Quintessentially Reserve 2010

An authentic, unique and memorable destination image is of crucial importance to be competitive in the long-term. Verena Schwaighofer analyses the currently transferred image of the United Arab Emirates as a tourist destination and to what extent the traditional Arabian culture is integrated into the image strategies of image developers in this country. First of all, a detailed theoretical overview referring to various image types, the current image transfer including critical topics related to the religion of Islam, women's role in society, behaviour, body language and dress code and the open-mindedness of the United Arab Emirates regarding local traditions related to the religion of Islam, is given. In the empirical part, a mixed method, including a qualitative media analysis (focusing on print and new media of image developers as well as newspaper articles published by journalists in the United Arab Emirates and the surrounding countries) and qualitative expert interviews are selected as appropriate research methodology.

2011 Updated Reprint. Updated Annually. *Doing Business and Investing in United Arab Emirates Guide*

Globalization affects urban communities in many ways. One of its manifestations is increased intercity competition, which compels cities to increase their attractiveness in terms of capital, entrepreneurship, information, expertise and consumption. This competition takes place in an asymmetric field, with cities trying to find the best possible ways of using their natural and created assets, the latter including a naturally evolving reputation or consciously developed competitive identity or brand. *The Political Economy of City Branding* discusses this phenomenon from the perspective of numerous post-industrial cities in North America, Europe, East Asia and Australasia. Special attention is given to local economic development policy and industrial profiling, and global city rankings are used to provide empirical evidence for cities' characteristics and positions in the global urban hierarchy. On top of this, social and urban challenges such as creative class struggle are also discussed. The core message of the book is that cities should apply the tools of city branding in their industrial promotion and specialization, but at the same time take into account the special nature of their urban communities and be open and inclusive in their brand policies in order to ensure optimal results. This book will be of interest to scholars and practitioners working in the areas of local economic development, urban planning, public management, and branding.

Exploring the impact of travel on Arab cinema, Kay Dickinson reveals how the cinemas of Syria, Palestine and Dubai have been shaped by the history and politics of international circulation. This compelling book offers fresh insights into film, mobility and the Middle East.

Already a regional and global centre for business and finance, Dubai's reputation has been bolstered by the MSCI's decision to upgrade the UAE from frontier to emerging market status in 2014, while the emirate's successful Expo 2020 bid is expected to generate myriad opportunities for private investors across a range of sectors. Construction is thriving once again, driven in large part by strong retail sector growth, with various projects, including plans for the world's largest mall, indicating that the sector will maintain its position as

the emirate's biggest GDP contributor moving forward. The transport and logistics framework is set for major expansion in the coming years as well, furthering cementing the emirate's status as a leading transport and logistics hub not just regionally, but globally too. United Arab Emirates Investment and Business Guide - Strategic and Practical Information

A small town on a sandy creek half a century ago, Dubai is now the largest trading, commercial, leisure and transport entrepot in the Gulf and wider region. This book explains the reasons for the emergence of Dubai and its distinctive development trajectory, arguing that the decision, in the 1970s, to invest in infrastructure made possible by shipping containerization laid the foundations for its future expansion. The book shows that in contrast to its competitors' hydrocarbon rentier economic model, Dubai's creation and expansion of ports and airports, together with 'value-added' logistics and business-friendly enhancements, were used to out-compete regional rivals. Drawing on a range of primary and secondary sources, including interviews with logistics business-people, government records, memoirs, it fills a significant lacuna in the history of Dubai's development and emergence as a global trade hub.
