*“A stunning picture of a black woman’s coming of age in America. Put it on the shelf beside The Autobiography of Malcolm X.” —Kirkus Reviews* Elaine Brown assumed her role as the first and only female leader of the Black Panther Party with these words: *“I have all the guns and all the money. I can withstand challenge from without and from within. Am I right, Comrade?”* It was August 1974. From a small Oakland-based cell, the Panthers had grown to become a revolutionary national organization, mobilizing black communities and white supporters across the country—but relentlessly targeted by the police and the FBI, and increasingly riven by violence and strife within. How Brown came to a position of power over this paramilitary, male-dominated organization, and what she did with that power, is a riveting, unsparing account of self-discovery. Brown’s story begins with growing up in an impoverished neighborhood in Philadelphia and attending a predominantly white school, where she first sensed what it meant to be black, female, and poor in America. She describes her political awakening during the bohemian years of her adolescence, and her time as a foot soldier for the Panthers, who seemed to hold the promise of redemption. And she tells of her ascent into the upper echelons of Panther leadership: her tumultuous relationship with the charismatic Huey Newton, who would become her lover and her nemesis; her experience with the male power rituals that would sow the seeds of the party’s demise; and the scars that she both suffered and inflicted in that era’s paradigm-shifting clashes of sex and power. Stunning, lyrical, and acute, this is the indelible testimony of a black woman’s battle to define herself. *“A glowing achievement.” —Los Angeles Times* *“Honest, funny, subjective, unsparing, and passionate. . . A Taste of Power weaves autobiography and political history into a story that fascinates and illuminates.” —The Washington Post*

*Provides a social history of how the CIA used the psychedelic drug LSD as a tool of espionage during the early 1950s and tested it on U.S. citizens before it spread into popular culture, in particular the counterculture as represented by Timothy Leary, Allen Ginsberg, Ken Kesey, and others who helped spawn political and social upheaval.*

*What is the score card for economics at the start of the new millennium? While there are many different schools of economic thought, it is the neo-classical school, with its alleged understanding and simplistic advocacy of the market, that has become equated in the public mind with economics. This book shows that virtually every aspect of conventional neo-classical economics’ thinking is intellectually unsound. Steve Keen draws on an impressive array of advanced critical thinking. He constitutes a profound critique of the principle concepts, theories, and methodologies of the mainstream discipline. Keen raises grave doubts about economics’ pretensions to established scientific status and its reliability as a guide to understanding the real world of economic life and its*

**The editors of *WRITING IN KNOWLEDGE SOCIETIES* provide a thoughtful, carefully constructed collection that addresses the vital roles rhetoric and writing play as knowledge-making practices in diverse knowledge-intensive settings. The essays in this book examine the multiple, subtle, yet consequential ways in which writing is epistemic, articulating the central role of writing in creating, shaping, sharing, and contesting knowledge in a range of human activities in workplaces, civic settings, and higher education.**

**Ferdinand Christian Baur (1792-1860) has been described as "the greatest and at the same time the most controversial theologian in German Protestant theology since Schleiermacher." The controversy was epitomized by a nineteenth-century British critic who wrote that his theory "makes of Christianity a thing of purely natural origin, calls in question the authenticity of all but a few of the New Testament books, and makes the whole collection contain not a harmonious system of divine truth, but a confused mass of merely human and contradictory opinions as to the nature of the Christian religion." The contributors to this volume, however, regard Baur as an epoch-making New Testament scholar whose methods and conclusions, though superseded, have been mostly affirmed during the century and a half since his death. This collection focuses on the history of early Christianity, although as a historian of the church and theology Baur covered the entire field up to own time. He combined the most exacting historical research with a theological interpretation of history influenced by Kant, Schelling, and Hegel. The first three chapters discuss Baur's relation to Strauss, Mohler, and Hegel. Then a central core of chapters considers his historical and exegetical perspectives (Judaism and Hellenism, Gnosticism, New Testament introduction and theology, the Pauline epistles, the Synoptic Gospels, John, the critique of miracle, and the combination of absoluteness and relativity). The final chapters view his influence by analyzing the reception of Baur in Britain, Baur and Harnack, and Baur and practical theology. This work offers a multi-faceted picture of his**

***An exploration of the production, transmission, and mutation of affective tonality—when sound helps produce a bad vibe. Sound can be deployed to produce discomfort, express a threat, or create an ambience of fear or dread—to produce a bad vibe. Sonic weapons of this sort include the “psychoacoustic correction” aimed at Panama strongman Manuel Noriega by the U.S. Army and at the Branch Davidians in Waco by the FBI, sonic booms (or “sound bombs”) over the Gaza Strip, and high-frequency rat repellants used against teenagers in malls. At the same time, artists and musicians generate intense frequencies in the search for new aesthetic experiences and new ways of mobilizing bodies in rhythm. In Sonic Warfare, Steve Goodman explores these uses of acoustic force and how they affect populations. Traversing philosophy, science, fiction, aesthetics, and popular culture, he maps a (dis)continuum of vibrational force, encompassing police and military research into acoustic means of crowd control, the corporate deployment of sonic branding, and the intense sonic encounters of sound art and music culture. Goodman concludes with speculations on the not yet heard—the concept of unsound, which relates to both the peripheries of auditory perception and the unactualized nexus of rhythms and frequencies within audible bandwidths.***

**In 1891, when coal companies in eastern Tennessee brought in cheap convict labor to take over their jobs, workers responded by storming the stockades, freeing the prisoners, and loading them onto freight trains. Over the next year, tactics escalated to include burning company property and looting company stores. This was one of the largest insurrections in US working-class history. It happened at the same time as the widely publicized northern labor war in Homestead, Pennsylvania. And it was largely ignored, then and now. Dixie Be Damned engages seven similarly "hidden" insurrectionary episodes in Southern history to demonstrate the region's long arc of revolt. Countering images of the South as pacified and conservative, this adventurous retelling presents history in the rough. Not the image of the South many expect, this is the South of maroon rebellion, wildcat strikes, and Robert F. Williams's book Negroes with Guns, a South where the dispossessed refuse to quietly suffer their fate. This is people's history at its best: slave revolts, multiracial banditry, labor battles, prison uprisings, urban riots, and more. Neal Shirley grew up in Winston-Salem, North Carolina, and now lives in Durham, NC, where he is involved in several anti-prison initiatives and runs a small publishing project called the North Carolina Piece Corps. Saralee Stafford was born in the Piedmont of North Carolina. Her recent political work has focused on connecting the struggles of street organizations with those of anarchists in the area. She teaches gender-related health in Durham, North Carolina.**

Intended to show teachers how their approaches to the teaching of writing reflect a particular area of research and to show researchers how the intuitions of teachers reflect research findings, the articles in this book are classified according to three approaches to writing: processing, distancing, and modeling. After an introductory essay that defines and explains the three approaches, the second part of the book contains eight articles that stress processing. These articles cover the psychology of thinking, mapping and composing, children's art, drawing as prewriting, prewriting as discovery, turning speech into writing, and the process approach and the elementary school writing curriculum. Part three, dealing with distancing, contains two articles defining "talk-write" as a behavioral pedagogy for composition and explaining its application in the classroom; and five articles on function categories, the composition course as the pursuit of ideas, a new curriculum in English, student writing response groups in the classroom, and the All-City High Project of the Oakland, California, school district. The articles on modeling in part four explain a generative rhetoric of the sentence, sentence modeling, "voices" in reading and writing, paraphrases of professionals in writing classes, the importance of reason in writing, and the superiority of showing over telling. The relationship between the teacher and the researcher is examined in the book's final essay. A bibliography is included. (JL)

**The American Political Tradition is one of the most influential and widely read historical volumes of our time. First published in 1948, its elegance, passion, and iconoclastic erudition laid the groundwork for a totally new understanding of the American past. By writing a "kind of intellectual history of the assumptions behind American politics," Richard Hofstadter changed the way Americans understand the relationship between power and ideas in their national experience. Like only a handful of American historians before him—Frederick Jackson Turner and Charles A. Beard are examples—Hofstadter was able to articulate, in a single work, a historical vision that inspired and shaped an entire generation.**

In this newest installment in Chicago 's series of Jacques Derrida 's seminars, the renowned philosopher attempts one of his most ambitious goals: the first truly philosophical argument against the death penalty. While much has been written against the death penalty, Derrida contends that Western philosophy is massively, if not always overtly, complicit with a logic in which a sovereign state has the right to take a life. Haunted by this notion, he turns to the key places where such logic has been established—and to the place it has been most effectively challenged: literature. With his signature genius and patient yet dazzling readings of an impressive breadth of texts, Derrida examines everything from the Bible to Plato to Camus to Jean Genet, with special attention to Kant and post-World War II juridical texts, to draw the landscape of death penalty discourses. Keeping clearly in view the death rows and execution chambers of the United States, he shows how arguments surrounding cruel and unusual punishment depend on what he calls an "anesthetical logic," which has also driven the development of death penalty technology from the French guillotine to lethal injection. Confronting a demand for philosophical rigor, he pursues provocative analyses of the shortcomings of abolitionist discourse. Above all, he argues that the death penalty and its attendant technologies are products of a desire to put an end to one of the most fundamental

qualities of our finite existence: the radical uncertainty of when we will die. Arriving at a critical juncture in history—especially in the United States, one of the last Christian-inspired democracies to resist abolition—The Death Penalty is both a timely response to an important ethical debate and a timeless addition to Derrida ' s esteemed body of work.

Who would dream of being against love? No one. Love is, as everyone knows, a mysterious and all-controlling force, with vast power over our thoughts and life decisions. But is there something a bit worrisome about all this uniformity of opinion? Is this the one subject about which no disagreement will be entertained, about which one truth alone is permissible? Consider that the most powerful organized religions produce the occasional heretic; every ideology has its apostates; even sacred cows find their butchers. Except for love. Hence the necessity for a polemic against it. A polemic is designed to be the prose equivalent of a small explosive device placed under your E-Z-Boy lounge. It won't injure you (well not severely); it's just supposed to shake things up and rattle a few convictions.

The Idea of the American South moves the debate over Southern identity from

speculative essays about the "central theme of Southern history and, by implication, past the restricted perception that race relations are a sufficient key to understanding the history of Southern identity.
