

Pathophysiology Made Incredibly Easy Incredibly Easy Series Reg

Provides a conceptual overview of pathophysiology and mechanisms of disease, designed to ease the transition from the basic sciences to the clinical years. This book will be a phenomenal learning tool for students in the second and third years of medical school and during USMLE Step 1 preparation, but will also be very helpful to nurses, nurse practitioners, physician assistants, and other health care professionals seeking to learn or review the physiological mechanisms of diseases, their diagnosis, and their management. The accompanied CD, Differential Diagnosis, allows one to select a symptom, sign, or lab finding and see all of the many diseases that could cause it, classified by pathophysiological mechanism. By teaching basic medical science and clinical reasoning hand-in-hand in a simple, light, and highly accessible writing style, this book provides an integrated and easy-to-understand approach to learning the science of medicine.

Worried about handling the challenges of emergency nursing? Skillfully handle the daily demands of the emergency room, with the fully updated Emergency Nursing Made Incredibly Easy!®, 3rd Edition. Full of colorful illustrations, humor and friendly expert advice, this go-to reference offers solid, step-by-step guidance on the assessments, exams, tests and treatments involved in emergency, trauma and critical care — all in the enjoyable Incredibly Easy® style.

Cardiovascular Care Made Incredibly Easy!

This unique 2-in-1 reference presents vital information on pathophysiology in two helpful ways on every page. The wide inner column contains detailed narrative text; the narrow outer column contains brief bulleted summaries of the same information. This format enables nurses to quickly scan the bulleted points and jump to in-depth information as needed without turning the page. Organized by body system, the book covers 220 diseases and disorders. Two 8-page full-color inserts illustrate selected disorders. Illustrations and flowcharts demonstrate abnormal structures and pathophysiologic processes. Icons highlight complications, life-threatening disorders, emergency interventions, and effects of treatment on disease processes.

This entertaining guide is now more fun, more up-to-date, and even easier to use -- an indispensable resource for nurses who want to take the stress out of dosage calculations. New to this edition are a chapter on dimensional analysis; numerous lighthearted learning aids called "Cheat Sheets"; and "Practice Makes Perfect" -- case study questions and answers that let nurses assess their progress. Contents include math basics; measurement systems; drug orders and administration records; calculating oral, topical, and rectal drug dosages; calculating parenteral injections and I.V. infusions; and calculating pediatric, obstetric, and critical care dosages.

Written in the award-winning Incredibly Easy! style, this book provides complete and clear explanations of how drugs act and interact in the treatment of disease. Focusing on mechanisms of drug action, the book details specific drugs by pharmacologic class for all body systems as well as drugs for pain, psychiatric disorders, infection, fluid and electrolyte

asthma, lung cancer, pressure ulcer, stroke, AIDS, rheumatoid arthritis, hypertension, and more.

This is a handy reference book in the award-winning Incredibly Easy! style--perfect for those entering or needing a refresher in critical care nursing. Critical care nursing is one of the most demanding and complex areas of nursing practice. The critical care nurse has to be "broadly specialized" with a fluency in a wide range of interconnected concepts, body system physiology, pathophysiology, and highly technical interventions, while processing data from multiple sources--all this in an environment where there is no room for error and seconds really do count.

Expanded, updated, and now in full color throughout, this Fourth Edition presents vital pathophysiology information in an easy-to-understand, easy-to-remember, entertaining, and practical manner. Chapters cover cancer, infection, immune disorders, genetics, blood, and disorders of each body system, highlighting pathophysiologic processes, signs and symptoms, diagnostic test findings, and current treatments. Illustrations, memory joggers, and other special features help readers understand and remember key points. This edition's expanded cancer chapter covers more types of cancer. The Practice Makes Perfect self-test includes more NCLEX®-style questions, with rationales for correct and incorrect answers. A companion website on thePoint will offer additional information, illustrations, memory joggers, and study cards.

"Assessment Made Incredibly Easy, 5e presents nursing
