This dynamic new edition of this proven series adds cutting edge print and media resources. An emphasis on the practical applications of algebra motivates learners and encourages them to see algebra as an important part of their daily lives. The reader-friendly writing style uses short, clear sentences and easy-to-understand language, and the outstanding pedagogical program makes the material easy to follow and comprehend. KEY TOPICS Chapter topics cover basic concepts; equations and inequalities; graphs and functions; systems of equations and inequalities; polynomials and polynomial functions; rational expressions and equations; roots, radicals, and complex numbers; quadratic functions; exponential and logarithmic functions; conic sections; and sequences, series and the binomial theorem. For the study of Algebra. INTERMEDIATE ALGEBRA, International Edition employs a proven, three-step problem-solving approach—learn a skill, use the skill to solve equations, and then use the equations to solve application problems—to keep students focused on building skills and reinforcing them through practice. This simple and straightforward approach, in an easy-to-read format, has helped many students grasp and apply fundamental problem-solving skills. The carefully structured pedagogy includes learning objectives, detailed examples to develop concepts, practice exercises, an extensive selection of problem-set exercises, and well-organized end-of-chapter reviews and assessments. The clean and uncluttered design helps keep students focused on the concepts while minimizing distractions. Problems and examples reference a broad array of topics, as well as career areas such as electronics, mechanics, and health, showing students that mathematics is part of everyday life. Also, as recommended by the American Mathematical Association of Two-Year Colleges, many basic geometric concepts are integrated in problem-solving scenarios. The text's resource package—anchored by Enhanced WebAssign, an online homework management tool—saves instructors time while also providing additional help and skill-building practice for students outside of class.

Thousands of students have learned algebra with the Kaufmann Solution. This text is written for college students who need an algebra course that bridges the gap between elementary algebra and the more advanced courses in precalculus mathematics. The basic concepts of intermediate algebra are presented in a simple, straight-forward manner. Algebraic ideas are developed in a logical sequence, through examples, continuously reinforced through additional examples, and then applied in a variety of problem-solving situations. In this edition, special efforts were made by the authors to incorporate improvements suggested by reviewers and by users to earlier editions, while at the same time preserving the book's many successful features.

The Student Workbook contains all of the Assessments, Activities, and Worksheets from the Instructor's Resource Binder for classroom discussions, in-class activities, and group work.

From the author of several highly successful mathematics texts comes this easy-to-understand and effective book. This "early functions" version of Kaufmann's highly successful text helps students to visualize the relationship between algebraic equations and functions and their geometric representations by introducing graphing early on. The author weaves a common thread into each chapter - learn a skill, use the skill to solve equations, and use equations to solve problems - thereby providing students with as easy-to-follow plan for tackling the problems and concepts presented.

Presented by Rena Petrello and Cengage Learning, these DVDs feature 10- to 20-minute problem-solving lessons, covering learning objectives from every chapter of their accompanying text. Currently teaching at Moorpark College in California (the same community college Rena attended as a student), Petrello initiated and developed the first online mathematics courses at her college. It was through the online teaching experience that Rena discovered the lack of suitable content for online instructors, which caused her to develop her own video lessons--and ultimately create this video project. Petrello's videos recently won her the Aurora Award for Platinum Best in Show for an Educational Video, as well as many other nominations. She has also received a tremendous amount of enthusiastic, positive feedback from students and colleagues.
