For the first time, living things know the fear of ending. And they will go to any lengths to escape this grim new spectre, death. The Doctor is an old hand at cheating death. Now, at last, he can stop it at source. He is coming for the Kotturuh, ready to change everything so that Life wins from the start. Not just the last of the Time Lords. The Time Lord Victorious.

When someone in a child's life goes through a personal hardship, parenting is put to a test. Finding the right words to answer difficult questions can be a challenge. This is a story of a hardship of mine that I explained to a child, gently teaching him in the process, some important lessons about faith, pride, hope, justice and love. This fairy-tale flavored story involves a trip to the County jail, and will help a child understand a situation like this better when the same happens to someone in his or her life. Every child needs to understand the pitfalls of pre-judging people, and missing out on what they can offer you to make your journey in life better. Every child needs to understand the importance of perseverance through the dark times in life and of holding your head up high when times get tough. And finally, every child needs to believe that everything will be okay

Doctor Who: Thirteenth Doctor's Guide

Doctor Who: The Dangerous Book of Monsters

Even a Time Lord can't change the past. A wasteland. A dead world... No, there is a biodome, rising from the ash. Here, life teems and flourishes, with strange and lush plants, and many-winged insects with bright carapaces - and one solitary sentient creature, who spends its days watering the plants, talking to the insects, and tending this lonely garden. This is Inyit, the Last of the Kotturuh. In All Flesh is Grass we are transported back to The Dark Times. The Tenth Doctor has sworn to stop the Kotturuh, ending Death and bringing Life to the universe. But his plan is unravelling - instead of bringing Life, nothing has changed and all around him people are dying. Death is everywhere. Now he must confront his former selves - one in league with their greatest nemesis and the other manning a ship of the undead...

Embark on a strange and enchanting adventure with old foes and monsters in this glorious crossover of Doctor Who and The Wonderful Wizard of Oz. When a sudden tornado engulfs the TARDIS, the Thirteenth Doctor and her fam find themselves transported to the magical land of Oz. With a damaged TARDIS and an unexpected stowaway from the 1930s, their only hope of getting home is to follow the yellow brick road. But when an army of scarecrows ambushes them, they quickly realise that everything is not as it should be, and they're thrown into a fight for survival against a mysterious enemy. As each of her companions becomes a shadow of their former selves, only the Doctor is left standing. Desperate to save her friends, she must embark on a perilous journey to seek help from the mysterious Wizard of Oz - and stop whatever forces are at work before she and her friends are trapped in the fictional world forever.

Have you ever just wondered about life? What is Life? Is there God? How do we fit into the universe? What is our relationship with other living things? What does it mean to be human? Doctor Ergo provides you with a firm background and vantage point from which to view those questions. You will gain a comprehensive perspective on Life and the human condition - from the Big Bang, through Life history on this planet, to the current condition of our human mind and species, and some solid thoughts on what Life...is. This is a Story of Life. In a Darwinian world, our mental capacity has enabled us to ascend to the pinnacle of the survival pyramid. Therefore, the essence of the story about our species centers on our mind. Our cognitive skills are built upon the neural architectures that originally developed for vision and for speech/hearing. We can be aware of the 2 sides of our mind through introspection of our own consciousness: Vision based - non-verbal emotions, feelings and intuitions coming from our vision-based cognition in our Right Brain. Speech based - words, thoughts, and reasoning coming from our speech-based cognition in our Left Brain. Vision developed quickly in the Cambrian Period (570 million years ago) when the earliest animals with body forms emerged. Vision enabled the animal to see the "world," and gave the animal a sense of "self," i.e. that which was viewing the world. Consequently the concepts of "world" and "self" are deeply embedded in the cognition that developed from the vision neurological architecture. Likewise, Darwinian survival necessitated identification of same-species animals (for protection and reproduction); hence the concept of "group" is also deeply embedded in the vision-based neurology. Our speech-based left brain has no equal anywhere else in Life on this planet. This is what has made possible the major advances of the human mind, separated us from the animals, and enabled us to conquer the planet. This Sensory Mind model clarifies Plato's writings and the psychological models that were developed by Sigmund Freud and Carl Jung. The personality types tested by Myers-Briggs, which are based on the theories of Carl Jung, are consistent with the Sensory Mind. Major trends in human history have been about the growth of our collective left brain in the governance of human affairs and its interplay with our vision-based (non-verbal) right mind. Our human "advances" have largely resulted from development of our speech-based mind, but the essence and truth of life comes to us from our vision-based mind. Our earliest groupings and civilizations were largely governed by vision-based animal grouping models. These have evolved into newer civilizations and human groupings that include participation and/or leadership of our left brain "group-think." We are very familiar with the concept of Darwinian survival and its role in the evolution of life. However, Darwinian survival is simply the strategy or tactic that governs the advancement of Life. What is it that drives Life to engage in the Darwinian struggle for survival? There IS a Life Drive that fuels evolution...what is it? The Life Drive permeates all of life and is the force that drives Darwinian evolution. It is theorized that Life is a previously unidentified parameter in Einstein's Theory of Relativity and that it exists at the conditions opposite to the Big Bang conditions. Most religious and belief systems, whether god-based such as Judaism, Christianity, or Islam, or spiritually-based such as Buddhism or Taoism, are oriented towards the ultimate truth that is Life.

Doctor Who: Legends of Camelot

A hospice doctor shares her own experience with near death and her work with the dying.

Written by a practicing emergency physician, The White Coat Investor is a high-yield manual that specifically deals with the financial issues facing medical students, residents, physicians, dentists, and similar high-income professionals. Doctors are highly-educated and extensively trained at making difficult diagnoses and performing life saving procedures. This book fills in the gaps and will teach you to use your high income to escape from your student loans, provide for your family, build wealth, and stop getting ripped off by unscrupulous financial professionals. Straight talk and clear explanations allow the book to be easily digested by a novice to the subject matter yet the book also contains advanced concepts specific to physicians you won't find in other financial books. Twelve extraordinary Doctor Who stories, each featuring a monstrous villain from the Doctor Who world. On every planet that has existed or will exist, there is a winter... Many of the peoples of Old Earth celebrated a winter festival. A time to huddle together against the cold; a time to celebrate being half-way out of the dark. But shadows are everywhere, and there are some corners of the universe which have bred the most terrible things, lurking in the cold between the stars. Here are twelve stories - one for each of the Twelve Days of Christmas - to remind you that to come out of the darkness we need to go into it in the first place. We are not safe. And, whatever you do: don't blink. Written by popular children's author, and lifelong Doctor Who fan, Dave Rudden.

Today, the debate about our health care system is raging, but it often seems too complex or politically-driven for people to navigate. There has perhaps never been a better time to share with the American public a book that explains the state of our health care in an honest, comprehensive, and reliable way. Dying of Health Care, authored by a primary care physician with nearly 40 years of experience practicing in the U.S. and U.K., provides an easy-to-understand examination of the American health care system's major problems and potential solutions. Dr. Hanna explores the all-important question facing us today: why are Americans paying much more per person for health care than those in other developed nations, but getting much less in terms of quality? Approaching this painful paradox through a clinician's eyes, Dr. Hanna first makes a careful diagnosis and then prescribes an appropriate treatment to heal our ailing system. He shares real-life examples of patients and provides insights into the minds of doctors, including how their decisions influence the costs and outcomes of treatments. Ultimately, Dr. Hanna exposes how the system harms us - even sometimes kills us - both physically and financially, and he offers innovative solutions that can work to create the quality, affordable system we deserve.
