The idea of storytelling goes beyond the borders of language, culture, or traditional education, and has historically been a tie that bonds families, communities, and nations. Digital storytelling offers opportunities for authentic academic and non-academic literacy learning across a multitude of genres. It is easily accessible to most members of society and has the potential to transform the boundaries of traditional education. As concepts around traditional literacy education evolve and become more culturally and linguistically relevant and responsive, the connections between digital storytelling and disciplinary literacy warrant considered exploration. Connecting Disciplinary Literacy and Digital Storytelling in K-12 Education develops a conceptual framework around pedagogical connections to digital storytelling within K-12 disciplinary literacy practices. This essential reference book supports student success through the integration of digital storytelling across content areas and grade levels. Covering topics that include immersive storytelling, multiliteracies, social justice, and

pedagogical storytelling, it is intended for stakeholders interested in innovative K-12 disciplinary literacy skill development, research, and practices including but not limited to curriculum directors, education faculty, educational researchers, instructional facilitators, literacy professionals, teachers, pre-service teachers, professional development coordinators, teacher preparation programs, and students. Regardless of the discipline or country, creating quality education is multifaceted. At the center of any schooling practice are the educators, their schools, and the teacher education programs that license them. As the schools and faculties of education strive to provide the best practices to pre-service or in-service teachers, it becomes more critical to increase the quality of teacher education via various means to keep up with the demands of schooling in the 21st century. Interdisciplinary Approaches Toward Enhancing Teacher Education provides an overview of how innovation and research experience can enhance teacher education programs with a focus on competencies, skills, and strategies future teachers will need to cope with while teaching students' learning with diversity

and facing linguistic, social, and environmental challenges. The book particularly investigates the potentiality of educational technology, innovative techniques, and digital storytelling to enhance education and bilingualism in intercultural contexts and multilingual settings. Covering topics that include performance assessment, teacher training, and professional development, and including many practical and diverse examples, this book is intended for TESOL, second or foreign language learning, and CUL programs and teacher-training institutions, as well as teachers, researchers, academicians, and students in interdisciplinary areas that include science, history, geography, language learning, bilingualism, intercultural competencies, classroom interaction, gamification, and educational technology.

The integration of information and communication technologies in education is unavoidable, as an increasing percentage of educators embrace modern technology, others are faced with the decision to reevaluate their own pedagogical practices or become obsolete. To meet the needs of students, one must first define what stipulates a successful K-12 student, the best practices of online classrooms, the warning signs for low-performing students, and how to engage web-based students. Optimizing K-12 Education through Online and Blended Learning addresses the models, support, cases, and delivery of K-12 online education. Seeking to further the conversation about the most effective ways to integrate ICT into the classroom, this publication presents theoretical frameworks to support educators and administrators. This book is an essential collection of research for teachers, administrators, students of education, IT professionals, developers, and policy makers.

Teaching Primary Geography is a hands-on guide to planning and delivering primary lessons that will inspire your class and extend their knowledge in lively and effective ways. By providing a succinct and accessible overview to over 30 geographical topics, it meets the needs of practitioners across the country and provides a single reference point for informed and creative geography teaching. Linked to the National Curriculum guidelines for Key Stage 1 and Key Stage 2, each chapter provides easy-to-follow lesson plans that are packed full of

activities and ideas, alongside a helpful summary, a myriad of interesting facts, key vocabulary, cross-curricular links, and fully formed lesson plans.

Downloadable online resources are also available for immediate use in the classroom. If you are a primary practitioner or a subject co-ordinator who wants to plan and deliver an engaging and informed programme in your classroom or across your whole school, this book is for you! The Bloomsbury Curriculum Basics series provides all the subject knowledge and lesson plans you need to deliver the primary curriculum with confidence. Perfect for classroom teachers and subject leads, each book includes engaging lesson plans, key vocabulary, useful links, cross-curricular activities and much more.

This book disseminates original research on learning in and from practice in pre-service teacher education. Authors such as Lederman and Lederman describe the student teaching practicum (or work-integrated learning [WIL]), which is an essential component of pre-service teacher education, as the ‘elephant in the room’. These authors note that ‘the capstone experience in any teacher education programme is the student teaching practicum... [a]fter all, this is where the rubber hits the road’. However, many teacher educators will agree that this WIL component is sometimes very insufficient in assisting the student teacher to develop their own footing and voice as a teacher. This is the ‘gap’ that this research book addresses. Most of the chapters in the book report empirical data,

with the exception of two chapters that can be categorized as systematic reviews. WIL is addressed from various angles in the chapters. Chapter 6 focuses on research related to what makes Finnish teacher education so effective, and in Chapter 4 researchers of the University of Johannesburg disseminate their findings on establishing a teaching school (based on Finnish insights) in Johannesburg. Chapter 3 highlights the challenges faced in open-and distance learning teacher education contexts. Several of the chapters disseminate research findings on alternative interventions to classic WIL, namely, where “safe spaces” or laboratories are created for student teachers to learn and grow professionally. These could either be simulations, such as software programmes and avatars in the intervention described in Chapter 2; student excursions, as the findings in chapters 5, 7 and 10 portray; or alternative approaches to WIL (e.g. Chapters 11 and 12). The book is devoted to scholarship in the field of pre-service teacher education. The target audience is scholars working in the fields of pre-service teacher education, work-integrated learning, and self-directed learning. The book makes a unique contribution in terms of firstly its extensive use of Cultural-Historical Activity Theory as a research lens, and secondly in drawing on various theoretical frameworks. Both quantitative and qualitative research informed the findings of the book.

Unlocking the Magic of Facilitation

In recent years the emphasis has shifted away from a focus on pedagogy (the how of teaching) and towards curriculum (the what of teaching). Ofsted's revised inspection framework reflects this shift, and their plans to -deep dive- into subject areas - meaning that teachers and department heads now need a much greater understanding of curricular structures - leave many educators having to think about their subject in new ways. Luckily for geography teachers, however, bestselling author Mark Enser provides plenty of insightful, subject-specific guidance in this all-encompassing book. Mark explores both the purpose of the geography curriculum and its various applications in practice. He details how teachers can take their students' learning beyond the acquisition of knowledge to transform how they see the world. He also tackles the changing nature of school geography, shares a variety of case studies, and offers his take on how best to facilitate geographical enquiry and fieldwork. The first part of

the book considers the issue of purpose by looking at the role of the school in society and then shows the place that geography occupies within it. It also considers the history of the subject so as to help geography teachers better understand where they stand today, and concludes by discussing how the concepts of powerful knowledge and GeoCapabilities can help them find their way again. The second part is a practical guide which illustrates how to put this theory of curriculum purpose into practice. It explores the steps which must be taken to create a powerful geography curriculum by deciding on content and places to be studied, putting the components into a sequence and then using all this to do geography. It will also discuss the extent to which teachers need to consider the future and respond to the concerns of the wider world when planning the curriculum. Suitable for department heads and classroom teachers of geography in secondary schools and subject leads in primary schools. Powerful Geography was Highly Commended in the Geographical Association Awards 2022.

Access to learning materials has been an issue within education that has had a profound impact on student outcomes and equality among students. New strategies for promoting more equal access

to these materials began within institutions of higher learning and can be adapted at lower levels to facilitate equity within educational systems. Open Educational Resources (OER) Pedagogy and Practices is a comprehensive research publication that explores open access to educational materials and its impact on educational cost, educational equity, and poverty. Featuring a range of topics such as instructional design, pedagogy, and gamification, this book is essential for teachers, curriculum developers, instructional designers, principals, school boards, educational professionals, academicians, professors, administrators, educational policymakers, researchers, and educational agencies.

Have you ever been in a training and marveled at how quickly the time flew by? Genuinely enjoyed a meeting you were expecting to dread? Learned something powerful about a topic you thought wouldn't engage you? Experienced an intimate, vulnerable, transformative moment with a group of total strangers? Then you've witnessed the magic of facilitation. Like all magic tricks - though they seem to defy reason when you're spectating for the first time - once the secrets of facilitation are unveiled to

you, you'll look back with a bland obviousness. Of course that's how it's done. In this book, co-authors and social justice facilitators Sam Killermann and Meg Bolger teach you how to perform the favorite tricks they keep up their sleeve. It's the learning they've accumulated from thousands of hours of facilitating, debriefing, challenging, and failing; it's the lessons from their mentors, channeled through their experience; it's the magician's secrets, revealed to the public, because it's about time folks have the privilege of looking behind the curtain of facilitation and thinking of course that's how it's done. This book is highlights 11 key concepts every facilitator should know, that most facilitators don't even know they should know. They are sometimes-tiny things that show up huge in facilitation. It's a book for facilitators of all stripes, goals, backgrounds, and settings - and the digestible, enjoyable, actionable lessons would benefit anyone who is responsible for engaging a group of people in learning.

Active participation in processes of change are an essential aspect of community participation, and proper recognition of opportunities for participation facilitate community engagement nationally and internationally. Education and its relation to citizenship in recent years has become one of the most important fields of research. From different areas and contexts, it has been revealed that there is a prevailing need for education for citizens to take part actively in the processes of change and improvement that the current global situation requires. The Handbook of Research on Education for Participative Citizenship and Global Prosperity is a pivotal reference source focusing on the productions and fields of study that are carried out all over the world on education for citizenship, namely the devices that provide young people with the consciousness and highlight the aspects of an active democratic life. While highlighting topics such as citizenship identity, educational policy, and social justice, this publication explores participation instruction, as well as the methods of community involvement. This book is ideally designed for educational administrators, policymakers, researchers, professionals, and educators seeking current research on instructional methods for teaching active community and political involvement.
