking effects."

Written in 1880, when Tchaikovsky's position in the music world was fairly well established in Russia, the piece brought him to the brink of international fame and recognition. Permeated with imagination and a wealth of melodic inspiration, these compositions continue to evoke an enthusiastic response from musicians and listeners alike. Students, teachers, and music lovers everywhere will be delighted with this convenient, one-volume edition of both scores, reprinted from an authoritative Russian edition of Tchaikovsky's works. The original Russian footnotes have been specially translated into English for this edition.

Part of the premise of the online discussion transcribed in this book is how Gerry Anderson's television series 'Space: 1999' can be understood in relation to Stanley Kubrick's '2001: A Space Odyssey' by looking at both narratives through the perspective of systems theory. As a result of doing so, an engaged debate concerned with the political and philosophical subtext of both stories developed. This book gives a full account of the debate with summaries of ideas and insights. The book has been developed on an idealistic basis.
