This book traces the evolution of European Union employment law and social policy from its essentially economic origins in the Treaty of Rome through to the emerging themes post-Amsterdam: co-ordination of national employment policies, modernisation of social laws and combating discrimination. Each stage of development of Community employment law and social policy is analysed in depth to give a sense of perspective to this fast changing field. As the European Union seeks to meet the challenges of globalisation the need to develop social policy as a

productive factor has come to the fore. The author explains how the social, economic and employment imperatives of European integration have always been intertwined and how the emergence of Community employment law from its hitherto twilight existence is best understood through an examination of consistent strands of policy development. This volume features the complete text of all regular papers, posters, and summaries of symposia presented at the 15th annual meeting of the Cognitive Science Society.

Never before had France had a church council so large: almost 1000 churchmen assembled at Bourges on 29 November 1225 to authorize a tax on their incomes in support of the Second Albigensian Crusade. About one third of the participants were representatives sent by corporate bodies, in accordance with a new provision of canon law that insisted, for the first time ever, that there should be no taxation without representation. Basing himself on the rich surviving records, Professor Kay paints a skilful portrait of this council: the political manoeuvring by the papal legate to ensure the tax went through, and his use of this highly public

occasion to humiliate members of the University of Paris; and, on the other hand, his failure to win a permanent endowment to support the papal bureaucracy, the bishops' effective protests against the pope's threat to diminish their jurisdiction over monasteries, and a subsequent 'taxpayers' revolt' that challenged the validity of the tax. The book also draws out the importance and implications of what took place, highlighting the council's place at the fountainhead of European representative democracy, the impact of the decisions made on the course of the Albigensian Crusade, the reform of monasticism, and the funding of the papal government which was left to rely on stop-gap expedients, such as the sale of
