

## ***Die Vogelsberger Westbahn***

A taste of the good life! This collection showcases 20 special recipes, all with photographs, that will inspire food lovers to take the party outside. Selected from some of Chronicle Books' best-loved cookbooks, here are easy-peasy drinks (alcoholic and nonalcoholic), quick appetizers, simple salads and sides, and great-for-the-grill main dishes. Whether it's the South Seas Sangria, Corn with Chipotle Butter, or the Honey-Glazed Spareribs that beckon, everything tastes better out on the patio. And grilling will be all the more relaxing for the cook who has this just-right repertoire at hand.

Tells the story of one of the world's best known HO railroads -- John Allen's spectacular Gorre & Daphetid Railroad, a line so wonderfully detailed that it took decades to build. Hundreds of photos and construction details explain the life and death of this magnificent layout.

Presents 16 plans for a layout designed for easy access and operation. Includes photos, diagrams, and

descriptions for use in any scale, size, or space. William Mason's beautiful steam locomotives were considered the finest in form and function, the "Rolls Royces" of the day. More than 700 of these locomotives were built at the Taunton, Massachusetts factory beginning in 1853. After 50 years of research, Art Wallace brings the complete Mason locomotive story to light. In detailed text and nearly 200 photographs and illustrations, Mason's handiwork comes to life in this rich historical volume. From American Standard 4-4-0s to 4-6-0s and double-truck 0-6-6Ts and 2-8-6T's, Mason locomotives have captured the eye of railfans, engineers and historians for decades. Now you can read the fascinating story and see the products that made Mason famous.

*Forty years ago, it was the way to travel. Back then, one could climb between crisp linens and soft blankets, adjust the oversized pillows, and watch America speed by in the night. With more than 300 photographs and 50 maps, Night Trains is a lively account of the Pullman enterprise during the golden years of its operation--from 1920 to 1955--when the remarkable sleeping car system routinely played host to more than 50,000 guests nightly. "A compelling tribute to a bygone time when getting there was half the fun... An education for the young and a scrapbook for those who remember." -- Herald-Dispatch*

*Presents the many ways commercial building kits can be combined by kitbashing into unique customized structures. Includes tips and techniques for creating houses, sheds, factories, and businesses to make an outstanding layout. **Bäder- und Brunnenlehre**

*Chronicles the waning years of the logging industry and the equipment and operations of the railroads that served it. From the late 1800s through the 1950s, West Virginia was one of the nation's largest producers of lumber. This book covers the unique geared locomotives that moved that lumber including the Shay, Climax and Heisler, designed to traverse the sharp curves and uneven track of mountain railways. Includes information on special logging cars, cranes and other equipment.*

*"For a long period, any art or cultural feature alien to the Hellenic or Roman world was held in contempt and the epithet "barbarian" thus acquired a pejorative meaning. The first reactions against this view appeared in the nineteenth century, when scholars began to acknowledge the existence of ancient civilizations which had had no writing. The present study shows the way of life of those Europeans living in the Metal Ages, describing their social and religious customs and setting out to understand, through the material objects they have left us, the way their minds worked and their*

Sometime in the 18th century, the word equality gained ground as a political ideal, but the idea was always vague. In this treatise, Erik von Kuehnelt-Leddihn argues that it reduced to one simple and very dangerous idea: equality of political power as embodied in democracy. He marshals the strongest possible case that democratic equality is the very basis not of liberty, as is commonly believed, but the total state. He uses national socialism as his prime example. He further argues the old notion of government by law is upheld in old monarchies, restrained by a noble elite. Aristocracy, not democracy, gave us liberty. On his side in this argument, he includes the whole of the old liberal tradition, and offers overwhelming evidence for his case. In our times, war and totalitarianism do indeed sail under the democratic flag. This book, capable of

overturning most of what you thought you knew about political systems, was first published in 1952.

This book provides an account of the development of European culture and society during the Bronze Age, the time span between c. 2000 and 700 BC. It was a period of remarkable innovation, seen for instance in the development and growth of metallurgy as a major industry, the spread of trading contacts, the origins of urbanism and the beginnings of social stratification. The study is divided chronologically into two, the earlier and later Bronze Age, giving a clear picture of the nature of the radical changes which occurred in the period as a whole. The geographical area covered, from the Atlantic shores across Europe into the Soviet Union and from northern Scandinavia to the Mediterranean, is too vast to be taken as one unit, and has been broken down into five regions; each is discussed in terms of settlement form, burial practices, ritual and religious sites, material culture, economic and social background, and trading patterns. The book describes and develops common themes that link together the different areas and cultural groups, rather than taking the typographical approach often adopted by Bronze Age specialists, and uses the results of radiocarbon dating to establish an objective chronology for the period. The text is generously illustrated and fully documented with radiocarbon dating tables and extensive bibliography. Our understanding of Bronze Age Europe is still increasing, but no other book of this scope had been written before this, in 1979. It is a major study of its time of interest to anyone
