Drop shipping is a retail fulfillment model that allows you to purchase products individually from a wholesaler and ship them directly to your customer. Instead of purchasing a large number of products, you simply go into partnership with a drop shipping supplier and list their merchandise for sale. Then, once you get a buyer/receive an order, you forward it to the supplier for fulfillment. The supplier will ship the product directly from their warehouse to your customer, and charge you only for the price of the shipped item (product). The drop shipping model has some number of advantages. Apart from being easy to start with low capital and low risks, locational flexibility coupled with wide range of product selection are also some of the reasons why drop shipping is a great business. However, one must be cautious of some factors to ensure a successful drop shipping business. Dealing with many customer and supplier errors which may affect delivery should be properly tackled. This book contains detailed information that can help you successfully run an e-commerce business. It will also teach you all you need to know about the drop shipping model, which will also help you run a successful e-commerce business. So take your time to read all the information in this book and try to use it as a guideline, most especially when you are new in the e-commerce world.

Just getting started with product research and sourcing? Stuck trying to find ideas or find that "perfect" winning product? Want to find good selling products that others are ignoring? Interested in wholesale or private label products? If you answered yes, then this book is for you. If you are an experienced seller or are looking to do arbitrage this book will have less value as I don't discuss sourcing by arbitrage. I don't do arbitrage, so I don't teach it. This book is written for the new or struggling seller wanting to source wholesale or private label products. What you will learn: Basic steps for finding top selling products How to generate product ideas and look for trends How to validate demand Tips for finding suppliers Analyzing data to help you pick a product It took me 5 months of research before I pulled the trigger on my first products to sell on Amazon. Five months and countless hours. I have pages of notes with product ideas in many different categories. Some were wholesale products, others were ideas for my own products. I had some money set aside to buy inventory. But I couldn't commit. I was looking for...not necessarily thee perfect product, but, well yeah, the perfect product. Fear of choosing "wrong" was holding me back. I knew that product selection was key to success so I needed to choose right. Another part of the problem was I had bigger ideas-I wanted to create a brand and I had some ideas as to what sorts of products I would carry. But those ideas required more capital than I was willing to invest for my first product. As a result, I put so much pressure on myself to dream big and think towards the future that I did...nothing! Another hold up was I was a little skittish to follow the advice to source from Chinese suppliers. It seemed so complicated for a beginner. Could I not take a little less profit and source domestically? Were there not manufacturers that could produce my ideas in North America? Yes, and yes. Ultimately the delays helped me because I learned a lot by joining Facebook groups and listening to and learning from the experiences of others. I devoured the advice in forums as well as blogs, books, webinars, and courses. I learned of the pitfalls of private label that the gurus selling you the dream never talk about. And finally, I did pull the trigger. I put together this guide to help any of you who are feeling a little gun-shy too. I put this book together for all of you who have the brains to say "Hey, if everyone buys top 100 selling products wont that saturate the market?" I put this book together to help you find great products from many different approaches.

After reading this, you should feel confident enough to find a product and get started with your e-commerce business.

What is Dropshipping? Drop shipping simply refers to a retail fulfillment model where you do not stock the products you are selling. Instead of physically stocking the products you want to sell, you just display the items online (on your website mostly). Once a buyer places an order, you forward the order to the vendor who then acts as a third party and fulfills the orders on your behalf. From the above explanation, it is clear that the dropshipping business model usually depends of the participation of three parties namely: Supplier The first in the chain is the dropshipping supplier who fulfills the orders placed by a customer. For instance, if you are selling shirts by H&M and a customer places an order for a shirt, you will send the order details to H&M and it, being the supplier, will fulfill the order. Retailer The retailer is the person/organization that acts as an intermediary who takes orders from the customer and forwards them to the supplier who then fulfills them. This order taking process can be through a website or a social media account. Customer The customer is the person who places the order through the website or social media account. Now that you know the parties involved in the dropshipping business model, let us examine a tad bit more on how the dropshipping model works. tag: drop shipping business, dropshipping 2018, dropshipping book, dropshipping made easy, dropshipping make money online, ecommerce development, dropshipping suppliers, dropshipping ebay, dropshipping guide, dropshipping items, dropshipping amazon, dropshipping for beginners, dropshipping shopify, dropshipping on ebay, dropship online, dropship guide, make money dropshipping
