This book examines
how sustainability
has the potential to
transform both the
fashion system and
the innovators who
work within it.

Sustainability is

arguably the defining theme of the twenty-first century. The issues in fashion are broad-ranging and include labour abuses, toxic chemicals use and conspicuous consumption, giving rise to an undeniable tension between fashion

and sustainability.
The book is
organized in three
parts. The first part
is concerned with
transforming fashion
products across the
garment's lifecycle
and includes
innovation in
materials,
manufacture,
distribution, use and

part looks at ideas
that are

transforming the
fashion system at

more sustainable,
including new
business models
that reduce material
throughput. The
third section is
concerned with

Maxwell Greyson refers to himself as a project manager but really only makes use of that title in an attempt to mask his ridiculousness, which is something that has plagued him all of his life. He unwittingly embarks on a quest to find what he's always sought. He finds it, or
