Modern cars are more computerized than ever. Infotainment and navigation systems, Wi-Fi, automatic software updates, and other innovations aim to make driving more convenient. But vehicle technologies haven't kept pace with today's more hostile security environment, leaving millions vulnerable to attack. The Car Hacker's Handbook will give you a deeper understanding of the computer systems and embedded software in modern vehicles. Then, once you have an understanding of a vehicle's communication network, you'll learn how to intercept data and perform specific hacks to track vehicles, unlock doors, glitch engines, flood communication, and more. With a focus on low-cost, open source hacking tools such as Metasploit, Wireshark, Kayak, can-utils, and ChipWhisperer, The Car Hacker's Handbook will show you how to: -Build an accurate threat model for your vehicle -Reverse engineer the CAN bus to fake engine signals -Exploit vulnerabilities in diagnostic and data-logging systems -Hack the ECU and other firmware and embedded systems -Feed exploits through infotainment and vehicle-to-vehicle communication systems -Override factory settings with performance-tuning techniques -Build physical and virtual test benches to try out exploits safely If you're curious about automotive security and have the urge to hack a two-ton computer, make The Car Hacker's Handbook your first stop.

The finding in 1727 of the gilded bronze head of the Roman goddess Minerva led to the discovery of the Roman temple and of the baths. Since then archaeologists have discovered more and more about the Roman city of Aquae Sulis. In this new edition of a work first published almost 30 years ago, Professor Barry Cunliffe brings the story right up to date. He deals in detail with the temple and its precinct and with the "curse tablets" which have been deciphered to reveal the thoughts of Roman visitors. He then explains just how the bathing establishment was organized and explores the relationship between the spa and the town. We learn what life was like for the local inhabitants as well as for the visitors, and he charts the process of decline and decay during the 300 years after the Roman period.
