The first book in a cracking series about the loveable Dinosaur Juniors, from the creative genius behind the #DrawWithRob phenomenon and the bestselling and award-winning Blown Away!

A celebration of dogs, the scientists who've lived alongside them, and how canines have been key to advancements in science for the betterment of all species. Almost everywhere there are humans on planet Earth, there are dogs. But what do dogs know and understand of the world? Do their emotions feel like our own? Do they love like we do? What do they think of us? Since our alliance first began on the hunt and on the farm, our relationship with dogs has evolved considerably. And with domestic dog population rising twenty per cent in the last decade alone, it is a bond that will continue to evolve. In order to gauge where our relationship with dogs goes from here, author and zoologist Jules Howard takes a look at the historical paths we have trod together, and at the many scientists before him who turned their analytic eye on their own four-legged companions. Charles Darwin and his contemporaries toyed with dog sign language and made special puzzle boxes and elaborate sniff tests using old socks. Later, the same questions drove Pavlov and Pasteur to unspeakable cruelty in their search for knowledge. Since then, leagues of psychologists and animal behaviourists have built upon the study of dogs and their much-improved methods have fetched increasingly important results: dogs have episodic memory similar to ours; they recognise themselves as individuals; and, in addition to their expert sense of smell, dogs’ noses can even detect thermal radiation. With the help of vets, ethologists, neurologists, historians and, naturally, his own dogs, Wonderdog reveals the study of dogs to be key in the advancement of compassion in scientific research, and crucial to making life on Earth better for all species.

Engrossing.” –Booklist, starred review In this triumphant debut inspired by true events, a ragtag gang of journalists and resistance fighters risk everything for an elaborate scheme to undermine the Reich. The Nazis stole their voices. But they would not be silenced. Brussels, 1943. Twelve-year-old street orphan Helene survives by living as a boy and selling copies of the country’s most popular newspaper, *Le Soir*, now turned into Nazi propaganda. Helene’s world changes when she befriends a rogue journalist, Marc Aubrion, who draws her into a secret network that publishes dissident underground newspapers. The Nazis track down Aubrion’s team and give them an impossible choice: turn the resistance newspapers into a Nazi propaganda bomb that will sway public opinion against the Allies, or be killed. Faced with no decision at all, Aubrion has a brilliant idea. While pretending to do the Nazis’ bidding, they will instead publish a fake edition of *Le Soir* that pokes fun at Hitler and Stalin—daring to laugh in the face of their oppressors. The ventriloquists have agreed to die for a joke, and they have only eighteen days to tell it. Featuring an unforgettable cast of characters and stunning historical detail, E.R. Ramzipoor’s dazzling debut novel illuminates the extraordinary acts of courage by ordinary people forgotten by time. It is a moving and powerful ode to the importance of the written word and to the unlikely heroes who went to extreme lengths to orchestrate the most stunning feat of journalism in modern history. Twelve charming models feature a tyrannosaurus, velociraptor, and other species. Simple directions make putting together each project a breeze. Suitable for ages 6 and up.
