- and various different Islamic phenomena - in Indonesia and in other parts of the Muslim world. It is argued that we preferably may approach Islam from three different angles, that is, to discuss it from the normative, the written, and the lived perspectives respectively. In this study, thorough attention

In fact, this research has spread outside of computer science to the management sciences and social sciences due to its importance to business and society as a whole. The growing importance of sentiment analysis coincides with
