Latin America is one of the most diverse but also vulnerable regions in the world that is under continuous anthropogenic pressure due to increasing urban, industrial and agricultural developments. Although there are many research groups studying the impacts caused by those pressures, the results and conclusions obtained by many of them are largely unknown because their studies are mostly published at the local or regional scale. Ecotoxicology in Latin America represents an effort to collect and share research performed in Latin America in the area of ecotoxicology and environmental risk assessment, presenting a collection of relevant and innovative studies focused on the following topics: (i) Contaminant

entrance, transportation, distribution and fate; (ii) Environmental risk in freshwater ecosystems; (iii) Ecological risk in coastal zones; (iv) Biomonitoring programs: water, sediment and air; (v) Physiological effects and biomarkers; (vi) Soil ecotoxicology; (vii) Bioaccumulation and human risk; (viii) Toxicity of emerging contaminants; and (ix) Frontiers in Ecotoxicology. This selection of topics aims at covering the most important subjects and applications of ecotoxicology, including classical and novel subjects. Therefore, this book contains chapters related to different environmental compartments prone to contamination (water, sediment, soil and air), to different contamination sources (agriculture, industry, urban discharges and natural emissions), and to

multiple biological responses at different organizational levels (individual to ecosystems, including human beings). It is envisioned to have an international projection within and beyond Latin American countries, as it is a great opportunity to increase the networks not only among Latin American research teams working on similar subjects, but also with teams from other regions. The idea of this book was to favour the connection among groups to quickly improve the development of methods and their application in ecotoxicological and environmental risk studies in Latin America. This book will be useful to important sectors of environmental sciences and related areas, and to specific target demographics such as students and researchers acting in

environmental studies, and decision-makers (i.e., politicians and environmental organizations). Ecotoxicology in Latin America presents 34 chapters authored by 111 researchers from 12 Latin American countries (Argentina, Brazil, Chile, Colombia, Costa Rica, Cuba, Ecuador, Mexico, Panama, Peru, Uruguay, and Venezuela) and from 6 non-Latin American countries (Austria, Belgium, Italy, Portugal, Spain, and USA). This book offers a detailed review of the remarkable advances that have been made in research on the pathogenesis of a number of neuroimmunological diseases, as well as outlining novel treatments including the use of monoclonal antibodies. Written by renowned experts who have made major contributions in the field, such as identifying neuromyelitis

Neuroimmunological Diseases is a useful resource for not only researchers but also neurologists who are engaged in the management of neuroimmunological diseases.

bookdown: Authoring Books and Technical Documents with R Markdown presents a much easier way to write books and technical publications than traditional tools such as LaTeX and Word. The bookdown package inherits the simplicity of syntax

and flexibility for data analysis from R Markdown, and extends R Markdown for technical writing, so that you can make better use of document elements such as figures, tables, equations, theorems, citations, and references. Similar to LaTeX, you can number and cross-reference these elements with bookdown. Your document can even include live examples so readers can interact with them while reading the book. The book can be rendered to multiple output formats, including LaTeX/PDF, HTML, EPUB, and Word, thus making it easy to put your documents online. The style and theme of these output formats can be customized. We used books and R primarily for examples in this book, but bookdown is not only for books or R. Most features introduced in this book also

climate change and the destructive effects of the Anthropocene. Climate change has emerged to be one of the biggest challenges faced by our planet today, threatening both built and natural systems with long-term consequences, which may be irreversible. While there is a vast body of literature on sustainability and sustainable urban development, there is currently limited focus on how to cohesively bring together the vital issues of the planning, development, and management of sustainable cities. Moreover, it has been widely stated that current practices and lifestyles cannot

continue if we are to leave a healthy living planet to not only the next generation, but also to the generations beyond. The current global school strikes for climate action (known as Fridays for Future) evidences this. The book advocates the view that the focus needs to rest on ways in which our cities and industries can become green enough to avoid urban ecocide. This book fills a gap in the literature by bringing together issues related to the planning, development, and management of cities and focusing on a triple-bottom-line approach to sustainability.

A new portrait of the two-time Nobel winner and her two daughters Focusing on the first family in science, this biography of Marie Curie plumbs the recesses of her relationships with her two daughters, extraordinary in their own right, and presents the legendary scientist to us in a fresh way.

writer Shelley Emling shows how Marie Curie was nothing short of an iconoclast. Her affair with a younger and married man drew the enmity of a xenophobic French establishment, who denied her entry to the Academy of Sciences and tried to expel her from France. But she was determined to live life how she saw fit, and passed on her resilience to her daughters. Emling draws on personal letters released by Curie's only granddaughter to show how

Durante los últimos años, nuestra sociedad moderna se ha visto atacada por la falta de sentido en las personas. Basta con ver un par de minutos de publicidad para darse cuenta que los medios de comunicación nos muestran un camino a la felicidad soportado en el “ tener ” y en la búsqueda externa de la felicidad. Mientras algunas religiones y credos ponen la búsqueda de la felicidad en la otra vida (la eterna), otras la ponen en el yo interior “ el ser ” . ¿ Quién tiene la

Ha habido en este mundo gente feliz e infeliz sin discriminación de religión, raza, sexo y de todas las tendencias políticas. Este libro se trata de eso, es “ un camino posible ” para encontrar la felicidad, basada en la información que nos han dejado aquellas personas que han sido felices y aquellas que no lo han logrado. Inspirada en la vida de varias personas y los estudios de varios autores, recopilando su filosofía de vida, de cómo lograron superar los grandes golpes de la vida, cómo motivaron a otros a salir adelante en circunstancias

The Secret of the Seven Seeds tells of the successful entrepreneur and writer David Fischman's struggle with his out-of-control life. In this fascinating and instructive book, he reveals his personal story through the fictional character Ignacio Rodriguez. Ignacio is 40-something stressed-out entrepreneur who is utterly overwhelmed—he is at risk for a heart attack, is losing money at his business—where employee morale is at an all-time low, and has no time or energy for his family. At first, he ignores these problems, thinking that if he only works

instruction, and an engaging tale.

In this latest portrait of Edith Stein, she continues to carry divine life to the current generation, inviting readers to know and emulate her saving grace, her spirituality.

Author Dianne Traflet explores its three pillars: the Eucharist, which enabled her to receive and extend God's love; the Blessed Mother, who taught her to obey the call to serve; and the cross, which gave her the courage to live Christ's example, suffering to save others even to the point of death. The result is a biography that is both an inspiration and a spiritual journey.

The digital transformation demands that we focus our attention on experiences and outcomes. Business leaders and their organizations must shift to keeping promises—no matter how their customers interact with them. But organizations no longer control the conversation. In this era of social and mobile technology, customers, employees, suppliers, and partners are in direct communication with one another. Those personal networks and the brands they 're passionate about influence their decision making and their spending. The workforce has changed too. Employees expect to be able to determine when and how they will work, the

technology they ' ll use, and the values their company will espouse. Organizations can take part in this conversation only if they recognize how and where it ' s happening. Resisting these changes will leave executives, managers, and their companies powerless. Organizations must pivot with and ahead of these social, organizational, and technological shifts or risk being left behind. Technology guru Ray Wang shows how organizations can surf the waves of change—how they can keep their promises. Current trends, when taken seriously, require a new way of thinking about business that includes five key areas: 1. Consumerization of technology and the new C-suite 2.

In this entertaining and thought-provoking book, Tony Alessandra and Michael O'Connor argue that the "Golden Rule" is not always the best way to approach people. Rather, they propose the Platinum Rule: "Do unto others as 'they'd' like done unto them". In other words, find out what makes people tick and go from there.

success and harmony in their adult lives. Gender studies have shown that when a goal is in sight, men generally use direct action to attain it. Women, on the other hand, have been socialized to express aggressive actions through indirect means-using behavior such as shunning, stigmatizing, and With startling insights into the meaning of our everyday behavior, this book offers straightforward techniques to change conflict among women into cooperation by resolving discords peaceably, building relationships, and making

This volume provides the most current research on smart cities. Specifically, it focuses on the economic development and sustainability of smart cities and examines how to transform older industrial cities into sustainable smart cities. It aims to identify the role of the following elements in the creation and management of smart cities: □ Citizen participation and empowerment □ Value creation mechanisms □ Public administration □

Quality of life and sustainability □ Democracy □ ICT □ Private initiatives and entrepreneurship

Regardless of their size, all cities are ultimately agglomerations of people and institutions. Agglomeration economies make it possible to attain minimum efficiencies of scale in the organization and delivery of services. However, the economic benefits do not constitute the main advantage of a city. A city's status rests on three dimensions: (1) political impetus, which is the result of citizens' participation and the public

administration's agenda; (2) applications derived from technological advances (especially in ICT); and (3) cooperation between public and private initiatives in business development and entrepreneurship. These three dimensions determine which resources are necessary to create smart cities. But a smart city, ideal in the way it channels and resolves technological, social and economic-growth issues, requires many additional elements to function at a high-performance level, such as culture (an

Indirect Aggression Among Women: Why We Hurt Each Other and How to Stop

**A life-changing, research-based program that will end food allergies in children and adults forever. The problem of food allergy is exploding around us. But this book offers the first glimpse of hope with a powerful message: You can work with your family and your doctor to eliminate your food allergy forever. The trailblazing research of Dr. Kari Nadeau at Stanford University reveals that food allergy is not a life sentence, because the immune system can be**

retrained. Food allergies--from mild hives to life-threatening airway constriction--can be disrupted, slowed, and stopped. The key is a strategy called immunotherapy (IT)--the controlled, gradual reintroduction of an allergen into the body. With innovations that include state-of-the-art therapies targeting specific components of the immune system, Dr. Nadeau and her team have increased the speed and effectiveness of this treatment to a matter of months. New York Times bestselling author Sloan Barnett, the mother of two children with food allergies, provides a lay perspective that helps

make Dr. Nadeau's research accessible for everyone. Together, they walk readers through every aspect of food allergy, including how to find the right treatment and how to manage the ongoing fear of allergens that haunts so many sufferers, to give us a clear, supportive plan to combat a major national and global health issue.

We live in an era when the unprecedented speed of change means: The only certainty is uncertainty; you can't predict what skills will be useful in ten years time; in most professions knowledge is doubling every two or three years; and no job is forever--so

being employable means being flexible and retraining regularly. Accelerated Learning into the 21st Century contains a simple but proven plan that delivers the one key skill that every working person, every parent and student must master, and every teacher should teach: it's learning how to learn. The theory of eight multiple intelligences (linguistic, logical-mathematical, visual-spatial, kinesthetic, musical, interpersonal, intrapersonal, and naturalist) developed by Howard Gardner at Harvard University provides a foundation for the six-step MASTER-Mind system to facilitate learning (an acronym for Mind,
