The text and images in this book are in grayscale. A hardback color version is available. Search for ISBN 9781680922929. Principles of Accounting is designed to meet the scope and sequence requirements of a two-semester accounting course that covers the fundamentals of financial and managerial accounting. This book is specifically designed to appeal to both accounting and non-accounting majors, exposing students to the core concepts of accounting in familiar ways to build a strong foundation that can be applied across business fields. Each chapter opens with a relatable real-life scenario for today's college student. Thoughtfully designed examples are presented throughout each chapter, allowing students to build on emerging accounting knowledge. Concepts are further reinforced through applicable connections to more detailed business processes. Students are immersed in the "why" as well as the "how" aspects of accounting in order to reinforce concepts and promote comprehension over rote memorization.

The rapid proliferation of unincorporated business forms has moved beyond the scope of traditional Corporations and Agency/Partnership courses and textbooks, which leaves students without the necessary knowledge to competently advise business clients. Unincorporated Business Entities was designed to fill that widening gap in the existing curriculum. Unincorporated Business Entities is designed for a three-semester-hour course and has the following features: • Like its predecessors, the new edition of Unincorporated Business Entities takes a business planning approach to teaching the modern law of partnerships and other unincorporated firms. • The material on LLCs has largely been rewritten, reflecting the rapid development in this form over the last several years. • Each chapter contains new and updated notes and problems that provide a "hands-on" approach to the consequences of, and planning and drafting for, issues in agency, partnership, limited partnerships, LLCs, and limited liability partnerships. • The materials on partners' financial rights now include a short primer on financial accounting. The Teacher's Manual is almost six-fold expanded from previous versions. It contains approaches to organizing classes, synopses of all the cases, lecture outlines, proposed questions and answers, discussions of answers to all the problems, diagrams of the complex cases, and flow charts of complex statutory analysis in areas like partnership dissolution and winding up. The Appendix also contains the partnership, limited partnership, and limited liability company statutes you will need for reference purposes.

This student-friendly text on Business Law discusses in detail different laws and Acts relating to business, commerce, trade and industry. Divided into six parts, Part I, The Indian Contract Act, 1872 discusses topics such as agreement and contract, offer and acceptance, and consideration. Part II, The Sale of Goods Act, 1930 deals with formation of contract of sale, conditions and warranties, and performance of contract of sale. Part III, The Indian Partnership Act, 1932 explains the nature of partnership and registration and dissolution of a firm. Part IV, The Negotiable Instruments Act, 1881 describes parties to negotiable instruments, presentation of negotiable instruments, and so on. Part V, The Indian Companies Act, 1956 discusses the formation and incorporation of a company and appointment of directors and their legal position. Part VI, General Acts, gives an overview of The Consumer Protection Act, 1986 and The Foreign Exchange Management Act, 2000. The book is intended as a text for the undergraduate students of commerce and postgraduate students of management. Besides, students pursuing professional courses such as CA, ICWA and CS and those appearing for Judicial Services examination will also find the book quite useful. Key Features Cites examples, wherever necessary, to clarify the implication of the law. Illustrates concepts with the help of worked out examples. Furnishes a Glossary on the legal terms used. Cites case laws to make the concepts clear. Supplements the text with pedagogical features such as bird's-eye view to make the book more practical and easy to understand.

The new edition of this established text is a fully updated account of the law of partnerships in a readily accessible and readable form. It is a valuable tool for practitioners who need a readily available source of information on partnership law as well as students of partnership law. The work explains the essential characteristics of the subject, highlighting difficult and developing areas by reference to both established and modern cases and legislation. In addition to UK authorities, of which there are an increasing number at a high level, it also covers cases from many parts of the Commonwealth that still use the Partnership Act of 1890. New developments such as the amendments to the law on limited partnerships and changes to the legislative framework of limited liability partnerships are covered. In essence the book explains the essential characteristics of the subject through areas such as formation, regulation and dissolution of partnership and has inciteful commentary that even experienced lawyers find useful.
