Moose are playing a quiet game of cards when their friend comes running to ask: Where is Goose? Duck, Duck, and Moose search high and low and get directions from some barnyard friends, but Goose is nowhere to be found. Calm, calm, calm, their friend tells them. Don't freak out. But what are they to do when the day draws to a close and they are snuggling up for bed with no glimpse of Goose? This goofy, kinetic story is as fun as the original Duck Duck Goose game itself.

Wildfowl and screamers belong to a highly diverse family of birds, confined to watery habitats. They are

amongst the most attractive of birds and are very well-known to man, who has domesticated them, used their feathers for warm clothing and ornamentation, admired their flight, courtship and migration, caught them for food, maintained them in captivity for pleasure, and written about their doings in delightful children's stories, from Mother Goose to Jemima Puddleduck and Donald Duck. They occur throughout the world except Antarctica. Some are faithful to the same partner for life, others for only the few minutes of copulation. In some species, male and female make devoted parents, and yet there is

one within the group whose female lays her eggs in the nests of others and never incubates. Diving as a method of obtaining food has evolved many times within the family. Most nest in the open but others in the tree-hole nests of woodpeckers and some in the ground burrows of rabbits or aardvarks. They may be highly social or solitary, defending a large territory. Ducks, Geese, and Swans begins with eight chapters giving an overview of the family, their taxonomy and evolution, feeding ecology, breeding strategies, social behavior, movements and migrations, population dynamics, and conservation

and management, followed by accounts of 165 species, written by a team of expert wildfowl specialists, describing each bird in its natural state and summarizing the published literature and recent research. Complementing the accounts are thirty specially commissioned color plates by Mark Hulme, along with numerous black and white drawings illustrating behaviors, plus distribution maps for each species.

The wives of the Robertsons all came into the family the same way: they fell in love with one of the Robertson boys. In the Duck Dynasty TV series, the women often come into their own when the whole family gathers around the table together to eat dinner, and fans of the show get a good glimpse into their lives, but that is hardly the whole story, which is why they decided to write this book... In The Women of Duck Commander, the wives show how they have worked together to help one another and to support the family in all its work and its happiness. They are committed to timeless values, and in the book they
