A romantic tragedy set in the tough corporate world of a major airline. Intense suspense culminates in a shocking moment, reminiscent of D.B. Cooper's infamous hijacking, as a man tumbles from a passenger jet ten thousand feet above a cool, moonlit Arizona desert night. A series of seemingly unrelated events have occurred over several months at TriCon Airlines. A routine flight turns tragic when a flight attendant is struck and paralyzed by a careening food cart. A massive bird strike rocks another flight and an engine explosion on yet another flight fatally injures a passenger. TriCon's arrogant management wrongly places the blame for much that happened on long-time and respected senior engineer, Jack Traner, shattering his comfortable life with his wife Ann. Agonized by the way his life has been torn apart,

he sets in motion a deadly quest for revenge. Highly trained, armed with insider knowledge, and virtually unlimited access to TriCon's planes, he methodically and brilliantly sets the stage to exact retribution for his ruined life. An ordinary man, pushed too far, decides to push back. It's a story that no one could have predicted or thought possible in today's environment of intense airport security and passenger awareness.

A look at why we are interested in what we see in art. Are we born with aesthetic preferences that are shaped by cultural influences? Is our natural attraction to Beauty another weapon in our arsenal of species' survival? This book examines many so-called rules of composition in the visual arts to find natural reasons for their existence. It is designed to aide the visual artist and those who appreciate their work by bringing attention to subtle cues of attraction cultivated by our ancient and immediate ancestors. It calls upon recent work in neuroaesthetics and other scientific disciplines to back up its speculative claims, and asks the reader to contribute opinions of their own on the books' website at naturallycomposed.com. There are many examples of photos in the book, and the reader is again asked to insert their own examples to enforce or refute the claims.
