"The Depository Trust Company" reports the early 1970s origin and evolution of The Depository Trust Company (DTC), the world's largest securities depository, and how it became the basis of The Depository Trust & Clearing Corporation (DTCC) in 1999. It describes the basic policies and company culture of DTC and DTCC and shows how these organizations made the clearance and settlement of virtually all trades in U.S. equity, corporate debt, and municipal securities more accurate and less costly, obliterating through automation the conditions that created the Wall Street paperwork crisis of the late 1960s."

The current economic crisis reveals just how central finance has become to American life. Problems with obscure securities created on Wall Street radiated outward to threaten the retirement security of pensioners in Florida and Arizona, the homes and college savings of families in Detroit and Southern California, and ultimately the global economy itself. The American government took on vast new debt to bail out the financial system, while the government-owned investment funds of Kuwait, Abu Dhabi, Malaysia, and China bought up much of what was left of Wall Street. How did we get into this mess, and what does it all mean? *Managed by the Markets* explains how finance replaced

From corporations operated to create shareholder value, to banks that became portals to financial markets, to governments seeking to regulate or profit from footloose capital, to households with savings, pensions, and mortgages that rise and fall with the market, life in post-industrial America is tied to finance to an unprecedented degree. *Managed by the Markets* provides a guide to how we got here and unpacks the consequences of linking the well-being of society too closely to financial markets.

China's banking system has been gradually transformed from a centralized, government-owned and government-controlled provider of loans into an increasingly competitive market in which different types of banks, including several U.S. banks, strive to provide a variety of financial services. Only three banks in China remain fully government-owned; most banks have been transformed into mixed ownership entities in which the central or local government may or may not be a major equity holder in the bank.
