*From the floating islands on Lake Titicaca to the ancient city of Machu Picchu, Peru offers an array of spectacular attractions. Whether you want to explore the rainforest, view the icy peaks of the Andes or feel the pulse of modern Lima, this nuts-and-bolts book will guide you through the Land of the Incas. -- extensive archaeological information -- tips on climbing mountains, running rivers and spotting wildlife -- food and accommodations suggestions for every budget -- practical language section for Quechua, Aymara and Latin American Spanish -- over 60 detailed maps, as well as complete transportation information*

*For four centuries, the Campa Ashaninkas of the Peruvian Amazon have fought for their identity and independence in the face of Spanish colonialism and Peruvian national expansionism. Stefan Varese wrote about the Campa Ashaninkas in the mid-1960s, after three seasons of field research among them and three years of archival research. He titled his book *La Sal de Los Cerros*, after the invaded Mountain of Salt that had been the center of Campa Ashaninka trade and power for millennia. *Salt of the Mountain* makes Varese's classic work of anthropology available in English for the first time, updated with a new preface and introduction by the author. Varese conducted his research with an explicit commitment to letting the Campa Ashaninkas speak for themselves. Using their myths and cosmological interpretations as source material, Varese presents new readings of both colonial Spanish and modern Peruvian documents relating to the tribe. He chronicles the relentless success of European geographic annexation and the continuing failure of European cultural assimilation. Living among the Campa Ashaninkas, Varese found that their worldview rejects the modern notion that assimilation is inevitable, and he developed a deep respect for their fiercely independent spirit. For this reason, he calls his work an "approximation" rather than a description or history.*

*Frontiers are "wild." The frontier is a zone of interaction between distinct polities, peoples, languages, ecosystems and economies, but how do these frontier spaces develop? If the frontier is shaped by the policing of borders by the modern-nation state, then what kind of zones, regions or cultural areas are created around borders? This book provides 16 different case studies of frontiers in Asia and Latin America by interdisciplinary scholars,*

**charting the first steps toward a transnational and transcontinental history of social development in the borderlands of two continents.**

**Transnationalism provides a shared focus for the contributions, drawing upon diverse theoretical perspectives to examine the place-making projects of nation states. Through the lenses of different scales and time frames, the contributors examine the social processes of frontier life, and how the frontiers have been created through the exertions of nation-states to control marginal or borderland peoples. The most significant cases of industrialization, resource extraction and colonization projects in Asia and Latin America are examined in this book reveal the incompleteness of frontiers as modernist spatial projects, but also their creativity - as sources of new social patterns, new human adaptations, and new cultural outlooks and ways of confronting power and privilege. The incompleteness of frontiers does not detract from their power to move ideas, peoples and practices across borders both territorial and conceptual. In bringing together Asian and Latin American cases of frontier-making, this book points toward a comparativist and cosmopolitan approach in the study of statecraft and modernity. For scholars of Latin America and/or Asia, it brings together historical themes and geographic foci, providing studies accessible to researchers in anthropology, geography, history, politics, cultural studies and other fields of the human sciences.**

***Existem três dimensões-chave com as quais nos confrontamos no que diz respeito ao nosso futuro digital e artificial: a programabilidade, a invisibilidade, a soberania. Sensores, dados, algoritmos, inteligência artificial e plataformas compartilham, embora em diferentes graus e escalas, todas as três dimensões. Ao programar soberana e invisivelmente nossa nova realidade, essas tecnologias estão redefinindo conceitos e perspectivas filosóficas em profundidade (da antropologia à ontologia, da ética à epistemologia) e com isso a nossa compreensão do mundo.***

***Nenhuma organização do século 21 acumula tanto poder de destruição quanto as corporações. São elas que estão no centro do novo livro de Nicholas Freudenber, que se propõe a investigar as mais diferentes áreas para apontar como as grandes empresas se tornaram o maior problema de saúde pública dos nossos tempos. "As recentes mudanças no capitalismo precipitaram ou agravaram tanto os apocalipses de 2020 como os desastres mais lentos das últimas duas décadas", diz o pesquisador da City University de Nova York. Em A que custo, Freudenber propõe uma série de caminhos para repensar a nossa organização enquanto sociedade e para superarmos o capitalismo.***

***Two Worlds, One Childhood***

From the massively popular podcaster and New York Times bestselling author comes the story of the Marquis de Lafayette's lifelong quest to protect the principles of democracy, told through the lens of the three revolutions he participated in: the American Revolution, the French Revolution, and the Revolution of 1830. Few in history can match the breadth and depth of the revolutionary career of the Marquis de Lafayette. Over fifty incredible years at the heart of the Age of Revolution, he fought as one with righteous revolutionaries on both sides of the Atlantic. As an idealistic and courageous teenager serving in the American Revolution, he used his considerable wealth and savvy to help the Americans defeat the British. Then he returned home, and was a principle player in the French Revolution. And in his final act, at seventy years old, he was instrumental in the dramatic overthrow of the Bourbon Dynasty during the Revolution of 1830. All the while, he never wavered from the principles he had written into the Declaration of the Rights of Man in 1789: That men are born and remain free and equal, deserving of liberty, property, safety, freedom of speech, and the ability to resist oppression. Through this age of upheaval, Lafayette remained unshakably committed to the principles he had outlined. From the time that he was an enthusiastic 19-year-old to the time he was a world-weary 74-year-old, his resolve never wavered. As the saying goes, if we don't learn from history, we are doomed to repeat it. Today, the values codified and practiced by Lafayette are increasingly taken for granted. His life is thus the story of where we came from—and what we stand to lose if we abandon the ideals for which he fought.

***In her father's Peruvian family, Marie Arana was taught to be a proper lady, yet in her mother's American family she learned to shoot a gun, break a horse, and snap a chicken's neck for dinner. Arana shuttled easily between these deeply separate cultures for years. But only when she immigrated with her family to the United States did she come to understand that***

**she was a hybrid American whose cultural identity was split in half. Coming to terms with this split is at the heart of this graceful, beautifully realized portrait of a child who “was a north-south collision, a New World fusion. An American Chica.” Here are two vastly different landscapes: Peru—earthquake-prone, charged with ghosts of history and mythology—and the sprawling prairie lands of Wyoming. In these rich terrains resides a colorful cast of family members who bring Arana’s historia to life...her proud grandfather who one day simply stopped coming down the stairs; her dazzling grandmother, “clicking through the house as if she were making her way onstage.” But most important are Arana’s parents: he a brilliant engineer, she a gifted musician. For more than half a century these two passionate, strong-willed people struggled to overcome the bicultural tensions in their marriage and, finally, to prevail.**
