A Theory of Argument is an advanced textbook intended for students in philosophy, communications studies and linguistics who have completed at least one course in argumentation theory, information logic, critical thinking or formal logic. Containing nearly 400 exercises, Mark Vorobej develops a novel approach to argument interpretation and evaluation. One of the key themes of the book is that we cannot succeed in distinguishing good argument from bad arguments until we learn to listen carefully to others. Part I develops a relativistic account of argument cogency that allows for rational disagreement. Part II offers a comprehensive and rigorous account of argument diagramming. Hybrid arguments are contrasted with linked and convergent arguments, and a novel technique is introduced for graphically recording disagreements with authorial claims.

Money Attraction: Numbers for More Than 50 Dreams

When I host book signings and give lectures on lottery prediction, people always ask, If lotteries are random draws, how can they be predicted? I always answer the same way. Lotteries are predictable because we have the ability to redirect subtle energy. With about 20 to 30 people present, I always ask how many are familiar with subtle energies. No one has ever raised their hand. And, why should they! It's only been within the last 30 to 40 years that Science discovered subtle energies and their role in manifesting human desire. It's only been within the last 10 years that this research and experimentation has been available to the general public in books like Lynne McTaggart's The Intention Experiment or Dr. Tiller's Conscious Acts of Creation. As a matter of fact, it has only been this year (2013) that Dr. Peter Higgs won the Nobel Prize for his work on the God Particle. The first subtle energy particle ever found at the new CERN accelerator. With these discoveries and experiments on the redirection of subtle energy, Scientists believe that a new technology has been born. Significantly more powerful than electromagnetic energy, significantly more powerful than nuclear energy, subtle energy technology will bring about new ways for human populations to interact, and new ways to communicate. It will significantly change our health care industry and influence the movement towards world peace. Most interesting, are the time and space attributes of subtle energy that allow the human mind to predict the future and consequently win lotteries. In the science of Quantum Mechanics, experimenting at the level of subtle energy, scientists found that their observations were affecting the outcome of the experiments. Somehow, the experimenter's consciousness was having an effect on our everyday reality of atoms and elements. This led to other experiments many concerning time displacement. As it turns out, subtle energy does not conform to the way you and I experience sequential time. Subtle energy is unbound by time and space - giving it predictive potential. A few daring researchers now understand subtle energy to be a vast field of potential energy supporting our everyday reality and somehow this energy is intimately interconnected with our minds. Consequently, at this stage of subtle energy technology research, researchers are studying ways that the mind can amplify subtle energies to manifest human desires for better health, wealth and abundance, world peace, lasting vitality, and prophetic vision. Dream a Lottery Win Tonight, specializes in the application of subtle energy and its prophetic vision attributes. We accomplish this by activating an energized intention near the mind's source of subtle energy. In this way, we amplify the intention to win a lottery. Of course, we could amplify any intention including those for better health or world peace. We decided on lottery prediction not because it was easy but because it was difficult and because the results are quantitative not subjective. In developing the skill of prophetic vision to win a lottery, we use an energized intention activated as close to the mind's Source of subtle energy as possible. To get close to the Source, we use mantras. These mantras resonate frequencies that are specific to the results we seek. In this case, we use the Lakshmi Mantra, used since antiquity to enhance ones abilities at games of chance. Once close to the source, we activate an energized intention. The intention is energized with emotion and bright sense visualizations. We perform this meditation just before retiring enhancing our dreams allowing us to predict a winning number. In this way, we use subtle energies to win the lottery. Larry Vingelman Author

We can't ignore that there is a reason for having dreams. Perhaps at the moment we have peculiar dreams we have neither the capacity nor the insight and the foresight to comprehend the reason why those events are occurring while we're sleeping, but while time passes and we keep searching for answers, many things might come to light. In this book there is a significant attempt to connect our dreams with numbers. But we have to remember that nothing is absolute. Yes, some of us are going to have great success; others not so much. This is the law of nature. We can't change that fact. However, we hope that many and many people are going to have wonderful life-changing events while maximizing on the numbers attributed to their dreams. So it's with hard work, persistent observation, and motivation to help others win money that this book got published. I initially wanted to make people aware that their dreams are not happening by chance. More than a decade ago, if I knew about the importance of dreams, I would be a multimillionaire when I was very young. I had a weird dream. I went to my grandma and told her about that bizarre dream because I was seeking help for the sudden slight anxiety, panic, and sadness caused by that nightmare. Although these bad feelings had been bothering my mind during that morning and afternoon, my grandma to my surprise said that was a very good lottery dream. In fact, she told me the numbers to play for that evening drawing related to the dream. I was profoundly skeptical and didn't bother to play for a lot of money. At about 9:05PM, guided by my curiosity, I checked the numbers that were drawn for that evening. Then, I said, "Oh wow, oh wow, oh wow." I won, but I didn't have enough maturity at that time to understand the significance of dreams; I could have been a millionaire back then. The next morning, I found myself emotionally paralyzed because I did not make the most out of that dream. My grandma did play and made some money too. Nothing in my life had prepared me for this; I was absolutely amazed when I saw the winning lottery numbers on the board. Years of observation had trained my mind to make me believe that there is a lot of wonderful things people can do with images, stories, and events that they're seeing in their dreams. I have learned to respect the communication through dreams. Even today, I can't find a scientific explanation for that event that had happened more than a decade ago. There are probably too many phenomena about dreams that are beyond our comprehension. No matter what scientists could have already said about human subconscious mind, perhaps the unconscious mind uses the energy source that sends us messages at a totally different level. This book is in your hands simply to help you win money. It's a tentative after long observation to connect our dreams with numbers. As the author, I won a few lottery games with my dreams. I still want to keep winning; in fact, I would be very happy if I could win as often as possible via my dreams. You can win too. Even though you could buy the e-book to have it everywhere in your electronic device, I would like to strongly suggest to get the paperback too so that you won't have difficulty to go back to your notes in case something happens to your electronic device.
