This book analyses colonial and postcolonial writing about Cyprus, before and after its independence from the British Empire in 1960. These works are understood as 'transportal literatures' in that they navigate the liminal and layered forms of colonialism which impede

Access Free Doing Business In Cyprus Baker Tilly

the freedom of the island, including the residues of British imperialism, the impact of Greek and Turkish nationalisms, and the ethnolinguistic border between north and south. This study puts pressure on the postcolonial discipline by evaluating the unique hegemonic relationship Cyprus has with three metropolitan centres, not one. The print languages associated with each centre (English, Greek, and Turkish) are complicit in neo-colonial activity. Contemporary Cypriot writers address this in order to resist sectarian division and grapple with their deferred postcoloniality.

In this definitive new account of the emergence of human rights activism in post-war Britain, Tom Buchanan shows how disparate individuals, organisations and causes gradually came to acquire a common identity as 'human rights activists'. This was a slow process whereby a coalition of activists, working on causes ranging from anti-fascism, anti-apartheid and decolonisation to civil liberties and the peace movement,

began to come together under the banner of human rights. The launch of Amnesty International in 1961, and its landmark winning of the Nobel Peace Prize in 1977 provided a model and inspiration to many new activist movements in 'the field of human rights', and helped to affect major changes towards public and political attitudes towards human rights issues across the globe.

A fundamental premise of Doing Business is that economic activity requires good rules that are transparent and accessible to all. Such regulations should be efficient, striking a balance between safeguarding some important aspects of the business environment and avoiding distortions that impose unreasonable costs on businesses. Where business

regulation is burdensome and competition limited, success depends more on whom you know than on what you can do. But where regulations are relatively easy to comply with and accessible to all who need to use them, anyone with talent and a good idea should be able to start and grow a business in the formal sector. Visitors like Lawrence Durrell, Colin Thubron, Christopher Hitchens and Sebastian Junger have registered the effects of political strife on both the people of the island and those who visit from abroad. Their accounts demonstrate how geopolitical realities--such as colonization, insurgency, inter-communal warfare, and now decades of militarized 'peace'--shape the narrating self and its relations to others. Here, Jim Bowman assesses the effects of Cypriot history on writings about the island through an

analysis of memoirs, travelogues, political journalism, guide books and ethnographies. Through this examination of popular texts, Bowman shows how a western and politicized image of Cyprus has been created, increasingly divorced from the realities experienced by the local population. The discourse of globalization that pertains to higher education reform is troubling. The first troubling thing about much of the discourse that concerns globalization is that it most often does not name a human subject. We propose that globalization discourse should be written for and directed towards human beings or students. The second troubling

Access Free Doing Business In Cyprus Baker Tilly

thing about the discourse of globalization is the way that it antagonizes and marginalizes who that missing subject might be. The two relationships form the themes of this book. The nature and logic of discourse about globalization expresses a social rationality that serves as a precondition to constructing relevant meanings. The way that we conceive or obscure the subject produces a condition or position where those whom are the subject of the discourse must indeed await its effects—who is the pertinent policy about? Or, for whom is policy intended? Much policy discourse holds consequences for the way in which outcomes of policies are understood or explained in the social milieu where policies are enacted. The same discourse constructs and deconstructs identities and, as we will see, the language of reform in fact antagonizes and

Access Free Doing Business In Cyprus Baker Tilly

marginalizes students by virtue of a particular vagueness in the discourse and symbols of the discourse. What is at issue in the discourse of globalization is the character and logic of collective identities. How then to relate students to the cluster of features that comprise globalization?
