

Doped The Real Life Story Of The 1960s Racehorse Doping Gang

The first in-depth look at this rising jazz star. Born on Vancouver Island, Diana Krall attended Berklee College of Music in Boston on a scholarship before releasing her first album to critical acclaim. Like her Canadian counterparts Alanis Morissette, Sarah McLachlan, Shania Twain, and Celine Dion, she has become a music celebrity, a personal friend of Sarah Jessica Parker, Clint Eastwood, Robert DiNiro, and Elvis Costello, her fiancé.

Patrice des Moutis was a handsome, charming and well educated Frenchman with an aristocratic family, a respectable insurance business, and a warm welcome in the smartest Parisian salons. He was also a compulsive gambler and illegal bookie. Between the late 1950s and the early 1970s, des Moutis made a daring attempt to beat the French state-run betting system. With a genius for mathematics and a deep love and understanding of the horse-racing world – not to mention excellent relationships with all the top trainers and jockeys – he applied himself to his task with vigour and meticulous research. A series of spectacular coups netted him (and his friends, with whom he generously shared his predictions) the equivalent of millions of pounds, and soon saw him nicknamed Monsieur X and hailed as a hero by a public desperate to see someone get one over on the state. Des Moutis' success so alarmed the authorities that they repeatedly changed the rules of betting in an effort to stop him. And so a battle of wills began, all played out on the front pages of the daily newspapers as the general public willed des Moutis on to ever greater successes. He remained one step ahead of the authorities until finally the government criminalised his activities, driving him into the arms of the underworld. Eventually the net began to close, high-profile characters found themselves the target of the state's investigation, and people began turning up dead. This long-running cat and mouse game – with the law on one side and des Moutis and the gangsters on the other – is a dazzling tale of glamour, riches, violence and ultimately tragedy.

This book chronicles the types and advances in doping techniques used by amateur and professional athletes over the last century. As modern medicine and technology have evolved, the drugs and techniques used to boost athletic performance have evolved along similar lines.

'I have success, money, women. I've been lionised by the public and the media. The world is at my feet. I've spread my wings and here I am, soaring above everything and everyone. But in reality, the descent has already begun.' Thomas Dekker was set to become one of pro cycling's superstars. But before long, he found himself sucked in by the lure of hedonistic highs and troubled by the intense pressure to perform. In *The Descent*, Dekker tells his story of hotel room blood bags, shady rendezvous with drug dealers and late-night partying at the Tour de France. This is Dekker's journey from youthful idealism to a sordid path of excess and doping that lays bare cycling's darkest secrets like never before.

The incredible story of the most audacious gambler in history

The Rodchenkov Affair

Doping has become one of the most important and high-profile issues in contemporary sport. Shocking cases such as that of Lance Armstrong and the US Postal cycling team have exposed the complicated relationships between athletes, teams, physicians, sports governing bodies, drugs providers, and judicial systems, all locked in a constant struggle for competitive advantage. The Routledge Handbook of Drugs and Sport is simply the most comprehensive and authoritative survey of social scientific research on this hugely important issue ever to be published. It presents an overview of key topics, problems, ideas, concepts and cases across seven thematic sections, which include chapters addressing: The history of doping in sport Philosophical approaches to understanding doping The development of anti-doping policy Studies of doping in seven major sports, including athletics, cycling, baseball and soccer In-depth analysis of four of the most prominent doping scandals in history, namely Ben Johnson, institutionalized doping in the former GDR, the 1998 Tour de France and Lance Armstrong WADA and the national anti-doping organizations Key contemporary debates around strict liability, the criminalization of doping, and zero tolerance versus harm reduction Doping outside of elite sport, in gyms, the military and the police. With contributions from many of the world's leading researchers into drugs and sport, this book is the perfect starting point for any advanced student, researcher, policy maker, coach or administrator looking to develop their understanding of an issue that has had, and will continue to have, a profound

impact on the development of sport.

Rare Earth and Transition Metal Doping of Semiconductor Material explores traditional semiconductor devices that are based on control of the electron's electric charge. This book looks at the semiconductor materials used for spintronics applications, in particular focusing on wide band-gap semiconductors doped with transition metals and rare earths. These materials are of particular commercial interest because their spin can be controlled at room temperature, a clear opposition to the most previous research on Gallium Arsenide, which allowed for control of spins at supercold temperatures. Part One of the book explains the theory of magnetism in semiconductors, while Part Two covers the growth of semiconductors for spintronics. Finally, Part Three looks at the characterization and properties of semiconductors for spintronics, with Part Four exploring the devices and the future direction of spintronics. Examines materials which are of commercial interest for producing smaller, faster, and more power-efficient computers and other devices Analyzes the theory behind magnetism in semiconductors and the growth of semiconductors for spintronics Details the properties of semiconductors for spintronics

****Winner of the William Hill Sports Book of the Year, 2020 - the inside story of the Russian doping programme by the man behind it all*** One of the Financial Times's 'Fifty people who shaped the decade' 'The biggest sports scandal the world has ever seen' In 2015, Russia's Anti-Doping Centre was suspended by the World Anti-Doping Agency (WADA) following revelations of an elaborate state-sponsored doping programme at the 2014 Sochi Winter Olympics. Involving a nearly undetectable steroid delivery system known as 'Duchesse cocktail', tampering and switching of urine samples, and a complex state-sanctioned cover-up, the programme was masterminded by Grigory Rodchenkov. The Rodchenkov Affair tells the full, unadulterated story that was first glimpsed in Bryan Fogel's award-winning documentary and still continues to captivate and shock the world. Charting the author's childhood growing up under the Iron Curtain, his first encounter with doping as a 22-year-old student athlete at Moscow State University, and his subsequent career working for the Soviet Olympic Committee, this breathtakingly candid journey reveals a rigged system of flawed individuals, brazen deceit and impossible moral choices.*

Even the biggest cycling fan can one day wake up to find that he has lost his faith Bad Blood is the story of Jeremy Whittle's journey from unquestioning fan to Tour de France insider and confirmed sceptic. It's about broken friendships and a sport divided; about having to choose sides in the war against doping; about how galloping greed and corporate opportunism have led the Tour de France to the brink of destruction. Part personal memoir, part devastating exposé of a sport torn apart by drugs and scandal, Bad Blood is a love letter to one man's past, and a warning to cycling's future. 'Whatever you think about doping, you must read this book ... Well-balanced, considered, compelling' Rouleur Shortlisted for the 2008 William Hill Sports Book of the Year

A look into the life of rock singer Courtney Love examines her early life, time in reform school, work as a stripper in Asia, marriage, the death of her husband Kurt Cobain, the birth of her daughter, and her performing career

LONGLISTED FOR THE WILLIAM HILL SPORTS BOOK OF THE YEAR PRIZE 2020 'Reads like a thriller, or even a spy novel...Walsh keeps you gripped' Rosamund Urwin, Sunday Times 'A turbulent but ultimately inspiring tale. The candour...is rare and gripping' Matt Dickinson, The Times It was the story that shocked the world Russian athletics was revealed to be corrupt from top to bottom, with institutionalised doping used to help the nation's athletes win medals they did not deserve the full story of the couple who blew the whistle has never been told - until now. When Russian anti-doping official Vitaly Stepanov met the young 800m athlete Yuliya Rusanova, for him it was love at first sight. Within two months, they were married. But there was a problem - in fact, there were lots of problems. She admitted she was doping and that everyone else was doping, and she let him know that she came from a dark place ... It could all have brought a very swift end to a very marriage, but gradually the Stepanovs began to realise that whatever you did, the system in Russia was stacked against you. In the end, the only ones they could rely upon were each other. Fully aware of the risks they were taking, they decided to turn the tables on those who had manipulated them and cheated the sporting world. The result of their investigative work sent shockwaves around the planet and led to Russia's athletes being banned from world sport, while the Stepanovs themselves had to go into hiding. The Russian Affair is a gripping true-life drama that at times reads like a spy novel and at others like an epic love story. But, at the centre of it all, is a quietly determined couple who knew that if they stood together they could shine a light on a corrupt system and bring it crashing to the ground. Since the dawn of athletic competition during the original Olympic Games in Ancient Greece, athletes, as well as their coaches and trainers, have been finding innovative ways to gain an edge on their competition. Some of those performance-enhancement methods have been within the accepted rules while other methods skirt the gray area between being within the rules and not, while still other methods break the established rules. In modern times, doping - the use of performance

enhancing drugs - has been one method athletes and their trainers have used to beat their competition. The history of sports doping during the modern era can be traced through the events and scandals of the times in which the athletes lived. From the use of amphetamines and other stimulants in the early 20th century, to the use of testosterone and steroids by both the USSR and the United States during Cold War-era Olympics games, to blood doping and EPO, to designer drugs, the history of doping in sports closely follows the medical and technological advances of our times. In the early 21st century, the possibility of genetically engineered athletes looms. The story of doping in sports over the last century offers clues to where the battle over performance enhancement will be fought in the years to come.

How does coding change the way we think about architecture? This question opens up an important research perspective. In this book, Miro Roman and his AI Alice_ch3n81 develop a playful scenario in which they propose coding as the new literacy of information. They convey knowledge in the form of a project model that links the fields of architecture and information through two interwoven narrative strands in an "infinite flow" of real books. Focusing on the intersection of information technology and architectural formulation, the authors create an evolving intellectual reflection on digital architecture and computer science.

Dapper horse trainer Les Samba was in Melbourne for the annual yearling sales when he turned down an Italian meal with racing contacts saying: "I have got to meet a bloke." Just hours later he was laying dead, in the middle of the road with blood pouring from five bullet wounds to his head and body. Racing in Australia has a dark and dangerous underbelly. Powerful people play for high stakes in an industry worth \$14 billion a year. And they don't play nicely. Yearling sales are rigged, horses doped, races fixed and taxes dodged by high rolling punters. Every day huge sums of money are made by bookies who don't want to put any of it back into the industry. Meanwhile jockeys starve and sweat themselves to the point of delirium - many dying or suffering permanent injury while racing for as little as \$130 a race. Young female jockeys are raped, often by the trainers they work for. This is the true story every racing fan needs to read. It goes past the glorious image of the Melbourne Cup winner holding his hand aloft to reveal what really goes on in the dark and murky corridors of Australian racing. It tells you about the bent jockeys, cheating trainers, crooked owners and greedy bookies.

The intriguing story and turbulent history of a paper Charles Dickens praised for its 'range of information and profundity of knowledge', and which Queen Elizabeth, the Queen Mother, simply endorsed with the remark: 'Of course I read The Sporting Life'. It was the Queen Mother's love of horseracing that made her such an avid reader of the Life and coverage of that sport forms the core of this book, but there is so much more to fascinate the reader including eyewitness accounts of the first fight for the heavyweight championship of the world and Captain Webb's heroic Channel swim of 1875. Highlights in the history of cricket, football and rugby are also featured, while chapters on coursing and greyhound racing rank alongside surreal reports on ratting contests and songbird singing competitions. And for 30 years Tommy Wisdom made his motoring reports unique by competing against the best at Brooklands, Le Mans and in many Monte Carlo rallies, while Henry Longhurst's golfing column was simply the best. The paper's strident campaigns for racing reforms are also chronicled along with its coverage of major news stories, from Fred Archer's shocking suicide to its own untimely demise. Its travails in the law courts are documented from its first year, when it was forced to change its title, to its last, when it had to pay libel damages to the training team of Lynda and Jack Ramsden and their jockey, Kieren Fallon. A higher price was paid by its French correspondent who was killed in a duel over an article he had written, while the terrible toll the First World War took on the nation's sporting heroes is catalogued by the Life's embedded army correspondent, against a background of political bungling that is being repeated today.

The men's 100m final at the 1988 Olympics has been described as the dirtiest race ever - but also the greatest. Aside from Johnson's blistering time, the race is infamous for its athletes' positive drug tests. This is the story of that race, the rivalry between Johnson and Lewis, and the repercussions still felt almost a quarter of a century on.

Dope: A History of Performance Enhancement in Sports from the Nineteenth Century to Today

The basis for the upcoming major motion picture *The Program* directed by Stephen Frears (*High Fidelity*, *The Queen*, *Philomena*), starring Chris O'Dowd as journalist David Walsh and Ben Foster as Lance Armstrong. When Lance Armstrong won his first Tour de France in 1999, the sports world had found a charismatic new idol. Journalist David Walsh was among a small group covering the tour who suspected Armstrong's win wasn't the feel-good story it seemed to be. From that first moment of doubt, the next thirteen years of Walsh's life would be focused on seeking the answers to a series of hard questions about Armstrong's astonishing success. As Walsh delved ever deeper into the shadow world of performance-enhancing drugs in professional athletics, he accumulated a mounting pile of evidence that led a furious Armstrong to take legal action against him. But he could not make Walsh or the story go away, and in the autumn of 2012, Walsh was vindicated when the cyclist was stripped of his seven Tour de France titles. With this remarkable book, Walsh has produced both the definitive account of the Armstrong scandal, and a testament to the importance of journalists who are willing to report a difficult truth over a popular fantasy.

Shows paintings, graphics and drawings by the London artist and discusses his connection with the punk movement

Why has doping, both as a practice and a social phenomenon, been approached largely as a question of context: sport or fitness? Individuals may use substances to enhance sporting performance or within the framework of gym and fitness culture to create a perfect body. But clearly, people who dope are not bound to a singular context. It is quite the opposite, as individuals weave between and move across various settings in their trajectories to and from doping, as goals, identities, ambitions, and lifestyles change over time. Still, these stark categorizations often made in public discourse – and reinforced by scholars – have continued to ignore these lived experiences and limited our understanding of doping. Building on data gathered through ethnographic fieldwork, studies of online doping communities, and in-depth case studies, this book embraces the challenge of moving beyond traditional and historical doping dichotomies – such as those of sport or fitness, online or offline, pleasure or harm, masculinity or femininity, and health or harm – and, in a sociologically informed analysis, it develops new terminology to understand trajectories to and from doping. It argues there are multiple ways to understand doped bodies and doping practices, and that we must approach these questions from the perspective of both/and rather than either/or. By imploding these divisions, it offers updated and nuanced ways of both empirically and theoretically rethinking doping use and experiences attached to the practice.

In her extraordinary swimming career, Shirley Babashoff set thirty-nine national records and eleven world records. Prior to the 1990s, she was the most successful U.S. female Olympian and, in her prime, was widely considered to be the greatest female swimmer in the world. Heading into the 1976 Olympic Games in Montreal, Babashoff was pictured on the cover of *Sports Illustrated* and followed closely by the media. Hopes were high that she would become "the female Mark Spitz." All of that changed once Babashoff questioned the shocking masculinity of the swimmers on the East German women's team. Once celebrated as America's golden girl, Babashoff was accused of poor sportsmanship and vilified by the press with a new nickname: "Surly Shirley." *Making Waves* displays the remarkable strength and resilience that made Babashoff such a dynamic champion. From her difficult childhood and beginnings as a determined young athlete growing up in Southern California in the 1960s, through her triumphs as the greatest female amateur swimmer in the world, Babashoff tells her story in the same unflinching manner that made her both the most dominant female swimmer of her time and one of the most controversial athletes in Olympic history.

The authors share how, tired of just preaching the words of the Gospel, they tried to manifest the Gospel in their intentions and actions, and how this shift in focus from words to action changed their family, church, and relationship with God.

'Doped' is the gripping true-story racing thriller set in Britain in the 1950s and early 1960s. Combining a potent mix of horse racing, drugs, sex, class, crime, gambling and the monarchy, it tells the true story of one of the biggest doping scandals in British racing history.

'Doped' is the gripping true-story racing thriller set in Britain in the 1950s and early 1960s. Combining a potent mix of horse racing, drugs, sex, class, crime, gambling and the monarchy, it tells the true story of one of the biggest doping scandals in British racing history. In March 1962 an audacious attempt to nobble one of the royal horses alerted police to a well organised band of racecourse criminals, backed by murderous London gangsters. The subsequent Flying Squad pursuit of the gang brought the quaintly deferential world of racing into sharp conflict with the harsher realities of the 'You've never had it so good' era. This also coincided with the birth of the annual Dick Francis novel. The cast of characters is headed by William Roper, a debonair ex RAF Sergeant turned oddsmaker. His team included an ex jockey, numerous underpaid stable lads, an upper class gambling addict and a violent professional gangster who went on to face charges with the Kray twins in 1969. But the most fascinating member of Roper's firm was a beautiful and selfpossessed young Swiss woman called Micheline Lugeon who became the bookmaker's lover.

In 1996 Danish cycling legend Bjarne Riis won the Tour de France. 11 years later he called a press conference and confessed to taking performance-enhancing drugs in order to achieve the ultimate cycling triumph. In *Riis*, his sensational autobiography, the notoriously private Dane bears his soul.

From the shy young daydreamer who discovered cycling as an eight year old, to the hardened, regular user of banned blood booster EPO. Brutally honest and as fast paced as one of his breakaways from the peloton, Riis is a powerful insight into a key figure in cycling.

The True Story of the Couple who Uncovered the Greatest Sporting Scandal

A sports memoir by the American cyclist whose 2006 victory in the Tour de France was stripped due to allegations of doping sets out to clear his name by furnishing irrefutable evidence to prove his innocence, in a critique of the governing bodies of cycli

Dave Nevison is doing, every day, what thousands of punters dream of doing - living the dream of life as a professional gambler. Since taking the plunge in 1993, Nevison has made his living, a very good living, from backing racehorses. This title includes stories of his life. It reveals how he has succeeded while most punters fail.

Critically acclaimed author David Joy, whose debut, Where All Light Tends to Go, was hailed as "a savagely moving novel that will likely become an important addition to the great body of Southern literature" (The Huffington Post), returns to the mountains of North Carolina with a powerful story about the inescapable weight of the past. A combat veteran returned from war, Thad Broom can't leave the hardened world of Afghanistan behind, nor can he forgive himself for what he saw there. His mother, April, is haunted by her own demons, a secret trauma she has carried for years. Between them is Aiden McCall, loyal to both but unable to hold them together. Connected by bonds of circumstance and duty, friendship and love, these three lives are blown apart when Aiden and Thad witness the accidental death of their drug dealer and a riot of dope and cash drops in their laps. On a meth-fueled journey to nowhere, they will either find the grit to overcome the darkness or be consumed by it.

NEW YORK TIMES BESTSELLER • NATIONAL BOOK CRITICS CIRCLE AWARD FINALIST NAMED ONE OF THE TEN BEST BOOKS OF THE YEAR BY MICHIKO KAKUTANI, THE NEW YORK TIMES • NAMED ONE OF THE TEN BEST NONFICTION BOOKS OF THE YEAR BY TIME NAMED ONE OF THE BEST BOOKS OF THE YEAR BY MORE THAN 45 PUBLICATIONS, INCLUDING The New York Times Book Review • The Washington Post • NPR • The New Yorker • San Francisco Chronicle • The Economist • The Atlantic • Newsday • Salon • St. Louis Post-Dispatch • The Guardian • Esquire (UK) • GQ (UK) After three acclaimed novels, Gary Shteyngart turns to memoir in a candid, witty, deeply poignant account of his life so far. Shteyngart shares his American immigrant experience, moving back and forth through time and memory with self-deprecating humor, moving insights, and literary bravado. The result is a resonant story of family and belonging that feels epic and intimate and distinctly his own. Born Igor Shteyngart in Leningrad during the twilight of the Soviet Union, the curious, diminutive, asthmatic boy grew up with a persistent sense of yearning—for food, for acceptance, for words—desires that would follow him into adulthood. At five, Igor wrote his first novel, Lenin and His Magical Goose, and his grandmother paid him a slice of cheese for every page. In the late 1970s, world events changed Igor's life. Jimmy Carter and Leonid Brezhnev made a deal: exchange grain for the safe passage of Soviet Jews to America—a country Igor viewed as the enemy. Along the way, Igor became Gary so that he would suffer one or two fewer beatings from other kids. Coming to the United States from the Soviet Union was equivalent to stumbling off a monochromatic cliff and landing in a pool of pure Technicolor. Shteyngart's loving but mismatched parents dreamed that he would become a lawyer or at least a "conscientious toiler" on Wall Street, something their distracted son was simply not cut out to do. Fusing English and Russian, his mother created the term Failurchka—Little Failure—which she applied to her son. With love. Mostly. As a result, Shteyngart operated on a theory that he would fail at everything he tried. At being a writer, at being a boyfriend, and, most important, at being a worthwhile human being. Swinging between a Soviet home life and American aspirations, Shteyngart found himself living in two contradictory worlds, all the while wishing that he could find a real home in one. And somebody to love him. And somebody to lend him sixty-nine cents for a McDonald's hamburger.

Provocative, hilarious, and inventive, Little Failure reveals a deeper vein of emotion in Gary Shteyngart's prose. It is a memoir of an immigrant family coming to America, as told by a lifelong misfit who forged from his imagination an essential literary voice and, against all odds, a place in the world. Praise for Little Failure "Hilarious and moving . . . The army of readers who love Gary Shteyngart is about to get bigger."—The New York Times Book Review "A memoir for the ages . . . brilliant and unflinching."—Mary Karr "Dazzling . . . a rich, nuanced memoir . . . It's an immigrant story, a coming-of-age story, a becoming-a-writer story, and a becoming-a-mensch story, and in all these ways it is, unambivalently, a success."—Meg Wolitzer, NPR "Literary gold . . . bruisingly funny."—Vogue "A giant success."—Entertainment Weekly

The Secret Life of the Tour de France

Racing Through the Dark

Riis

The Secret Race

The Descent

Aristocrat, gambler, innovator and special forces legend, the life of David Stirling should need no retelling. His formation of the Special Air Service in the summer of 1941 led to a new form of warfare and Stirling is remembered as the father of special forces soldiering. But was he really a military genius or in fact a shameless self-publicist who manipulated people, and the truth, for this own ends? In this gripping and controversial biography Gavin Mortimer

analyses Stirling's complex character: the childhood speech impediment that shaped his formative years, the pressure from his overbearing mother, his fraught relationship with his brother, Bill, and the jealousy and inferiority he felt in the presence of his SAS second-in-command, the cold-blooded killer Paddy Mayne. Stirling lived until old age, receiving a knighthood and plaudits from military forces around the world before his death in 1990. Yet as Mortimer dazzlingly shows, while Stirling was instrumental in selling the SAS to Churchill and senior officers, it was Mayne who really carried the regiment in the early days. Stirling was at best an incompetent soldier and at worst a foolhardy one, who jeopardised his men's lives with careless talk and hare-brained missions. Drawing on interviews with SAS veterans who fought with Stirling and men who worked with him on his post-war projects, and examining recently declassified governments files about Stirling's involvement in Aden, Libya and GB75, Mortimer's riveting biography is incisive, bold, honest and written with his customary narrative panache. Impeccably researched and with the courage to challenge the mythical SAS 'brand', Mortimer brings to bear his unparalleled expertise as WW2's premier special forces historian to dig beneath the legend and reveal the real David Stirling, a man who dared and deceived.

The new memoir tracing story of cycling since the 1980s, through the eyes of Jonathan Vaughters, founder of team Education First and one of the sport's most towering figures. Jonathan Vaughters' story is the story of modern cycling. From his early years as a keen cyclist in his hometown in Colorado to his unflinching rite of passage as a professional rider with US Postal to his elevation as one of cycling's most resilient, ethical and intelligent team bosses, the highs and lows of his career have mirrored those of the sport itself. Vaughters has had a front-row seat for most of the major events in cycling over the past three decades. He was both a former teammate of Lance and a leading witness against him. And he went on to renounce doping and start the first pro cycling team to dedicate itself to clean riding, which has grown into one of the most successful teams competing today and started a movement that has swept across the sport. This is also not simply a story of races won and lost: Vaughters shows readers how he navigated the complex, international business of building Slipstream into a world-class cycling team. Over the past decade, he has led the sport out of the scandal-plagued Armstrong era. By presenting the world with a team made of talented racers built around a rigorous approach to clean racing, he set a new standard within cycling that has since spread across the peloton. Written from the unique perspective of both a racer and a team manager, One-Way Ticket gives the complete story of what it takes to build a winning team and repair the reputation of a sport.

"Greg LeMond was Lance Armstrong before Lance Armstrong . . . the story of a true hero . . . This is a must read if you believe in miracles."—John Feinstein, New York Times—bestselling author In July 1986, Greg LeMond stunned the sporting world by becoming the first American to win the Tour de France, the world's pre-eminent bicycle race, defeating French cycling legend Bernard Hinault. Nine months later, LeMond lay in a hospital bed, his life in peril after a hunting accident, his career as a bicycle racer seemingly over. And yet, barely two years after this crisis, LeMond mounted a comeback almost without parallel in professional sports. In summer 1989, he again won the Tour—arguably the world's most grueling athletic contest—by the almost impossibly narrow margin of 8 seconds over another French legend, Laurent Fignon. It remains the closest Tour de France in history. "[A] blend of chaos, kindness and cruelty typifies the scenes that journalist de Visé brings to life in this sympathetic-verging-on-reverential retelling of LeMond's trailblazing career (first American to enter the tour, first to win it) . . . As an author in quest of his protagonist's motivation, [de Visé] subjects it to extreme torque."—The Washington Post "A great book . . . Well written and thoroughly researched . . . Engrossing and hard to put down. If you're a Greg LeMond fan, The Comeback is a must read because it's a detailed accounting of his career and—more importantly—his life and person off the bike. It's also an important reminder that American cycling did not begin and end with Lance Armstrong."—PEZ

The first in-depth look at Lance Armstrong's doping scandal, the phenomenal business success built on the back of fraud, and the greatest conspiracy in the history of sports Lance Armstrong won a record-smashing seven Tours de France after staring down cancer, and in the process became an international symbol of resilience and courage. In a sport constantly dogged by blood-doping scandals, he seemed above the fray. Then, in January 2013, the legend imploded. He admitted doping during the Tours and, in an interview with Oprah, described his "mythic, perfect story" as "one big lie." But his admission raised more questions than it answered—because he didn't say who had helped him dope or how he skillfully avoided getting caught. The Wall Street Journal reporters Reed Albergotti and Vanessa O'Connell broke the news at every turn. In Wheelmen they reveal the broader story of how Armstrong and his supporters used money, power, and cutting-edge science to conquer the world's most difficult race. Wheelmen introduces U.S. Postal Service Team owner Thom Weisel, who in a brazen power play ousted USA Cycling's top leadership and gained control of the sport in the United States, ensuring Armstrong's dominance. Meanwhile, sponsors fought over contracts with Armstrong as the entire sport of cycling began to benefit from the "Lance effect." What had been a quirky, working-class hobby became the pastime of the Masters of the Universe set. Wheelmen offers a riveting look at what happens when enigmatic genius breaks loose from the strictures of morality. It reveals the competitiveness and ingenuity that sparked blood-doping

as an accepted practice, and shows how the Americans methodically constructed an international operation of spies and revolutionary technology to reach the top. It went on to become a New York Times Bestseller, a Wall Street Journal Business Bestseller, and win numerous awards, including a Gold Medal for the Axiom Business Book Awards. At last exposing the truth about Armstrong and American cycling, Wheelmen paints a living portrait of what is, without question, the greatest conspiracy in the history of sports.

Be the Message

Bad Blood

Stages of Light and Dark

Doped

Nine Lives on Two Wheels

For Kicks

Life as a Professional Gambler

Doping is as old as organized sports. From baseball to horse racing, cycling to track and field, drugs have been used to enhance performance for 150 years. For much of that time, doping to do better was expected. It was doping to throw a game that stirred outrage. Today, though, athletes are vilified for using performance-enhancing drugs. Damned as moral deviants who shred the fair-play fabric, dopers are an affront to the athletes who don't take shortcuts. But this tidy view swindles sports fans. While we may want the world sorted into villains and victims, putting the blame on athletes alone ignores decades of history in which teams, coaches, governments, the media, scientists, sponsors, sports federations, and even spectators have played a role. The truth about doping in sports is messy and shocking because it holds a mirror to our own reluctance to spit in the soup—that is, to tell the truth about the spectacle we crave. In *Spitting in the Soup*, sports journalist Mark Johnson explores how the deals made behind closed doors keep drugs in sports. Johnson unwinds the doping culture from the early days, when pills meant progress, and uncovers the complex relationships that underlie elite sports culture—the essence of which is not to play fair but to push the boundaries of human performance. It's easy to assume that drugs in sports have always been frowned upon, but that's not true. Drugs in sports are old. It's banning drugs in sports that is new. *Spitting in the Soup* offers a bitingly honest, clear-eyed look at why that's so, and what it will take to kick pills out of the locker room once and for all.

"A vivid portrait of life as a professional cyclist by international champion David Millar, this arrestingly candid memoir follows his rise as a young racing star, his fall to the pervasive influence of performance-enhancing drugs--and his subsequent redemption"--

A classic mystery from Dick Francis, the champion of English storytellers. Daniel Roke owns a stud farm in Australia. He's young, smart, hard-working and desperate for some excitement - all of which makes him the ideal candidate for the Earl of October, who has come visiting. The Earl is concerned about a horse-doping scandal that is destroying English racing. He wants to pay Daniel to come back with him, pose as a highly corruptible stable lad and discover who is behind it. Unfortunately, when Daniel agrees he doesn't realise how close he'll have to get to find the truth. Nor how determined the criminals will be to prevent him living long enough to tell anyone... Praise for Dick Francis: 'As a jockey, Dick Francis was unbeatable when he got into his stride. The same is true of his crime writing' *Daily Mirror* 'Dick Francis's fiction has a secret ingredient - his inimitable knack of grabbing the reader's attention on page one and holding it tight until the very end' *Sunday Telegraph* 'The narrative is brisk and gripping and the background researched with care . . . the entire story is a pleasure to relish' *Scotsman* 'Francis writing at his best' *Evening Standard* 'A regular winner . . . as smooth, swift and lean as ever' *Sunday Express* 'A super chiller and killer' *New York Times Book Review* Dick Francis was one of the most successful post-war National Hunt jockeys. The winner of over 350 races, he was champion jockey in 1953/1954 and rode for HM Queen Elizabeth, the Queen Mother, most famously on Devon Loch in the 1956 Grand National. On his retirement from the saddle, he published his autobiography, *The Sport of Queens*, before going on to write forty-three bestselling novels, a volume of short stories (*Field of 13*), and the biography of Lester Piggott. During his lifetime Dick Francis received many awards, amongst them the prestigious Crime Writers' Association's Cartier Diamond Dagger for his outstanding contribution to the genre, and three 'best novel' Edgar Allan Poe awards from The Mystery Writers of America. In 1996 he was named by them as Grand Master for a lifetime's achievement. In 1998 he was elected a fellow of the Royal Society of Literature, and was awarded a CBE in the Queen's Birthday Honours List of 2000. Dick Francis died in February 2010, at the age of eighty-nine, but he remains one of the greatest thriller writers of all time.

Down the Lane takes the reader on an eye-opening look at the parts of Niagara Falls they don't tell you about in the tourist brochures. Follow Doc—a strip club manager with dreams of getting out of the game—as he gets involved with forces beyond his control. While biker gangs and old Mafia chieftains fight to control the city's underworld, Doc gets swept up in the violence and threats, and does everything he can to stay alive and out of prison.

“The holy grail for disillusioned cycling fans . . . The book’s power is in the collective details, all strung together in a story that is told with such clear-eyed conviction that you never doubt its veracity. . . . The Secret Race isn’t just a game changer for the Lance Armstrong myth. It’s the game ender.”—Outside **NEW YORK TIMES BESTSELLER • WINNER OF THE WILLIAM HILL SPORTS BOOK OF THE YEAR AWARD** The Secret Race is the book that rocked the world of professional cycling—and exposed, at long last, the doping culture surrounding the sport and its most iconic rider, Lance Armstrong. Former Olympic gold medalist Tyler Hamilton was once one of the world’s top-ranked cyclists—and a member of Lance Armstrong’s inner circle. Over the course of two years, New York Times bestselling author Daniel Coyle conducted more than two hundred hours of interviews with Hamilton and spoke with numerous teammates, rivals, and friends. The result is an explosive page-turner of a book that takes us deep inside a shadowy, fascinating, and surreal world of unscrupulous doctors, anything-goes team directors, and athletes so relentlessly driven to win that they would do almost anything to gain an edge. For the first time, Hamilton recounts his own battle with depression and tells the story of his complicated relationship with Lance Armstrong. This edition features a new Afterword, in which the authors reflect on the developments within the sport, and involving Armstrong, over the past year. The Secret Race is a courageous, groundbreaking act of witness from a man who is as determined to reveal the hard truth about his sport as he once was to win the Tour de France. With a new Afterword by the authors. “Loaded with bombshells and revelations.”—VeloNews “[An] often harrowing story . . . the broadest, most accessible look at cycling’s drug problems to date.”—The New York Times “ ‘If I cheated, how did I get away with it?’ That question, posed to SI by Lance Armstrong five years ago, has never been answered more definitively than it is in Tyler Hamilton’s new book.”—Sports Illustrated “Explosive.”—The Daily Telegraph (London)

The book explores the changing landscape of anti-doping investigations, which now largely centre on the collection of intelligence about doping through processes such as surveillance, interviews with witnesses and interrogation of athletes. It examines why and how investigative processes, hitherto typically reserved for serious crimes, have been co-opted by anti-doping agencies into a situation where their potential for harm has received little or no critical consideration. This book highlights the opportunities and threats inherent in adopting new investigative processes. It is expected that many of the same problems that have engulfed forensic investigations over the last two decades, such as miscarriages of justice, are likely to surface in future anti-doping investigations. Drawing on empirical research and theory from a range of disciplines, including: forensic psychology, criminology, policing, law, sports management and policy studies, this book fills a scholarly vacuum on the investigation of doping through non-biological detection methods.
