Il latino si trova sotto l’attacco di una politica sempre più lontana dalla cultura, di interessi economici che vogliono ridurre la formazione a semplice istruzione, di pedagogie alla moda, delle tecnologie e dell’informatica, ma anche di chi non ha saputo ripensare questo studio alla luce della linguistica, della psicologia cognitiva e della filosofia della scienza. Tesi centrali del libro sono che la traduzione dal latino attiva, in misura straordinariamente potente, le operazioni intellettuali fondamentali: secondo il quadro classico tracciato dalla scuola di Jean Piaget, induzione, deduzione e soluzione di problemi, ma anche formulazione e falsificazione di ipotesi; e che tradurre dal latino è il più potente esperimento di esercizio nell’uso del metodo della ricerca scientifica, fatto di problemi, congetture e confutazioni, trials and errors: apparente paradosso fondato sull’epistemologia di K. R. Popper e sugli studi di D. Antiseri. This new edition is a complete re-write of the original book and reports on new areas of research and raises questions about the different forms which dyslexia can take in different languages. The book also looks afresh at assessment, teaching approaches, and counselling.

A charming portrait of one man’s dreams and schemes, by “the greatest Italian writer of the twentieth century” (The Guardian). In this enchanting book of linked stories, Italo Calvino charts the disastrous schemes of an Italian peasant, an unskilled worker in a drab northern industrial city in the 1950s and ’60s, struggling to reconcile his old country habits with his current urban life. Marcovaldo has a practiced eye for spotting natural beauty and an unquenchable longing for the unspoiled rural world of his imagination. Much to the continuing puzzlement of his wife, his children, his boss, and his neighbors, he chases his dreams and gives rein to his fantasies, whether it’s sleeping in the great outdoors on a park bench, following a stray cat, or trying to catch wasps. Unfortunately, the results are never quite what he anticipates. Spanning from the 1950s to the 1960s, the twenty stories in Marcovaldo are alternately comic and melancholy, farce and fantasy. Throughout, Calvino’s unassuming masterpiece “conveys the sensuous, tangible qualities of life” (The New York Times).

A beautiful gift edition of this classic fable about one man's quest to create a forest. In 1910, while hiking through the wild lavender in a wind-swept, desolate valley in Provence, a man comes across a shepherd called Elz é ard Bouffier. Staying with him, he watches Elz é ard sorting and then planting hundreds of acorns as he walks through the wilderness. Ten years later, after the war, he visits the shepherd again and sees the young forest he has created spreading slowly over the valley. Elz é ard's solitary, silent work continues and the narrator returns year after year to see the miracle he is gradually creating: a verdant, green landscape that is a testament to one man's creative instinct.

This evidence-packed guide explores the growing importance of new technologies and situated learning in the vanguard of medical and health sciences education, backed by real-world clinical applications. Its dual emphasis on problem-based learning (PBL) and applied learning is reflected in the range of author perspectives, from understanding how technologies engage learners to implications for program design. Innovations covered range from wider and more targeted use of mobile devices and electronic medical records to video cases and virtual patients, in clinical contexts from family practice to specialized surgery. At the same time, chapters detail both the necessary hardware for putting these systems into place and the software needed to make them accessible to learners. Among the featured topics: Technology and group processes in PBL: An ethnographic study. What is real? Using problem-based learning in virtual worlds. Are Wikipedia articles reliable learning resources in PBL curricula? Utilizing mobile electronic health records in clinical education. Measuring emotions in medicine: methodological and technological advances within authentic medical learning environments. The deteriorating patient smartphone app: towards serious game design. Medical/health sciences educators and researchers in educational technology will look to Educational Technologies in Medical and Health Sciences Education to pinpoint current and future trends in an ever-important field.

There has been much debate on the purposes and methods of assessment over the last couple of years. This book gathers together the latest thinking and looks at how assessment can be used to promote or inhibit learning. Unlike other books on the market, this one summarizes theory and shows how it can be best put into practice, using as little jargon as possible. Some of the issues discussed in this text include:
* how assessment can erode self-esteem and motivation
* how skills of reflection, self-evaluation and personal target setting can impact on learning
* how far learners of all ages understand what they are required to learn
* how far students are able to evaluate their own performance and what schools can do in the short, medium and long-term to promote more effective learning. Part of the What's In It For Schools series, this book is ideal for teachers and other non-academics concerned with education who require a grounding in the issue to help them in their daily work.

Music and dyslexia is of particular interest for two reasons. Firstly, research suggests that music education can benefit young dyslexics as it helps them focus on auditory and motor timing skills and highlights the rhythms of language. Secondly, dyslexic musicians at a more advanced level face particular challenges such as sight-reading, written requirements of music examinations and extreme performance nerves. This is a sequel to the highly successful Music and Dyslexia: Opening New Doors, published in 2001. The field of dyslexia has developed rapidly, particularly in the area of neuropsychology. Therefore this book focuses on these research advances, and draws out the aspects of music education that benefit young dyslexics. The contributors also discuss the problems that dyslexic musicians face, and several chapters are devoted to sight-reading and specific strategies that dyslexics can use to help them sight-read. The book offers practical techniques and strategies, to teachers and parents to help them work with young dyslexics and dyslexic musicians.

The Religious Sense, the fruit of many years of dialogue with students, is an exploration of the search for meaning in life. Luigi Giussani shows that the nature of reason expresses itself in the ultimate need for truth, goodness, and beauty. These needs constitute the fabric of the religious sense, which is evident in every human being everywhere and in all times. So strong is this sense that it leads one to desire that the answer to life's mystery might reveal itself in some way.

"Simplexity, as I understand it, is the range of solutions living organisms have found, despite the complexity of natural processes, to enable the brain to prepare an action and plan for the consequences of it. These solutions are simplifying principles that enable the processing of information or situations, by taking into account past experience and anticipating the future. They are neither caricature nor simplification, but rather, sometimes at the cost of occasional detours, in order to achieve faster, more elegant, more effective actions."
A. B. AS Alain Berthoz demonstrates in this profoundly original book, simplicity is never easy: it requires suppressing, selecting, connecting, thinking, in order to then act in the best way possible. And what if we, in turn, are inspired by the living world to process the complexity that surrounds us?

When ten-year-old Enaiatollah Akbari's small village in Afghanistan falls prey to Taliban rule in early 2000, his mother shepherds the boy across the border into Pakistan but has to leave him there all alone to fend for himself. Thus begins Enaiat's remarkable and often punishing five-year ordeal, which takes him through Iran, Turkey, and Greece before he seeks political asylum in Italy at the age of 10. A story of emotional agony of dangerous border crossings, trekking across bitterly cold mountain pathways for days on end or being stuffed into the false bottom of a truck. But not everyone is as resourceful, resilient, or lucky as Enaiat, and there are many heart-wrenching casualties along the way. Based on Enaiat's close collaboration with Italian novelist Fabio Geda and expertly rendered in English by a translator who perfectly preserves the childlike perspective and rhythms of an intimate oral history. Told with humor and humanity, In the Sea There Are Crocodiles brilliantly captures Enaiat's moving and engaging voice and lends urgency to an epic story of hope and survival.

'An extraordinary source of inspiration for autistic children, their parents - and all people'
Time It's estimated that one in almost a hundred people are diagnosed as being on the autistic spectrum but there is far more hope for them today than ever before thanks to groundbreaking new research. In this fascinating and highly readable book, Temple Grandin offers her own experience as an autistic person and her research as genetic research. She also highlights long-ignored sensory problems as well as the need to treat autism symptom by symptom, rather than with an umbrella diagnosis. Most exciting of all, she argues that raising and educating children on the autistic spectrum needs to be less about focusing on their weaknesses, and more about fostering their unique contributions.

Purgatory

The second volume of the Divine Comedy presents the Purgatory. Continuing the story of the poet's journey through the medieval Other World under the guidance of the Roman poet Virgil, the Purgatory culminates in the regaining of the Garden of Eden and the reunion there with the poet's long-lost love Beatrice.

'It's always a treat to read Elizabeth Taylor. Mossy Trotter is a real gem. A delightfully mischievous boy living in those long-ago halcyon days when children played out all day, roaming commons, scavenging on rubbish tips and stamping in newly-laid tar'
JACQUELINE WILSON 'We - that is, Herbert and I - want you, Mossy, to be our page-boy,' Miss Silkin said, staring hard at Mossy again, as if she were trying to imagine him dressed up, and with his hair combed. Mossy went very red, and nearly choked on a piece of cake, and Selwyn laughed, and went on laughing, as if he had just heard the funniest joke of all his life. They both knew what being a page-boy meant. One of the boys at school - one of the very youngest ones - had had to be one, wearing velvet trousers and a frilled blouse.'
When Mossy moves to the country, life is full of delights - trees to climb, woods to explore and, best of all, the marvellous dump to rummage through. But every now and then his happiness is disturbed - chiefly by his mother's meddling friend, Miss Silkin. And a dreaded event casts a shadow over even the sunniest of days - being a page-boy at her wedding. In her only children's book, Elizabeth Taylor perfectly captures the temptations, confusion and terrors of a mischievous boy, and just how illogical, frustrating and inconsistent adults are!

"The Brill Dictionary of Ancient Greek" is also available online and as a two-volume boxed set. "The Brill Dictionary of Ancient Greek" is the English translation of Franco Montanari s "Vocabolario della Lingua Greca." With an established reputation as the most important modern dictionary for Ancient Greek, it brings together 140,000 headwords taken from the literature, papyri, inscriptions and other sources of the archaic period up to the 6th Century CE, and occasionally beyond."The Brill Dictionary of Ancient Greek" is an invaluable companion for the study of Classics and Ancient Greek, for beginning students and advanced scholars alike. Translated and edited under the auspices of The Center for Hellenic Studies in Washington, DC, "The Brill Dictionary of Ancient Greek" is based on the completely revised 3rd Italian edition published in 2013 by Loescher Editore, Torino. Features The principal parts of some 15,000 verbs are listed directly following the entry and its etymology. For each of these forms, the occurrence in the ancient texts has been certified. When found only once, the location is cited. Nearly all entries include citations from the texts with careful mention of the source. The dictionary is especially rich in personal names re-checked against the sources for the 3rd Italian edition, and in scientific terms, which have been categorized according to discipline. Each entry has a clear structure and typography making it easy to navigate. "For a number of years now, scholars at ease in Italian have benefitted enormously from the riches, layout, concision, and accuracy of Professor Montanari's "Vocabolario della Lingua Greca," with its added advantage of the inclusion of names. Hence classicists in general will welcome the English version of this very valuable resource." From international bestseller Stephen King the first ebook ever published—a novella about a young man who hitches a ride with a driver from the other side. Riding the Bullet is “a ghost story in the grand manner” from the bestselling author of Bag of Bones, The Girl Who Loved Tom Gordon, and The Green Mile—a short story about a young man who hitches a ride with a driver from the other side.

This book brings together the lessons of research on both the nature of learning and different educational applications, and it summarises these as seven key concluding principles.

First published in 1899, "The School and Society "describes John Dewey's experiences with his own famous Laboratory School, started in 1896. Dewey's experiments at the Labora-tory School reflected his original social and educational philosophy based on American experience and concepts of democracy, not on European education models then in vogue. This forerunner of the major works shows Dewey's per-vasive concern with the need for a rich, dynamic, and viable society. In his introduction to this volume, Joe R. Burnett states Dewey's theme. Industrialization, urbanization, science, and technology have created a revolution the schools cannot ignore. Dewey carries this theme through eight chapters: The School and Social Progress; The School and the Life of the Child; Waste in Education; Three Years of the University Elementary School; The Psychology of Elementary Education; Froebel's Educa-tional Principles; The Psychology of Occupations; and the Development of Attention.

This handbook is designed to help school staff members and others broaden their view of assessment and put assessment into the broader context of school restructuring while keeping the focus on students. The handbook is arranged in sections, each dealing with a separate topic. Each section contains a number of papers by different authors that represent the best thinking on the topic. Each section begins with an overview that discusses the major perspectives, ideas, issues, and concerns that relate to the section topic and describes how each paper fits into this fabric. The sections are: (1) "Setting the Stage"; (2) "Placing Student Performance Assessment within the Context of School Restructuring"; (3) "Developing Student Learning Goals for the 21st Century"; (4) "Aligning Assessment with Curriculum and Instruction"; (5)

"Designing Performance Tasks"; (6) "Establishing Performance Criteria"; (7) "Using Performance Assessment Information for Improvement"; and (8) "Implementing Performance Assessment." In all, there are 98 papers in the handbook and 3 "resources": a glossary, a list of assessment information sources, and a list of contributors. Most of the articles contain references and illustrations. (SLD)

Children's picturebooks are the very first books we encounter, and they form an important, constantly evolving, and dynamic sector of the publishing world. But what does it take to create a successful picturebook for children? In seven chapters, this book covers the key stages of conceiving a narrative, creating a visual language and developing storyboards and design of a picturebook. The book includes interviews with leading children's picturebook illustrators, as well as case studies of their work. The picturebooks and artists featured hail from Australia, Belgium, Cuba, France, Germany, Hungary, Ireland, Italy, Japan, Norway, Poland, Portugal, Russia, Singapore, South Korea, Spain, Taiwan, the UK and the USA. In this publication, Martin Salisbury and Morag Styles introduce us to the world of children's picturebooks, providing a solid background to the industry while exploring the key concepts and practices that have gone into the creation of successful picturebooks.

Selected as a Book of the Year 2016 in the Guardian Reunion is a little-known but perfect novel with fans including Ian McEwan, John Boyne, Deborah Moggach, David Nicholls, Meg Rosoff and Sarah Perry. Inspired by the real psychology study popularized by the New York Times and its "Modern Love" column, this contemporary YA is perfect for fans of Eleanor and Park. Two random strangers. Two secrets. Thirty-six questions to make them fall in love. Hildy and Paul each have their own reasons for joining the university psychology study that asks the simple question: Can love be engineered? The study consists of 36 questions, ranging from "What is your most terrible memory?" to "When did you last sing to yourself?" By the time Hildy and Paul have made it to the end of the questionnaire, they've laughed and cried and lied and thrown things and run away and come back and driven each other almost crazy. They've also each discovered the painful secret the other was trying so hard to hide. But have they fallen in love? Told in the language of modern romance -- texting, Q&A, IM -- and punctuated by Paul's sketches, this clever high-concept YA is full of humor and heart. As soon as you've finished reading, you'll be searching for your own stranger to ask the 36 questions. Maybe you'll even fall in love. Rights have sold in 19 territories!

In a small Sicilian village, a young and inexperienced policeman receives a strange phone call from a retired diplomat. On investigating the matter, he finds the diplomat dead. What at first appears to be a simple case of suicide turns into an intricate tale of corruption that involves the Mafia, the head of police, and the entire Sicilian establishment. Leonardo Sciascia (1921-1989) was born in Sicily. One of Italy's &most important modern writers, he was also a controversial commentator on political affairs, especially within Sicily. In addition to notable mystery novels, including The Day of the Owl and The Wine Dark Sea, Sciascia wrote plays, short stories, and essays.

One relentless summer, six children explore the scorched wheatfields that surround their tiny community in the Italian countryside, while the adults shelter indoors. But when the gang chances on a tumbledown farmhouse, nine-year-old Michele Amitrano makes a discovery so momentous he dare not tell anyone about it. I ' m Not Scared is a devastatingly authentic portrayal of childhood, and Michele must summon all of his imaginative resources to deal with his terrible secret. This is an enthralling and terrifying story about friendship and betrayal, guilt and innocence, which drives us inexorably to its tragic climax.
