

Dialogue The Art Of Thinking Together

Although the art and films of Jan Švankmajer enjoy wide international recognition today, ranking him among the most original artists of the last decades, many aspects of his life and work have remained unexplored. Nor has any book yet tried to systematically and comprehensively mark out the path of the formation and development in the work of this film-maker, artist, experimenter, poet and 'militant Surrealist' and thus show how the different sides converse with each other. The present book is the most comprehensive monograph on Jan Švankmajer so far, it describes with greater depth and precision aspects of his life and work and it invites the reader to dive into a wonderfully rich and coherent, distinctive and unique universe. The essays emphasise and illuminate characteristic attributes of Švankmajer's work - puppet theatre, Mannerism, Surrealism, collaboration with Eva Švankmajerová, his own film idiom, and also comparatively little known elements such as obsessional passion for collecting, first formative years and experiences.

MORE THAN ONE MILLION COPIES IN PRINT • "One of the seminal management books of the past seventy-five years."—Harvard Business Review This revised edition of the bestselling classic is based on fifteen years of experience in putting Peter Senge's ideas into practice. As Senge makes clear, in the long run the only sustainable competitive advantage is your organization's ability to learn faster than the competition. The leadership stories demonstrate the many ways that the core ideas of the Fifth Discipline, many of which seemed radical when first published, have become deeply integrated into people's ways of seeing the world and their managerial practices. Senge describes how companies can rid themselves of the learning blocks that threaten their productivity and success by adopting the strategies of learning organizations, in which new and expansive patterns of thinking are nurtured, collective aspiration is set free, and people are continually learning how to create the results they truly desire. Mastering the disciplines Senge outlines in the book will: • Reignite the spark of genuine learning driven by people focused on what truly matters to them • Bridge teamwork into macrocreativity • Free you of confining assumptions and mindsets • Teach you to see the forest and the trees • End the struggle between work and personal time This updated edition contains more than one hundred pages of new material based on interviews with dozens of practitioners at companies such as BP, Unilever, Intel, Ford, HP, and Saudi Aramco and organizations such as Roca, Oxfam, and The World Bank.

Praise for READING THE ROOM "If you believe, as I do, that tackling our toughest problems in organizations and societies will require significant advances in the human domain of how we think and interact, then you will find this book a wonderful resource for a healthier future." —Peter Senge, senior lecturer, leadership and sustainability, MIT Sloan School of Management; and founding chair, Society for Organizational Learning (SoL) "A must-read for anyone truly interested in gaining access to and managing their own actions/behavior as well as all those we work with, live with, and interact with. It will shift the way you, others, and the world occur for you." —Michael C. Jensen, Jesse Isidor Straus Professor of Business Administration, emeritus, Harvard Business School "David Kantor is one of the very few master innovators and theorists in organizational leadership. In this combined story and practice guide, Kantor helps leaders see the hidden dynamics of the groups they lead, and the personal and social factors that shape their relationships with those groups." —Art Kleiner, editor in chief, strategy+business "Kantor addresses the fundamental issue that leaders are surprisingly inept in conversation and in managing groups. Leaders and managers at all levels should be learning these concepts in order to improve their own ability to analyze what is going on and react appropriately. —Edgar H. Schein, professor emeritus, MIT Sloan School of Management; and author, Helping: How to Offer, Give, and Receive Help "An exceptional book in the true sense of the word. It stands alone in its grasp of what it takes to succeed as a leader. It's not simply about mastering the five forces, milking cash cows, accelerating experience curves, or even spurring disruptive innovation. It's about reading the room. Leaders who gain mastery of what David Kantor has to teach in this book will achieve true success, not just as leaders, but as people." —Diana M. Smith, chief executive partner, New Profit Inc.; and author, The Elephant in the Room: How Relationships Make or Break the Success of Leaders and Organizations "There are only a few wise masters in the world when it comes to any real understanding of leader-ship, and even fewer who share their secrets. David Kantor is one of them, and in Reading the Room we have brilliantly laid out before us both a unique lens and a highly practical method that will change for good the way you lead, and more, the way you think. Not to be missed!" —William Isaacs, author, Dialogue and the Art of Thinking Together; and senior lecturer, MIT Sloan School of Management

Publisher Description

A call to reclaim and rethink the field of designing as a liberal art where diverse voices come together to shape the material world. We live in a material world of designed artifacts, both digital and analog. We think of ourselves as users; the platforms, devices, or objects provide a service that we can use. But is this really the case? We Are Not Users argues that people cannot be reduced to the entity called “user”; we are not homogenous but diverse. That buzz of dissonance that we hear reflects the difficulty of condensing our diversity into “one size fits all.” This book proposes that a new understanding of design could resolve that dissonance, and issues a call to reclaim and rethink the field of designing as a liberal art where diverse voices come together to shape the material world. The authors envision designing as a dialogue, simultaneously about the individual and the social—an act enriched by diversity of both disciplines and perspectives. The book presents the building blocks of a language that can conceive designing in all its richness, with relevance for both theory and practice. It introduces a theoretical model, terminology, examples, and a framework for bringing together the social, cultural, and political aspects of designing. It will be essential reading for design theorists and for designers in areas ranging from architecture to software design and policymaking.

This book draws on extensive research to provide a ground-breaking new account of the relationship between dialogue and children's learning development. It closely relates the research findings to real-life classrooms, so that it is of practical value to teachers and students concerned that their children are offered the best possible learning opportunities. The authors provide a clear, accessible and well-illustrated case for the importance of dialogue in children's intellectual development and support this with a new and more educationally relevant version of socio-cultural theory, which explains the fascinating relationship between dialogues and learning. In educational terms, a sociocultural theory that relates social, cultural and historical processes, interpersonal communication and applied linguistics, is an ideal way of explaining how school experience helps children learn and develop. By using evidence of how the collective construction of knowledge is achieved and how engagement in dialogues shapes children's educational progress and intellectual development, the authors provide a text which is essential for educational researchers, postgraduate students of education and teachers, and is also of interest to many psychologists and applied linguists. Explains the importance of thinking in daily life, discussing how to achieve focus, creativity, and a positive outlook in a technology-driven world.

Challenging Coaching is a real-world, timely and provocative book which provides a wake-up call to move beyond the limitations of traditional coaching. Based on the authors' extensive experience working at board and management levels, they suggest that for far too long coaching approaches have shied away from adopting a more challenging stance - a stance that can provoke greater performance and unlock deeper potential in business leaders and their teams. The authors detail their unique FACTS coaching model, which provides a practical and pragmatic approach focusing on Feedback, Accountability, Courageous goals,

Tension and Systems thinking. The authors explore FACTS coaching in theory and in practice using case studies, example dialogues and practical exercises so that the reader will be able to successfully challenge others using respectful yet direct techniques. This is an original and thought-provoking book that dares the reader to go beyond traditional coaching and face the FACTS.

Which sort of seducer could you be? Siren? Rake? Cold Coquette? Star? Comedian? Charismatic? Or Saint? This book will show you which. Charm, persuasion, the ability to create illusions: these are some of the many dazzling gifts of the Seducer, the compelling figure who is able to manipulate, mislead and give pleasure all at once. When raised to the level of art, seduction, an indirect and subtle form of power, has toppled empires, won elections and enslaved great minds. In this beautiful, sensually designed book, Greene unearths the two sides of seduction: the characters and the process. Discover who you, or your pursuer, most resembles. Learn, too, the pitfalls of the anti-Seducer. Immerse yourself in the twenty-four manoeuvres and strategies of the seductive process, the ritual by which a seducer gains mastery over their target. Understand how to 'Choose the Right Victim', 'Appear to Be an Object of Desire' and 'Confuse Desire and Reality'. In addition, Greene provides instruction on how to identify victims by type. Each fascinating character and each cunning tactic demonstrates a fundamental truth about who we are, and the targets we've become - or hope to win over. The Art of Seduction is an indispensable primer on the essence of one of history's greatest weapons and the ultimate power trip. Formal Ethics is the study of formal ethical principles. The most important of these, perhaps even the most important principle of life, is the golden rule: "Treat others as you want to be treated". Although the golden rule enjoys support amongst different cultures and religions in the world, philosophers tend to neglect it. Formal Ethics gives the rule the attention it deserves. Modelled on formal logic, Formal Ethics was inspired by the ethical theories of Kant and Hare. It shows that the basic formal principles of ethics, like the golden rule, are very similar to principles of logic, and gives a firm basis for our ethical thinking. As an introduction to moral rationality, Formal Ethics also considers non-formal elements, and is applied to areas of practical concern such as racism and moral education

The Art of Thinking introduces students to the principles and techniques of critical thinking, taking them step-by-step through the problem-solving process. Emphasizing creative and active thought processes, the author asserts that good thinking and problem-solving is based on learnable strategies. The book's four parts, "Be Aware," "Be Creative," "Be Critical," and "Communicate Your Ideas," present students with a process for solving problems and resolving controversial issues. Discussions of how to evaluate ideas and how to question long-held assumptions or biases help students look at concepts critically. This text can be used in freshman experience courses, freshman composition courses, and a wide array of other courses where instructors want to enhance students' critical thinking skills. 0321881753 / 9780321881755 Art of Thinking, The: A Guide to Critical and Creative thought with NEW MyCompLab Package consists of: 0205119387 / 9780205119387 Art of Thinking, The: A Guide to Critical and Creative Thought 020589190X / 9780205891900 NEW MyCompLab - Valuepack Access Card #1 NEW YORK TIMES BESTSELLER • Discover the life-changing memoir that has inspired millions of readers through the Academy Award®-winning actor's unflinching honesty, unconventional wisdom, and lessons learned the hard way about living with greater satisfaction. NAMED ONE OF THE BEST BOOKS OF THE YEAR BY THE GUARDIAN "McConaughey's book invites us to grapple with the lessons of his life as he did—and to see that the point was never to win, but to understand."—Mark Manson, author of The Subtle Art of Not Giving a F*ck I've been in this life for fifty years, been trying to work out its riddle for forty-two, and been keeping diaries of clues to that riddle for the last thirty-five. Notes about successes and failures, joys and sorrows, things that made me marvel, and things that made me laugh out loud. How to be fair. How to have less stress. How to have fun. How to hurt people less. How to get hurt less. How to be a good man. How to have meaning in life. How to be more me. Recently, I worked up the courage to sit down with those diaries. I found stories I experienced, lessons I learned and forgot, poems, prayers, prescriptions, beliefs about what matters, some great photographs, and a whole bunch of bumper stickers. I found a reliable theme, an approach to living that gave me more satisfaction, at the time, and still: If you know how, and when, to deal with life's challenges—how to get relative with the inevitable—you can enjoy a state of success I call "catching greenlights." So I took a one-way ticket to the desert and wrote this book: an album, a record, a story of my life so far. This is fifty years of my sights and seens, felts and figured-outs, cools and shamefuls. Graces, truths, and beauties of brutality. Getting away withs, getting caughts, and getting wets while trying to dance between the raindrops. Hopefully, it's medicine that tastes good, a couple of aspirin instead of the infirmary, a spaceship to Mars without needing your pilot's license, going to church without having to be born again, and laughing through the tears. It's a love letter. To life. It's also a guide to catching more greenlights—and to realizing that the yellows and reds eventually turn green too. Good luck. Since the Renaissance, the Socratic Method has been adapted to teach diverse subjects, including medicine, law, and mathematics. Each discipline selects elements and emphases from the Socratic Method that are appropriate for teaching individuals or groups how to reason judiciously within that subject. By looking at some of the great practitioners of Socratic questioning in the past, Socratic Methods in the Classroom explains how teachers may use questioning, reasoning, and dialogue to encourage critical thinking, problem solving, and independent learning in the secondary classroom. Through a variety of problems, cases, and simulations, teachers will guide students through different variations of the Socratic Method, from question prompts to the case method. Students will learn to reason judiciously, gain an understanding of important issues, and develop the necessary skills to discuss these issues in their communities. Grades 8-12 #1 New York Times Bestseller "THIS. This is the right book for right now. Yes, learning requires focus. But, unlearning and relearning requires much more—it requires choosing courage over comfort. In Think Again, Adam Grant weaves together research and storytelling to help us build the intellectual and emotional muscle we need to stay curious enough about the world to actually change it. I've never felt so hopeful about what I don't know." —Brené Brown, Ph.D., #1 New York Times bestselling author of Dare to Lead The bestselling author of Give and Take and Originals examines the critical art of rethinking: learning to question your opinions and open other people's minds, which can position you for excellence at work and wisdom in life Intelligence is usually seen as the ability to think and learn, but in a rapidly changing world, there's another set of cognitive skills that might matter more: the ability to rethink and unlearn. In our daily lives, too many of us favor the comfort of conviction over the discomfort of doubt. We listen to opinions that make us feel good, instead of ideas that make us think hard. We see disagreement as a threat to our egos, rather than an opportunity to learn. We surround ourselves with people who agree with our conclusions, when we should be gravitating toward those who challenge our thought process. The result is that our beliefs get brittle long before our bones. We think too much like preachers defending our sacred beliefs, prosecutors proving the other side wrong, and politicians campaigning for approval--and too little like scientists searching for truth. Intelligence is no cure, and it can even be a curse: being good at thinking can make us worse at rethinking. The brighter we are, the blinder to our own limitations we can become. Organizational psychologist Adam Grant is an expert on opening other people's minds--and our own. As Wharton's top-rated professor and the bestselling author of Originals and Give and Take, he makes it one of his guiding principles to argue like he's right but listen like he's wrong. With bold ideas and rigorous evidence, he investigates how we can embrace the joy of being wrong, bring nuance to charged conversations, and build schools, workplaces, and communities of lifelong learners. You'll learn how an international debate champion wins arguments, a Black musician persuades white supremacists to abandon hate, a vaccine whisperer convinces concerned parents to immunize their children, and Adam has coaxed Yankees fans to root for the Red Sox. Think Again reveals that we don't have to believe everything we think or internalize everything we feel. It's an invitation to let go of views that are no longer serving us well and prize mental flexibility over foolish consistency. If knowledge is power, knowing what we don't know is wisdom.

Suppose you could ask God any question and get an answer. What would it be? Young people all over the world have been asking those questions. So Neale Donald Walsch, author of the internationally bestselling Conversations with God series had another conversation. Conversations with God for Teens is a simple, clear, straight-to-the-point dialogue that answers teens questions about God, money, sex, love, and more. Conversations with God for Teens reads like a rap session at a church youth group, where teenagers discuss everything they ever wanted to know about life but were too afraid to ask God. Walsch acts as the verbal conduit, showing teenagers how easy it is to converse with the divine. When Claudia, age 16, from Perth, Australia, asks, "Why can't I just have sex with everybody? What's the big deal?", the answer God offers her is: "Nothing you do will ever be okay with everybody. 'Everybody' is a large word. The real question is can you have sex and have it be okay with you?" There's no doubt that the casual question-and-answer format will help make God feel welcoming and accessible to teens. Conversations with God for Teens is the perfect gift purchase for parents, grandparents, and anyone else who wants to provide accessible spiritual content for the teen(s) in their lives.

A landmark in jazz studies, Thinking in Jazz reveals as never before how musicians, both individually and collectively, learn to improvise. Chronicling leading musicians from their first encounters with jazz to the development of a unique improvisatory voice, Paul Berliner documents the lifetime of preparation that lies behind the skilled improviser's every idea. The product of more than fifteen years of immersion in the jazz world, Thinking in Jazz combines participant observation with detailed musicological analysis, the author's experience as a jazz trumpeter, interpretations of published material by scholars and performers, and, above all, original data from interviews with more than fifty professional musicians: bassists George Duvivier and Rufus Reid; drummers Max Roach, Ronald Shannon Jackson, and Akira Tana; guitarist Emily Remler; pianists Tommy Flanagan and Barry Harris; saxophonists Lou Donaldson, Lee Konitz, and James Moody; trombonist Curtis Fuller; trumpeters Doc Cheatham, Art Farmer, Wynton Marsalis, and Red Rodney; vocalists Carmen Lundy and Veal Williams; and others. Together, the interviews provide insight into the production of jazz by great artists like Betty Carter, Miles Davis, Dizzy Gillespie, Coleman Hawkins, and Charlie Parker. Thinking in Jazz overflows with musical examples from the 1920s to the present, including original transcriptions (keyed to commercial recordings) of collective improvisations by Miles Davis's and John Coltrane's groups. These transcriptions provide additional insight into the structure and creativity of jazz improvisation and represent a remarkable resource for jazz musicians as well as students and educators. Berliner explores the alternative ways—aural, visual, kinetic, verbal, emotional, theoretical, associative—in which these performers conceptualize their music and describes the delicate interplay of soloist and ensemble in collective improvisation. Berliner's skillful integration of data concerning musical development, the rigorous practice and thought artists devote to jazz outside of performance, and the complexities of composing in the moment leads to a new understanding of jazz improvisation as a language, an aesthetic, and a tradition. This unprecedented journey to the heart of the jazz tradition will fascinate and enlighten musicians, musicologists, and jazz fans alike.

The New York Times film critic shows why we need criticism now more than ever Few could explain, let alone seek out, a career in criticism. Yet what A.O. Scott shows in Better Living Through Criticism is that we are, in fact, all critics: because critical thinking informs almost every aspect of artistic creation, of civil action, of interpersonal life. With penetrating insight and warm humor, Scott shows that while individual critics--himself included--can make mistakes and find flaws where they shouldn't, criticism as a discipline is one of the noblest, most creative, and urgent activities of modern existence. Using his own film criticism as a starting point--everything from his infamous dismissal of the international blockbuster The Avengers to his intense affection for Pixar's animated Ratatouille--Scott expands outward, easily guiding readers through the complexities of Rilke and Shelley, the origins of Chuck Berry and the Rolling Stones, the power of Marina Abramovich and 'Ode on a Grecian Urn.' Drawing on the long tradition of criticism from Aristotle to Susan Sontag, Scott shows that real criticism was and always will be the breath of fresh air that allows true creativity to thrive. "The time for criticism is always now," Scott explains, "because the imperative to think clearly, to insist on the necessary balance of reason and passion, never goes away."

In Dramatic Dialogue, Atlas and Aron develop the metaphors of drama and theatre to introduce a new way of thinking about therapeutic action and therapeutic traction. This model invites the patient's many self-states and the numerous versions of the therapist's self onto the analytic stage to dream a mutual dream and live together the past and the future, as they appear in the present moment. The book brings together the relational emphasis on multiple self-states and enactment with the Bionian conceptions of reverie and dreaming-up the patient. The term Dramatic Dialogue originated in Ferenczi's clinical innovations and refers to the patient and therapist dramatizing and dreaming-up the full range of their multiple selves. Along with Atlas and Aron, readers will become immersed in a Dramatic Dialogue, which the authors elaborate and enact, using the contemporary language of multiple self-states, waking dreaming, dissociation, generative enactment, and the prospective function. The book provides a rich description of contemporary clinical practice, illustrated with numerous clinical tales and detailed examination of clinical moments. Inspired by Bion's concept of "becoming-at-one" and "at-one-ment," the authors call for a return of the soul or spirit to psychoanalysis and the generative use of the analyst's subjectivity, including a passionate use

of mind, body and soul in the pursuit of psychoanalytic truth. Dramatic Dialogue will be of great interest to all psychoanalysts and psychotherapists.

The most comprehensive portrait of art criticism ever assembled, as told by the leading writers of our time. In the last fifty years, art criticism has flourished as never before. Moving from niche to mainstream, it is now widely taught at universities, practiced in newspapers, magazines, and online, and has become the subject of debate by readers, writers, and artists worldwide. Equal parts oral history and analysis of craft, *What It Means to Write About Art* offers an unprecedented overview of American art writing. These thirty in-depth conversations chart the role of the critic as it has evolved from the 1960s to today, providing an invaluable resource for aspiring artists and writers alike. John Ashbery recalls finding Rimbaud's poetry through his first gay crush at sixteen; Rosalind Krauss remembers stealing the design of *October* from Massimo Vignelli; Paul Chaat Smith details his early days with Jimmy Durham in the American Indian Movement; Dave Hickey talks about writing country songs with Waylon Jennings; Michele Wallace relives her late-night and early-morning interviews with James Baldwin; Lucy Lippard describes confronting Clement Greenberg at a lecture; Eileen Myles asserts her belief that her negative review incited the Women's Action Coalition; and Fred Moten recounts falling in love with Renoir while at Harvard. Jarrett Earnest's wide-ranging conversations with critics, historians, journalists, novelists, poets, and theorists—each of whom approach the subject from unique positions—illustrate different ways of writing, thinking, and looking at art. Interviews with Hilton Als, John Ashbery, Bill Berkson, Yve-Alain Bois, Huey Copeland, Holland Cotter, Douglas Crimp, Darby English, Hal Foster, Michael Fried, Thyrza Nichols Goodeve, Dave Hickey, Siri Hustvedt, Kellie Jones, Chris Kraus, Rosalind Krauss, Lucy Lippard, Fred Moten, Eileen Myles, Molly Nesbit, Jed Perl, Barbara Rose, Jerry Saltz, Peter Schjeldahl, Barry Schwabsky, Paul Chaat Smith, Roberta Smith, Lynne Tillman, Michele Wallace, and John Yau.

An indispensable and inspiring guide to creativity in the workplace and beyond, drawing on art, psychology, science, sports, law, business, and technology to help you land big ideas in the practical world. Anyone from CEO to freelancer knows how hard it is to think big, let alone follow up, while under pressure to get things done. *Art Thinking* offers practical principles, inspiration, and a healthy dose of pragmatism to help you navigate the difficulties of balancing creative thinking with driving toward results. With an MBA and an MFA, Amy Whitaker, an entrepreneur-in-residence at the New Museum Incubator, draws on stories of athletes, managers, writers, scientists, entrepreneurs, and even artists to engage you in the process of “art thinking.” If you are making a work of art in any field, you aren't going from point A to point B. You are inventing point B. *Art Thinking* combines the mind-sets of art and the tools of business to protect space for open-ended exploration and manage risks on your way to success. *Art Thinking* takes you from “Wouldn't it be cool if . . . ?” to realizing your highest aims, helping you build creative skills you can apply across all facets of business and life. Warm, honest, and unexpected, *Art Thinking* will help you reimagine your work and life—and even change the world—while enjoying the journey from point A. *Art Thinking* features 60 line drawings throughout.

For over 30 years Dr. Hardt has been studying the electrophysiological basis of spiritual states. He has developed a technology based on electroencephalographic (EEG) measurement and feedback, combined, in a highly optimized methodology, with computerized measures of subjective states, depth interviews, and extensive coaching in forgiveness and non-attachment. This technology has demonstrated significant effectiveness in healing and transforming core dimensions of personality, reducing stress and anxiety, reversing key aspects of the brain's aging process, increasing creativity by 50% and boosting IQ by nearly 12 points on average, enhancing peak performance, facilitating conflict resolution, and in expanding spiritual awareness and increasing access to advanced spiritual states.

Talk for Thinking in the Classroom

Never before has there been a greater need for deeper listening and more open communication to cope with the complex problems facing our organizations, businesses and societies. Renowned scientist David Bohm believed there was a better way for humanity to discover meaning and to achieve harmony. He identified creative dialogue, a sharing of assumptions and understanding, as a means by which the individual, and society as a whole, can learn more about themselves and others, and achieve a renewed sense of purpose.

Dialogue provides practical guidelines for one of the essential elements of true partnership--learning how to talk together in honest and effective ways. Reveals how problems between managers and employees, and between companies or divisions within a larger corporation, stem from an inability to conduct a successful dialogue.

Think Again

Men to Avoid in Art and Life pairs classical fine art with modern captions that epitomize the spirit of mansplaining. This hilarious book perfectly captures those relatable moments when a man explains to a woman a subject about which he knows considerably less than she does. Situations include men sharing keen insight on the female anatomy, an eloquent defense of catcalling, or offering sage advice about horseback riding to the woman who owns the horse. • These less qualified men of antiquity dish out mediocrity as if it's pure genius • For the women who have endured overbearing men over the centuries • Written with hilariously painful accuracy "Now, when you're riding a horse, you need to make sure to keep a good grip on the reins." "These are my horses." Through cringe-induced empathy, this timeless gift book of shared experiences unites women across history in one of the most powerful forms of resistance: laughter. • Started as a Twitter thread and quickly gained widespread popularity. • Makes a perfect book for women and feminists with a wry sense of humor, millennials, anyone who loves memes and Internet humor, as well as history and art buffs. • You'll love this book if you love books like Men Explain Things to Me by Rebecca Solnit, Milk and Vine: Inspirational Quotes from Classic Vines by Emily Beck, and Awards For Good Boys: Tales Of Dating, Double Standards, And Doom by Shelby Lorman.

How can art act as an intercultural mediator for dialogue? In order to scrutinize this question, relevant theoretical ideas are discussed and artistic intervention projects examined so as to highlight its cultural, political, economic, social, and transformational impacts. This thought-provoking work reveals why art is needed to help multicultural neighbourhoods and societies be sustainable, as well as united by diversity. This edited collection underlines the significance of arts and media as a tool of understanding, mediation, and communication across and beyond cultures. The chapters with a variety of conceptual and methodological approaches from particular contexts demonstrate the complexity in the dynamics of (inter)cultural communication, culture, identity, arts, and media. Overall, the collection encourages readers to consider themselves as agents of the communication process promoting dialogue.

A spirited biography of the prophetic and sympathetic philosopher who helped build the foundations of the modern world. Denis Diderot is often associated with the decades-long battle to bring the world's first comprehensive Encyclopédie into existence. But his most daring writing took place in the shadows. Thrown into prison for his atheism in 1749, Diderot decided to reserve his best books for posterity--for us, in fact. In the astonishing cache of unpublished writings left behind after his death, Diderot challenged virtually all of his century's accepted truths, from the sanctity of monarchy, to the racial justification of the slave trade, to the norms of human sexuality. One of Diderot's most attentive readers during his lifetime was Catherine the Great, who not only supported him financially, but invited him to St. Petersburg to talk about the possibility of democratizing the Russian empire. In this

thematically organized biography, Andrew S. Curran vividly describes Diderot's tormented relationship with Rousseau, his curious correspondence with Voltaire, his passionate affairs, and his often iconoclastic stands on art, theater, morality, politics, and religion. But what this book brings out most brilliantly is how the writer's personal turmoil was an essential part of his genius and his ability to flout taboos, dogma, and convention.

*A world-class thinker counts the 100 ways in which humans behave irrationally, showing us what we can do to recognize and minimize these "thinking errors" to make better decisions and have a better life. Despite the best of intentions, humans are notoriously bad—that is, irrational—when it comes to making decisions and assessing risks and tradeoffs. Psychologists and neuroscientists refer to these distinctly human foibles, biases, and thinking traps as "cognitive errors." Cognitive errors are systematic deviances from rationality, from optimized, logical, rational thinking and behavior. We make these errors all the time, in all sorts of situations, for problems big and small: whether to choose the apple or the cupcake; whether to keep retirement funds in the stock market when the Dow tanks, or whether to take the advice of a friend over a stranger. The "behavioral turn" in neuroscience and economics in the past twenty years has increased our understanding of how we think and how we make decisions. It shows how systematic errors mar our thinking and under which conditions our thought processes work best and worst. Evolutionary psychology delivers convincing theories about why our thinking is, in fact, marred. The neurosciences can pinpoint with increasing precision what exactly happens when we think clearly and when we don't. Drawing on this wide body of research, *The Art of Thinking Clearly* is an entertaining presentation of these known systematic thinking errors--offering guidance and insight into everything why you shouldn't accept a free drink to why you SHOULD walk out of a movie you don't like it to why it's so hard to predict the future to why shouldn't watch the news. The book is organized into 100 short chapters, each covering a single cognitive error, bias, or heuristic. Examples of these concepts include: Reciprocity, Confirmation Bias, The It-Gets-Better-Before-It-Gets-Worse Trap, and the Man-With-A-Hammer Tendency. In engaging prose and with real-world examples and anecdotes, *The Art of Thinking Clearly* helps solve the puzzle of human reasoning.*
