

Dua For Successful Operation

Contributed papers presented at National Seminar on "Media and Society: Challenges and Opportunities" held at Department of Journalism and Mass Communication on 23-24 October 2000; with reference to India.

Open Distributed Processing contains the selected proceedings of the Third International Conference on Open Distributed Systems, organized by the International Federation for Information Processing and held in Brisbane, Australia, in February 1995. The book deals with the interconnectivity problems that advanced computer networking raises, providing those working in the area with the most recent research, including security and management issues.

This comprehensive, up-to-date textbook offers detailed coverage of venous anatomy, pathophysiology, imaging, and management of venous pathology, leading the practitioner through all aspects of care of the venous patient. The various techniques that have revolutionized the diagnosis and treatment of venous disease during the past decade are all discussed, with clear guidance on their indications and performance. The book is exceptional in being based entirely on the curriculum designed for board certification by the American College of Phlebology. A further unique aspect of the text is the integration of ultrasound, which now plays a fundamental role in diagnosis and management. The authors come from a wide range of specialties and the book will accordingly serve the needs of vascular and general surgeons, interventional radiologists, phlebologists, ultrasonographers, and other practitioners, as well as those preparing for board examinations.

Tour Operators and Operations

Understanding X.500 The Directory describes, in lay terms, the contents of both the 1988 and 1993 editions of the ISO OSI Directory Standard (CCITT Recommendation X.500). An in-depth account is given of all the features of the Standard and numerous examples of its application are provided throughout. The implications of the Standard are related to implementation details in terms of product usefulness, differentiation and ease of management. Key features of the text are that it is fully up-to-date with all the features of the 1993 edition of the X.500 Standard; it describes clearly all X.500 terminology such as DSA, DUA, DIT; it explains X.500 security features such as asymmetric encryption and access controls; and it describes the use of X.500 by other applications such as EDI and X.400.

This issue of Thoracic Surgery Clinics of North America, guest edited by Drs. Jean Deslauriers, Farid Shamji, and Bill Nelems, is the second of two devoted to Fundamentals of Airway Surgery. The editors have assembled expert authors to review the following topics: From Open to Bedside Percutaneous Tracheostomy; Anterior Mediastinal Tracheostomy: Past, Present, and Future; Extended Sleeve Resections; Bronchoplasties at the Segmental Level; Challenges of Carinal Resection and Reconstruction; Carinal Pneumonectomy; Management of Post-Pneumonectomy Broncho-Pleural Fistula: From Thoracoplasty to Trans-Sternal Closure; Tracheal Transplantation: State of the Art and Key Role of Blood Supply in its Success; Autologous Tracheal Replacement; Pathophysiology and Predictors of Bronchial Complications After Lung Transplantation; Management of Bronchial Complications After Lung Transplantation and Late Sequelae; Experiences with Prosthetic Airway Replacement: From the Use of Marlex Meshes to Tissue Engineering; Management of Acquired Benign Tracheo-Esophageal Fistulas; Strategies in the Treatment of Malignant Tracheoesophageal Fistulas; Recognition and Management of Life-Threatening Tracheo-Vascular Fistulae and How to Prevent Them; Principles of Urgent Management of Acute Airway Obstruction; Tracheo-Bronchial Injuries Secondary to Blunt Chest Trauma; Cricothyroid Approach for Emergency Access to the Airway; Use of Silicone Tubes in the Management of Complex Airway Problems; Management of the Airway after Tracheal Reconstruction; Importance of a Team Effort in the Success of Airway Surgery; and more!

Learn to leverage, manage and protect your messaging infrastructure, and deliver information, products, and services to anyone, anytime, anywhere. Get the expertise you need in Electronic Messaging. Electronic Messaging shows you how to build from the ground up and then get the most out of a messaging infrastructure that will carry your enterprise into the next wave of collaborative computing, as well as into the next century. Packed with clear explanations, no-nonsense solutions and real-world case studies, Electronic Messaging goes far beyond basic terms, concepts, techniques, architectures, and products. While explaining fundamentals, it also provides all the advanced know-how you need to build, maintain and protect a first-class messaging environment. In the final analysis, Electronic Messaging gives you all the information and tools you need to position your enterprise for success in tomorrow's networked world - and to do so efficiently and economically.

Provides readers with the means to evaluate X.500 products and make informed choices as to which available products best match the requirements of their organizations. The X.500 Directory is a distributed database, capable of storing information about people and objects in various nodes or servers distributed across a network. These servers, acting in concert, provide the potentially global access to information made possible by X.500 technology. Especially useful for procurement officials and systems administrators. Bibliography. Charts and tables.

Practices in Archaeological Stratigraphy

News for Farmer Cooperatives

With a focus on the creation and distribution of packaged holidays, this text covers the fundamentals of business and the relationship between tour operators and destinations. With particular reference to the sustainability of both parties, it reviews the impacts and influences of tour operations and practices on destinations within the overriding context of tour operator responsibility. It addresses the entirety of this key component of the tourism sector, and reflects the shift in recent years from traditional 'sun, sea and sand' holiday to more bespoke packages. Written by experts from London 's renowned Royal Free Hospital, Textbook of Plastic and Reconstructive Surgery offers a comprehensive overview of the vast topic of reconstructive plastic surgery and its various subspecialties for introductory plastic surgery and surgical science courses. The book comprises five sections covering the fundamental principles of plastic surgery, cancer, burns and trauma, paediatric plastic surgery and aesthetic surgery, and covers the breadth of knowledge that students need to further their career in this exciting field. Additional coverage of areas in which reconstructive surgery techniques are called upon includes abdominal wall reconstruction, ear reconstruction and genital reconstruction. A chapter on aesthetic surgery includes facial aesthetic surgery and blepharoplasty, aesthetic breast surgery, body contouring and the evolution of hair transplantation.The broad scope of this volume and attention to often neglected specialisms such as military plastic surgery make this a unique contribution to the field. Heavily illustrated throughout, Textbook of Plastic and Reconstructive Surgery is essential reading for anyone interested in furthering their knowledge of this exciting field. This book was produced as part of JISC's Institution as e-Textbook Publisher project. Find out more at https://www.jisc.ac.uk/rd/projects/institution-as-e-textbook-publisher

A Point of Care Clinical Guide

Diagnosis and Management of Venous Disease

Bulletin

Reeducation in Postwar Vietnam

An Illustrated Weekly Journal of Scientific and Electrical Progress

This handbook provides a comprehensive overview of common disorders affecting the pancreas and the bile duct. The book reviews the anatomy and laboratory test relevant to the pathophysiology of the disease, categorizes the symptoms under clinical scenarios like “incidental finding” or “painless jaundice”, defines accuracy (or lack of) of the investigations used, and formulates a management plan as per evidence-based recommendations. The spectrum of diseases covered include commonly occurring benign conditions like pancreatitis, gall stone disease, bile duct strictures, and malignant diseases of the pancreas, gall bladder and the bile ducts. Also included are topics on motility disorders of the pancreaticobiliary system and pre-malignant conditions. Written by experts in the field, Pancreas and Biliary Diseases: A Point of Care Clinical Guide is a valuable reference resource for clinicians who need the latest evidence-based approach to manage these complex patients and answer questions the patient or the referring doctors may have regarding pancreas and biliary diseases.

The stories of three of these Vietnamese who survived and eventually found their way to America are told here in stark and moving detail.--BOOK JACKET.

Electrical Review

The volume presents extensive coverage of network management concepts, standards, and architectures for commercial technology - plus numerous exercises, references, and illustrations to enhance your understanding of the material. Ideal for computer and network professionals as well as network end users, this book will serve as both an on-the-job reference and an easy-to-use tutorial on network management fundamentals. Practices of Archaeological Stratigraphy brings together a number of examples which illustrate the development and use of the Harris Matrix in describing and interpreting archaeological sites. This matrix, the theory of which is described in two editions of the previous book by Harris, Principles of Archaeological Stratigaphy, made possible for the first time a simple diagramatic representation of the stratigraphic sequence of a site, no matter how complex. The Harris Matrix, by showing in one diagram all three linear dimensions, plus time, represents a quantum leap over the older methods which relied on sample sections only. In this book 17 essays present a sample of new work demonstrating the strengths and uses of the Harris Matrix, the first ever published collection of papers devoted solely to stratigraphy in archaeology. The crucial relationships between the Harris methods, open-area excavation techniques, the interpretation of interfaces, and the use of single-context plans and recording sheets, is clarified by reference to specific sites. These sites range from medieval Europe, through Mayan civilizations to Colonial Williamsburg, Virginia. This book will be of great value to all those involved in excavating and recording archaeological sites and should help to ensure that the maximum amount of stratigraphic information can be gathered from future investigations. * Presents case studies which illuminate the Harris matrix method, invented by Edward C. Harris * Senior editor is the inventor of this method and principle in the field * Serves as a companion volume to Harris's Principles of Archaeological Stratigraphy

This updated, full-color 4th edition features a greatly expanded surgical focus for a practical guide to corneal surgery. The expert guidance of internationally renowned editors provides you with authoritative and current coverage that takes you from an in-depth exploration corneal function as related to corneal surgery through to the correction of refractive errors. New chapters ensure that you stay up-to-date on the latest developments in the field. This easy-to-use, state-of-the-art resource has been reorganized to focus strictly on surgery to provide you with more coverage of recent surgical advances. Presents boxes of clinical pearls throughout the text for accessible expert guidance. Features the latest surgical techniques and postoperative management of penetrating and lamellar keratoplasty —to provide you with details on hot topics in the field. Gives you fresh insights with new sections and a broader perspective from a new team of editors. Makes use of full color throughout the text, as well as step-by-step surgical line illustrations and full-color photographs so you gain a more accurate visual understanding of corneal surgery. Emphasizes refractive surgery considerations, including technique, with supporting medical illustrations and video presentations.

This book provides a comprehensive approach to the specialty of cataract surgery. Chapters are authored by an international group of experts who evaluate technology, recommend surgical technique, and review the management of both anticipated and unexpected complications. With more than 30 chapters, everyday challenges such as the white, mature, and uveitic cataract are included while the most difficult cases like the loose lens, posterior polar, aniridic, and the traumatic cataract are covered in detail. The editors have also included topics like IOL repositioning and exchange. Cataract Surgery: Advanced Techniques for Complex and Complicated Cases offers the reader an encyclopedic collection of invaluable lessons that will help both the surgeon who is early in his career as well as the veteran cataract surgeon.
